Although fossil fuels have been depleted, humanity has obtained a new source of energy to replace them in the form of a large-scale solar power generation system based on three huge orbital elevators. However, the benefits of this system are available only to a handful of major powers and their allies. The three orbital elevators belong to three superpower blocs. These are the Union, led by the United States of America; the Human Reform League, led by China, Russia, and India; and the AEU, led by Europe. These superpower blocs continue to play a grand zero-sum game for the sake of their own prestige and prosperity. Stargazer Girl Stargazer Press,T R Woodman,2019-05-28 Book 4 finale of the completed 4 book series. A determined girl will cross the galaxy, risking everything she holds dear to find the one thing that's missing ... Pursuing answers to mysteries has led Evelyn to being kidnapped, imprisoned, tortured, poisoned, battling bionic super-soldiers and sea monsters, and maybe worst of all ... other teenage girls. So, when she is confronted with another mystery involving the same colonists who have ridiculed, hunted and exiled her, she's certain it will bring nothing but heartache. But her head can't convince her heart of this truth. Even though she finally has everything she wants-freedom to trek the galaxy; the respect, if not the admiration of the colonists; the boy, her first friend and first love-the aching void in her chest tells her that something is still missing. So, with thoughts and feelings she cannot explain to herself, let alone to those she loves, Evelyn will throw herself into another mystery-one that will span the galaxy and may cost her everything she holds most dear, all with the hope she'll find that 'something' that's missing ... a place to call home. The User Illusion Tor Norretranders,1999-08-01 As John Casti wrote, Finally, a book that really does explain consciousness. This groundbreaking work by Denmark's leading science writer draws on psychology, evolutionary biology, information theory, and other disciplines to argue its revolutionary point: that consciousness represents only an infinitesimal fraction of our ability to process information. Although we are unaware of it, our brains sift through and discard billions of pieces of data in order to allow us to understand the world around us. In fact, most of what we call thought is actually the unconscious discarding of information. What our consciousness rejects constitutes the most valuable part of ourselves, the Me that the I draws on for most of our actions--fluent speech, riding a bicycle, anything involving expertise. No wonder that, in this age of information, so many of us feel empty and dissatisfied. As engaging as it is insightful, this important book encourages us to rely more on what our instincts and our senses tell us so that we can better appreciate the richness of human life.
