CRC Handbook of Radioanalytical Chemistry Volume 1 Juraj Tolgyessy, Erno

Bujdosó, 1991-04-03 Radioanalytical methods have become among the most important means for elemental analysis and the determination of chemical species. Their extreme sensitivity has made them indispensable in a wide range of applications, including mineral analysis, medical and biophysical work, criminology, history, archaeology, and space research. This handbook combines theoretical and practical radioanalytical work covering the entire field of radioanalytical chemistry. Topics discussed include analysis by activation and nuclear reactions, isotope dilution analysis, radioreagent methods, analysis by absorption and the scattering of radiation. The handbook is extremely useful to scientists conducting applied and basic research in subjects related to analytical measurements, engineers designing control facilities and equipment, and professors and students

Self-awareness and Alterity Dan Zahavi, 1999 Winner of the 2000 The Edward Goodwin Ballard Prize in Phenomenology In the rigorous and highly original Self-Awareness and Alterity, Dan Zahavi provides a sustained argument that phenomenology, especially in its Husserlian version, can

contribute something decisive to the analysis of self-awareness. Taking on recent discussions within both analytical philosophy (Shoemaker, Castaneda, Nagel) and contemporary German philosophy (Henrich, Frank, Tugendhat), Zahavi argues that the phenomenological tradition has much more to offer when it comes to the problem of self-awareness than is normally assumed. As a contribution to the current philosophical debate concerning self-awareness, the book presents a comprehensive reconstruction of Husserl's theory of pre-reflective self-awareness, thereby criticizing a number of prevalent interpretations and a systematic discussion of a number of phenomenological insights related to this issue, including analyses of the temporal, intentional, reflexive, bodily, and social nature of the self.

Babylonian Prayers to Marduk Takayoshi Oshima, 2011 This is the first comprehensive study of Babylonian prayers dedicated to Marduk, the god of Babylon, since J. Hehn's essay *Hymnen und Gebete an Marduk* (1905). Marduk was the god of the city of Babylon and was the most important god in Babylonia from the time of Hammurabi (the 18th century BCE) onwards. In this book, Takayoshi Oshima presents an up-to-date catalog of all known Babylonian prayers dedicated to Marduk from different historical periods and offers critical editions of 31 ancient texts based on newly identified manuscripts and a collation of the previously published manuscripts. The author also discusses various aspects of Akkadian prayers to different deities and the ancient belief in the mechanism of punishment and redemption by Marduk.
