One Cool Friend Toni Buzzeo,2012-01-10 2013 Caldecott Honor Book. From New York Times bestselling author Toni Buzzeo and Caldecott Medal winning illustrator David Small, comes a cool tale about an unlikely friendship. On a spontaneous visit to the aquarium, straight-laced and proper Elliot discovers his dream pet: a penguin. When he asks his father if he may have one (please and thank you), his father says yes. Elliot should have realized that Dad was probably thinking of a toy penguin, not a real one... Clever illustrations and a wild surprise ending make this sly, silly tale a kid-pleaser from start to finish.

*Strategic Management* Dr.K. Lakshminarayana,Dr. Abdul Razak,Ms. K. Janaki, M.Com, M.Phil, M.B.A.,Dr. Veena Rani K, MBA, PhD,Dr.M.S. VIJAYA RAO, B.Sc, M.B.A, M.Phil, Ph.D.,2022-11-04 This text book is written for Strategic Decision makers, aspiring managers and for management students. This textbook guides readers through the core components of Strategic Management concepts, external and internal analysis and puts them in the manager's chair, challenging them to apply their understanding to solve major business problems such as entering into the new market, entering into strategic alliances, hostile takeovers, mergers and acquisitions. The book's central theme, supported by extensive analysis and the need of the hour, i.e., SWOT Analysis which is heavily driven by Changes taking place in macro and micro environment. The coverage also includes Porter's generic Strategies, Porter's five forces model, corporate strategies, business strategies, balance scorecard, benchmarking, etc. The book contains questions for discussion and evaluation at the end of each chapter and provides the following points for the benefit of the readers: ☐ Presents the core course material in an informal, narrative style that puts readers in the manager's chair. ☐ Focuses readers on practical issues and leads them to work through situations as if they were the managers (or employee, as the case may be).

**Bioinformatics and Phylogenetics** Tandy Warnow,2019-04-08 This volume presents a compelling collection of state-of-the-art work in algorithmic computational biology, honoring the legacy of Professor Bernard M.E. Moret in this field. Reflecting the wide-ranging influences of Prof. Moret's research, the coverage encompasses such areas as phylogenetic tree and network estimation, genome rearrangements, cancer phylogeny, species trees, divide-and-conquer strategies, and integer linear programming. Each self-contained chapter provides an introduction to a cutting-edge problem of particular computational and mathematical interest. Topics and features: addresses the challenges in developing accurate and efficient software for the NP-hard maximum likelihood phylogeny estimation problem; describes the inference of species trees, covering strategies to scale phylogeny estimation methods to large datasets, and the construction of taxonomic supertrees; discusses the inference of ultrametric distances from additive distance matrices, and the inference of ancestral genomes under genome rearrangement events; reviews different techniques for inferring evolutionary histories in cancer, from the use of chromosomal rearrangements to tumor phylogenetics approaches; examines problems in phylogenetic networks, including questions relating to discrete mathematics, and issues of statistical estimation; highlights how evolution can provide a framework within which to understand comparative and functional genomics; provides an introduction to Integer Linear Programming and its use in computational biology, including its use for solving the Traveling Salesman Problem. Offering an invaluable source of insights for computer scientists, applied mathematicians, and statisticians, this illuminating volume will also prove useful for graduate courses on computational biology and bioinformatics.

**String Processing and Information Retrieval** Edleno Moura,Maxime Crochemore,2014-10-10 This book constitutes the proceedings of the 21st International Symposium on String Processing and Information Retrieval, SPIRE 2014, held in Ouro Preto, Brazil, in October 2014. The 20 full and 6 short papers included in this volume were carefully reviewed and selected from 45 submissions. The papers focus not only on fundamental algorithms in string processing and information retrieval, but address also application areas such as computational biology, Web mining and recommender systems. They are organized in topical sections on compression, indexing, genome and related topics, sequences and strings, search, as well as on mining and recommending.

**The Social Worker's Guide to the Care Act 2014** Pete Feldon,2023-06-06 The Care Act 2014 is a pivotal piece of legislation for adults with social care needs. It is particularly important for social workers, as it sets out the legislative context for the core social work processes that apply to all adults. The Social Worker's Guide to the Care Act 2014 is a thoughtfully crafted resource that places social workers at the centre of the legal landscape. This guide takes a distinctive approach by honing in on what truly matters to social workers: assessing needs and formulating care and support plans that align with eligible requirements. Through a unique blend of key concepts, case examples, and critical evaluation, the book serves to enhance legal literacy in a way that empowers social workers. The ultimate goal of this guide is to equip social workers with a profound understanding of the legal framework within which they operate, enabling them to make informed professional judgements and apply their expertise effectively. This eagerly awaited second edition reflects extensive revisions based on valuable insights derived from judicial reviews, Ombudsman decisions, and in-depth research. Drawing from the author's extensive experience in providing training on the Care Act, the revised edition introduces two new sections that delve into the realms of professional judgement and defensible decisions—essential areas of focus for social workers. Additionally, it incorporates the amendments made to the Care Act 2014 by the Health and Care Act 2022.

This substantially revised second edition of *The Social Worker's Guide to the Care Act 2014* will be your invaluable companion in navigating the complexities of social work and will be a source of knowledge, empowerment, and guidance. “Every social worker in England who works with adults needs a good knowledge of the Care Act. Whether newly qualified, several years into practice or an old hand this is the book that provides that knowledge. It is one of the key texts for practitioners I use again and again”. Luke Geoghegan, Head of Policy and Research, BASW

*Smarandache curves of some special curves in the Galilean 3-space* H. S. Abdel-Aziz ,M. Khalifa Saad, In the present paper, we consider a position vector of an arbitrary curve in the three-dimensional Galilean space  $G_3$ . Furthermore, we give some conditions on the curvatures of this arbitrary curve to study special curves and their Smarandache curves. Finally, in the light of this study, some related examples of these curves are provided and plotted.

**The Loss of Male Sexual Desire in Ancient Mesopotamia** Gioele Zisa, 2021-11-22 After more than fifty years since the last publication, the cuneiform texts relating to the treatment of the loss of male sexual desire and vigor in Mesopotamia are collected in this volume. The aim of the book is to present Mesopotamian medical tradition regarding the so-called *nīš libbi* therapies. *ša-zi-ga* in Sumerian, *nīš libbi* in Akkadian, lit. raising of the 'heart', is the expression used to indicate a group of texts intended to recover the male sexual desire. This medical tradition is preserved from the Middle Babylonian period to the Achaemenid one. This broad range testifies to the importance of the transmission of this material throughout Mesopotamian history. The book provides the edition of this textual corpus and analyzes it in the light of new knowledge on ancient Near Eastern medicine. Moreover, this volume aims to show how theories and methodologies of Cultural Anthropology, Ethnopsychiatry and Gender Studies are useful for understanding the Mesopotamian medical system. This edition is an important tool for understanding Mesopotamian medical knowledge for Assyriologist, however since the texts have been translated and discussed using the anthropological and gender perspectives they are accessible also to scholars of other research fields, such as History of Medicine, Sexuality and Gender.

*Clinician's Handbook of Adult Behavioral Assessment* Michel Hersen, 2011-04-28 Given the vast amount of research related to behavioral assessment, it is difficult for clinicians to keep abreast of new developments. In recent years, there have been advances in assessment, case conceptualization, treatment planning, treatment strategies for specific disorders, and considerations of new ethical and legal issues. Keeping track of advances requires monitoring diverse resources limited to specific disorders, many of which are theoretical rather than practical, or that offer clinical advice without providing the evidence base for treatment recommendations. This handbook was created to fill this gap, summarizing critical information for adult behavioral assessment. The Clinician's Handbook of Adult Behavioral Assessment provides a single source for understanding new developments in this field, cutting across strategies, techniques, and disorders. Assessment strategies are presented in context with the research behind those strategies, along with discussions of clinical utility, and how assessment and conceptualization fit in with treatment planning. The volume is organized in three sections, beginning with general issues, followed by evaluations of specific disorders and problems, and closing with special issues. To ensure cross chapter consistency in the coverage of disorders, these chapters are formatted to contain an introduction, assessment strategies, research basis, clinical utility, conceptualization and treatment planning, a case study, and summary. Special issue coverage includes computerized assessment, evaluating older adults, behavioral neuropsychology, ethical-legal issues, work-related issues, and value change in adults with acquired disabilities. Suitable for beginning and established clinicians in practice, this handbook will provide a ready reference toward effective

adult behavioral assessment.

**Fuzzy Logic and Soft Computing** Bernadette Bouchon-Meunier, Ronald R. Yager, Lotfi Asker Zadeh, 1995 Soft computing is a new, emerging discipline rooted in a group of technologies that aim to exploit the tolerance for imprecision and uncertainty in achieving solutions to complex problems. The principal components of soft computing are fuzzy logic, neurocomputing, genetic algorithms and probabilistic reasoning. This volume is a collection of up-to-date articles giving a snapshot of the current state of the field. It covers the whole expanse, from theoretical foundations to applications. The contributors are among the world leaders in the field.

**Complex Issues in Child Custody Evaluations** Philip M. Stahl, 1999-05-21 Over the past five to 10 years, there has been a significant increase in the use of child custody evaluations by the courts. At the same time, the issues have become more complex and difficult. In this book, the author provides a theoretical and practical understanding of many of the issues. A key component is the integration of disparate research findings into a comprehensive resource that will enable the evaluator and the court to understand these complex issues. A second component is to provide a thorough understanding of the fact that divorce brings with it a set of complex needs, and evaluators and the courts must develop a paradigm for weighing these needs in a comprehensive manner.

*The Lifted Root Number Conjecture and Iwasawa Theory* Jürgen Ritter, Alfred Weiss, 2002 This paper concerns the relation between the Lifted Root Number Conjecture, as introduced in [GRW2], and a new equivariant form of Iwasawa theory. A main conjecture of equivariant Iwasawa theory is formulated, and its equivalence to the Lifted Root Number Conjecture is shown subject to the validity of a semi-local version of the Root Number Conjecture, which itself is proved in the case of a tame extension of real abelian fields.

*Advances in Rings and Modules* Sergio R. López-Permouth, Jae Keol Park, S. Tariq Rizvi, Cosmin S. Roman, 2018-09-06 This volume, dedicated to Bruno J. Müller, a renowned algebraist, is a collection of papers that provide a snapshot of the diversity of themes and applications that interest algebraists today. The papers highlight the latest progress in ring and module research and present work done on the frontiers of the topics discussed. In addition, selected expository articles are included to give algebraists and other mathematicians, including graduate students, an accessible introduction to areas that may be outside their own expertise.
