Sustainable Shipping in a Changing Arctic Lawrence P. Hildebrand, Lawson W. Brigham, Tafsir M. Johansson, 2018-08-11 This volume brings together multiple perspectives on both the changing Arctic environment and the challenges and opportunities it presents for the shipping sector. It argues for the adoption of a forward-looking agenda that respects the fragile and changing Arctic frontier. With the accelerated interest in and potential for new maritime trade routes, commercial transportation and natural resource development, the pressures on the changing Arctic marine environment will only increase. The International Maritime Organization Polar Code is an important step toward Arctic stewardship. This new volume serves as an important guide to this rapidly developing agenda. Addressing a range of aspects, it offers a valuable resource for academics, practitioners, environmentalists and affected authorities in the shipping industry alike.

Our Environmental Handprints Jon R. Biemer, 2021-05-05 Readers should be inspired, informed, and ready to go. Booklist, Starred Review Offers 175 actions readers can take to create a more sustainable global environment. You care about the environment—the world you live in, and the world you are going to leave behind for future generations. Perhaps you already avoid wasting energy and buying more things than you need – reducing your Ecological Footprint. Yet there is a limit, given your family and circumstances. What can you do that will truly help heal our planet? Our Environmental Handprints is the first book to fully explore your “Handprint” – how you can create sustainability in your life and in the world. Your Handprint is limited only by your imagination. The good you do can be greater than your Footprint. It is time to put more energy into your Handprint! The smart beauty of the Handprint is that it can be self-perpetuating. Take planting a tree as an example. You put a seedling into the ground, water it, and then leave it alone. That tree will then grow itself and pull carbon dioxide from the air and create oxygen for us to breathe for as long as it lives. And, seeds from that tree create more trees. Here, Jon Biemer draws our attention to proven strategies across the spectrum. We make a difference with the choices we make about the clothing we buy, the investments we make, and even the food we choose to eat. Handprint Thinking applies to shelter (eco-remodeling and LEED buildings), motion (electric cars and living without a car), and earth-friendly energy. He provides 175 proven Handprint suggestions that will help readers align their interests, lifestyle, and motivations toward a more sustainable earth.
