Exploring and Optimizing Agricultural Landscapes Lothar Mueller, Viktor G. Sychev, Nikolai M. Dronin, Frank Eulenstein, 2021-06-14 The book informs about agricultural

landscapes, their features, functions and regulatory mechanisms. It characterizes agricultural production systems, trends of their development, and their impacts on the landscape. Agricultural landscapes are multifunctional systems, coupled with all nexus problems of the 21st century. This has led to serious discrepancies between agriculture and environment, and between urban and rural population. The mission, key topics and methods of research in order to understanding, monitoring and controlling processes in rural landscapes is being explained. Studies of international expert teams, many of them from Russia, demonstrate approaches towards both improving agricultural productivity and sustainability, and enhancing ecosystem services of agricultural landscapes. Scientists of different disciplines, decision makers, farmers and further informed people dealing with the evolvement of thriving rural landscapes are the primary audience of this book.

Mechanics Of Materials: A Friendly Approach Prashant

Kumar,2022-08-18 The knowledge of mechanics of materials is the

very foundation for advanced topics in mechanical, civil, aerospace, chemical, ceramic engineering and materials science. This comprehensive book presents materials with a three-dimensional approach rather than two-dimensional analysis adopted by existing books. It develops the required background thoroughly before basic elements such as stress and strain tensors are formulated. The presentation is richly filled with anecdotes, illustrations and solved examples. Special care has been taken to carry out algebra and the derivations in small digestible steps. This useful reference text largely meets the requirements of computer-aided engineering (CAE) softwares which are widely used in industrial-sector and research & development laboratories to design structural members.

ORGANIC AGRICULTURE IN UZBEKISTAN Food and Agriculture Organization of the United Nations, 2018-07-18 This book was prepared under the framework of TCP/UZB/3501: Institutional capacity building to develop organic agriculture and to promote good agriculture practices in Uzbekistan to provide guidance to the stakeholders. This book brings together the status of organic agriculture in Uzbekistan including, market, legal standards,

methods, experiences and useful methods and basic information that can be of immediate use for identifying problems and for formulating, executing and evaluating actions so as to benefit and improve organic production. The publication can also serve as a reference that will allow researchers, specialists and farmers to discover jointly, ways to adopt organic agriculture practices and solve the problems and the limitations created by traditional agriculture. This book is meant for researchers, agricultural specialists, extension personnel as well as farmers, and deals with the management and conservation of agricultural land. It is hoped that the Book will help to attain the ultimate objective of increasing quality of agricultural products and improving the productivity of the soils and water in a rapid, efficient and sustainable.
