The Musha Incident Michael Berry,2022-05-10 On October 27, 1930, members of six Taiwanese indigenous groups ambushed the Japanese attendees of an athletic competition at the Musha Elementary School, killing 134. The uprising came as a shock to Japanese colonial authorities, whose response was swift and brutal. Heavy artillery and battalions of troops assaulted the region, spraying a wide area with banned poison gas. The Seediq from Mhebu, who led the uprising, were brought to the brink of genocide. Over the ensuing decades, the Musha Incident became seen as a central moment in Taiwan's colonial history, and different political regimes and movements have seized on it for various purposes. Under the Japanese, it was used to attest to the "barbarity" of Taiwan's indigenous tribes; the Nationalist regime cited the uprising as proof of the Taiwanese peoples' heroism and solidarity with the Chinese in resisting the Japanese; and pro-independence groups in Taiwan have portrayed the Seediq people and their history as exemplars of Taiwan's "authentic" cultural traditions, which stand apart from that of mainland China. This book brings together leading scholars to provide new perspectives on one of the most traumatic episodes in Taiwan's modern history and its fraught legacies. Contributors from a variety of disciplines revisit the Musha Incident and its afterlife in history, literature, film, art, and popular culture. They unravel the complexities surrounding it by confronting a history of exploitation, contradictions, and misunderstandings. The book also features conversations with influential cultural figures in Taiwan who have attempted to tell the story of the uprising.

New Frontiers in Space Propulsion Takaaki Musha,2015 As we know, reaching the outer rim of the solar system in a relatively short period of time is impossible utilizing existing rocket technology. Radically ventured theories such as quantum vacuum propulsion must emerge if we have any desire to truly explore the far reaches of space. New concepts must be explored that may someday enable manned interplanetary and interstellar travel. With this in mind, it is imperative for scientists to study and create new forms of space trajectory to achieve this goal. New propulsion physics for such means may or may not be discovered in the future. In this book, the science behind ideal methods of space propulsion (such as warp drive and gravity-control) are examined to show connections between known facts, anomalies and visions concerning this study. This term is known as frontier physics; scientists presently use accepted physical paradigms to speculate and hypothesize forms of physics that will aid in future developments. In this case, that development is advanced methods of space propulsion. Throughout this book, eminent researches discuss an overview of new propulsion systems which cannot be achieved by the conventional propulsion systems. Some methods that surpass modern study which would aid in the development of advanced space propulsion includes zero-point energy, quantum electrodynamics, space-time curvature and faster-than-light warp drive travel. It is hoped that these topics will assist readers in their journey to understand progressive studies of space propulsion systems.

Legacy of Lightning John Eudy,2022-07-19 It's the Heian era, a time of peace, of Japanese cultural aristocracy, national identity, and pursuit of beauty through art and poetry. A long-forgotten race, the Hotaru-Raikō, as they have come to be known, part human and part firefly, dwells secretly alongside man. This noble clan once lived near the tree of life. Now they make their home in a thicket near the Fukui Castle moat in the Echizen Province, just north of the capital in Kyōto, Japan. Often mirroring man's culture, they are particularly fascinated by the budding "way of the warrior" philosophy. However, in this time of peace, a foul creature escapes the bottomless pit, and a traitor emerges among the clan. Seduced by a spider

yōkai seeking to release an army from the abyss, the traitor helps form the treacherous Tsuchigumo clan. With their help, the temptress is able to assassinate the Hotaru-Raikō lord and his faithful samurai. In the wake of this devastation, the daimyō's eighteen-year-old daughter is tasked by an angel to defeat the spider yōkai, destroy her traitorous clan, and raze the Abaddon gate to the ground. Can she rise through the grief to lead the remnants of her father's army as onna-musha? Who will stand by her side? What gift does the angel bring her? Will the Hotaru-Raikō find the gate to the abyss and complete their quest in time?

A History of Pain Michael Berry, 2011 This work probes the restaging, representation, and reimagining of historical violence and atrocity in contemporary Chinese fiction, film, and popular culture. It examines five historical moments including the Musha Incident (1930) and the February 28 Incident (1947).

Transforming Study Abroad Neriko Musha Doerr, 2018-12-17 Written for study abroad practitioners, this book introduces theoretical understandings of key study abroad terms including "the global/national," "culture," "native speaker," "immersion," and "host society." Building theories on these notions with perspectives from cultural anthropology, political science, educational studies, linguistics, and narrative studies, it suggests ways to incorporate them in study abroad practices. Through attention to daily activities via the concept of immersion, it reframes study abroad not as an encounter with cultural others but as an occasion to analyze constructions of "differences" in daily life, backgrounded by structural arrangements.

Identity Conflicts Esther Gottlieb, 2017-09-08 Social conflicts are ubiquitous and inherent in organized social life. This volume examines the origins and regulation of violent identity conflicts. It focuses on the regulation of conflict: the constraining, directing, and repression of violence through institutional rules and understandings. The core question the authors address is how violence is regulated and the social and political consequences of such regulation. The contributors provide a multidisciplinary multi-regional analysis of identity conflicts and their regulation. The chapters focus on the forging and suppression of religious and ethnic identities, problematic national identities, the recreation of identity in post-conflict peace-building efforts, and the forging of collective identities in the process of democratic state building. The instances of violent conflict treated here range across the globe from Central and South America, to Asia, to the Balkans, and to the Islamic world. One of the key findings is that conflicts involving religious, ethnic, or national identity are inherently more violence prone and require distinctive methods of regulation. Identity is a question both of power and of integrity. This means that both material and symbolic needs must be addressed in order to constrain or regulate these conflicts. Accordingly, some chapters draw on a political-economy approach that places primary emphasis on resources, organization, and interests, while others develop a cultural approach focusing on how identities are constructed, grievances defined, blame attributed, and redress articulated. This volume offers new ideas about the regulation of identity conflicts, at both the global and local level, that engage both tradition and modernization. It will be of interest to policymakers, political scientists, human rights activists, historians, and anthropologists.

Fairies, Ghosts, and Santa Claus Neriko Musha Doerr, 2022-11-11 Investigating the politics of seeing and its effects, this book draws on Slavoj Žižek's notion of fetish and Walter Benjamin's notion of the optical unconscious to offer newer concepts: "tinted glasses", through which we see the world; "unit-thinking", which renders the world as consisting of discrete units; and "coherants", which help fragmented experiences cohere into something intelligible. Examining experiences at a Japanese heritage language school, a study-abroad trip to Sierra Leone, as well as in college

classrooms, this book reveals the workings of unit-thinking and fetishism in diverse contexts and explores possibilities for social change.

The Augmented Reality of Pokémon Go Neriko Musha Doerr, Debra J. Occhi, 2019-02-08 This volume examines the complexities created by Pokémon GO—the smartphone augmented reality game—from an anthropological perspective. Through detailed text analyses, links to wider issues, and the phenomenology of playing, this collection provides nuanced studies of how Pokémon GO created a new way to inhabit the world.

Performative Linguistic Space Neriko Musha Doerr, Jennifer M. McGuire, 2023-09-18 This volume explores performative linguistic space, namely a space which ushers or hinders linguistic practices. Space is made productive as a result of individuals who bring linguistic politics from diverse spaces into new ones. By moving away from the notions of discrete units of language and linguistic communities associated with a specific space, this volume suggests a fluid productive aspect of space. It goes beyond the assumed space-linguistic community association through ethnographic accounts that mediate linguistic anthropology, cultural geography, sociolinguistics, and deaf studies.

The Romance of Crossing Borders Neriko Musha Doerr, Hannah Davis Taïeb, 2017-01-01 What draws people to study abroad or volunteer in far-off communities? Often the answer is romance – the romance of landscapes, people, languages, the very sense of border-crossing – and longing for liberation, attraction to the unknown, yearning to make a difference. This volume explores the complicated and often fraught desires to study and volunteer abroad. In doing so, the book sheds light on how affect is managed by educators and mobilized by students and volunteers themselves, and how these structures of feeling relate to broader social and economic forces.

Rethinking Language and Culture in Japanese Education Shinji Sato, Neriko Musha Doerr, 2014-04-01 How does language or culture come to be standardized to the degree that it is considered 'homogeneous'? How does teaching language relate to such standardization processes? How can teaching be mindful of the standardization processes that potentially involve power relations? Focusing on the case of Japanese, which is often viewed as homogenous in terms of language and culture, this volume explores these questions in a wide range of contexts: the notions of translation and modernity, the ideologies of the standardization of regional dialects in Japan, current practices in college Japanese-as-a- Foreign-Language classrooms in the United States, discourses in journals of Japanese language education, and classroom practices in nursery and primary schools in Japan. This volume's investigation of standardization processes of Japanese language and culture addresses the intersections of theoretical and

practical concerns of researchers and educators that are often overlooked.

Land, Credit and Crisis Philippe Guillaume,2016-09-17 Land, Credit and Crisis presents a new understanding of the financial culture of the Bible. Biblical Palestine was characterized by an over-abundance of arable land combined with a chronic lack of manpower and agricultural credit - circumstances which lead to much prophetic fulminating against merchants and the rich. The book reveals how the financial instruments and institutions of the time reflected a tough economic realism and argues that the image of the biblical prophet as a champion of social justice must be revised.
