Christopher Chant

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant, 2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Technology Transfer And U.S. Security Assistance David J Louscher, Michael D Salomone, 2019-09-05 The national security issues surrounding U.S. arms sales policies and practices have been the subjects of our research for the past ten years. In this study the authors were determined to conduct a more focussed analysis of emerging policy issues for security assistance; namely, the relationship between technology transfer and security assistance policies of the U.S. Government. This book assesses the development of indigenous arms production capabilities or recipients of U.S. security assistance. In particular we examine a seldom analyzed level of technology transfer: the transfer of less than state-of-the-art technologies and production capabilities to allies through routine security assistance decisions.

Arms, Transparency, and Security in South-East Asia Bates Gill, J. N. Mak, 1997 This report, jointly sponsored by SIPRI and the Maritime Institute of Malaysia (MIMA), draws together the work of eight experts on armaments and Asia-Pacific security affairs to present analysis and extensive data on arms- and defence-related transparency mechanisms in South-East Asia. It also includes a de facto arms trade register for South-East Asia covering the period 1975-96. The book will prove useful to security analysts and policy makers seeking analysis of and practical approaches to transparency and confidence building in South-East Asia.
