G. Haskell, Michael J Rycroft

**Pale Blue** Mike Jenne,2016-08-30 US astronauts race to disarm Soviet satellites armed with nuclear weapons in the concluding volume in a thrilling alt-history Cold War-era space trilogy from Mike Jenne. As the Project enters its final phase, Air Force Majors Carson and Ourecky are dispatched on an urgent mission to intercept and investigate a massive orbiting object suspected of harboring nuclear weapons. Emotionally exhausted, with his marriage teetering on the brink, Ourecky reluctantly accepts the assignment. In return for his sacrifice, he is promised an opportunity to go to MIT to pursue the PhD he has long desired. As they draw close to the mysterious satellite and prepare to destroy it, they are confronted with a dark secret that they must carry forever and are forced to contemplate their own mortality and the dire prospect of dying in space. Upon their return to Earth the majors are offered an opportunity almost too good to pass up—flying into orbit yet again, except under considerably different circumstances. Ourecky wrestles with his decision, knowing that choosing to fly will almost certainly result in the end of his marriage, while Carson is finally granted an opportunity to fly in Vietnam. Although he is finally allowed to fulfill his dream of flying in combat, Carson soon discovers that there are some fates worse than death. As the darkest secrets are revealed to astronauts Carson and Ourecky, can they save themselves? Pale Blue is the epic, high-flying conclusion to the Blue Gemini trilogy that will leave you breathless.

**The Jameson Satellite** Neil R. Jones,2011-01-10 The mammoths of the ancient world have been wonderfully preserved in the ice of Siberia. The cold, only a few miles out in space, will be far more intense than in the polar regions and its power of preserving the dead body would most probably be correspondingly increased. When the hero-scientist of this story knew he must die, he conceived a brilliant idea for the preservation of his body, the result of which even exceeded his expectations. What, how, and why are cleverly told here

**Our Mysterious Spaceship Moon: Is Our Nearest Neighbor a Huge Alien Spacecraft?** Don Wilson,1977 Is the moon a hollowed-out spaceship sent to orbit our Earth in the remote prehistoric past? Was it once inhabited by alien space travelers?When two leading Soviet scientists proposed this theory, shockwaves reverberated throughout the scientific world. Now, for the first time, a book makes available the revelations that are causing a revolution in our knowledge of the moon.Here you will find the entire Soviet artificial moon theory, in its entirety, with unpublicized transcripts from U.S. moon missions and authoritative testimony from leading astronomers from around the globe. Our Mysterious Spaceship Moon is a compelling, enthralling, and totally convincing work that opens our minds to what is quite possibly the greatest discovery mankind has ever made. Since human life began on Earth, men have stood in awe of the moon and its magic. Now, for the first time, we may be learning the truth about our satellite - a truth beyond our wildest imaginings.

Real Aliens, Space Beings, and Creatures from Other Worlds Brad Steiger,Sherry Hansen Steiger,2011-05-01 Shocking true stories of those who walk among us . . . Just who has visited us in the past? Who might be coming next? And who walks among us today? Real Aliens, Space Beings, and Creatures from Other Worlds investigates the theories, the mysteries, and the facts surrounding alien involvement in the lives of Earthlings. Packed with

thought-provoking stories and shocking revelations of more than 300 otherworldly incidents, including aliens living among us, spacecraft landings, interstellar cooperation, alien encounters, government conspiracies, hybrid children, mutilations, missing time experiences, secret alien facilities, and the influence of extraterrestrials on human events throughout history. Each astonishing report is detailed with thorough research of the historical record, news articles, and disquieting testimonials.

**The New Satellite** John Russell Fearn, Vargo Statten, 2015-03-31 The mysterious disintegration of the planet Mercury presaged mutational changes in the solar system. Next, the Moon followed Mercury into oblivion, bombarding Earth with giant meteors and causing more earthquakes. Then a giant metal globe that had apparently been buried inside the Moon took up an orbit of the Earth. The new satellite is an alien spaceship carrying the survivors of a super scientific race forced to abandon their own world to emigrate to our solar system. The aliens seeded the then primeval Earth with life cultures in their own image, and then placed themselves in suspended animation whilst evolution took place. They have awakened to assist humanity to avert the mutational danger now facing the remaining planets...

Satellite Doug Millard, 2016-11-15 Right now, above our heads—nearly imperceptible to us but hugely important to how we live—are thousands of man-made objects that we have sent into space. Ubiquitous but mysterious, satellites are the technological infrastructure of our globally connected world, helping us do everything from orient ourselves on a map to watch our favorite television shows. Yet we rarely ever think about them. In this book, Doug Millard pays overdue tribute to the stoic existence of the satellite, tracing its simultaneous pathways through the cold silence of space and the noisy turbulence of the past century. How satellites ever came to be is, in itself, a remarkable story. Telling an astonishing history of engineering experimentation and ingenuity, Millard shows how the Cold War space race made the earliest satellites—ones like Sputnik, Telstar, and Early Bird—household names. He describes how they evolved into cultural signifiers that represented not only our scientific capabilities but our capacity for imagination, our ability to broaden the scope of our vision to the farthest reaches. From there he follows the proliferation of satellites in the second half of the twentieth century, examining their many different forms, how they evolved, all the things they do, what they have enabled, and how they have influenced our popular culture. Ultimately, Millard asks what we can still expect, what sort of space age the satellite has initiated that is yet to be fully realized. Published in association with the Science Museum, London, this beautifully illustrated book will appeal to any fan of space exploration and technology.

Tom Swift on the Phantom Satellite Victor Appleton (II.), 1956 Consternation and panic grip the world as a strange new moon shoots earthward. Millions of people are relieved when the weird, glowing runaway moon in the sky finally goes into orbit 50,000 miles from earth. Tom Swift Jr., who has developed a machine that will produce artificial earth-type gravity in the airless void of space, makes plans to explore this new satellite. In the gigantic, atomic spaceship Titan, Tom and his associates land on the mysterious moonlet and claim the bleak but fabulously rich possession for the United States. While exploring the satellite to pinpoint the best location for

setting up the young inventor's atmosphere-making machine, Swift expedition scouts discover a spaceship belonging to a hostile nation. Claiming first right to the moon because of prior landing, the foreign scientists try every means to annihilate Tom and his group. How Tom succeeds in proving the Brungarian claim invalid, and saves his associates from being set adrift in outer space, will keep the reader spellbound to the very last page of this spine-tingling adventure. - Jacket.

**Mystery of Satellite 7** Charles Ira Coombs,1958 Three teenagers race against time to learn why their scientist-father's test satellites explode 42 miles above the earth.

**Satellite** Nick Lake,2019-04-23 A teenage boy born in space makes his first trip to Earth in this engrossing sci-fi adventure for fans of The Martian from award-winning author Nick Lake. He's going to a place he's never been before: home. Moon 2 is a space station that orbits approximately 250 miles above Earth. It travels 17,500 miles an hour, making one full orbit every ninety minutes. It's also the only home that fifteen-year-old Leo and two other teens have ever known. Born and raised on Moon 2, Leo and the twins, Orion and Libra, are finally old enough and strong enough to endure the dangerous trip to Earth. They've been "parented" by teams of astronauts since birth and have run countless drills to ready themselves for every conceivable difficulty they might face on the flight. But has anything really prepared them for life on terra firma? Because while the planet may be home to billions of people, living there is more treacherous than Leo and his friends could ever have imagined, and their very survival will mean defying impossible odds.

*International Space Station* G. Haskell,Michael J Rycroft,2012-12-06 G. Haskell, Symposium Programme Committee Chair, Vice President, Administration and Programme Development, International Space University e-mail: Haskell@isu.isunet.edu M. Rycroft, Faculty Member, International Space University e-mail: Rycroft@isu.isunet.edu The theme of the fourth annual symposium arranged by the International Space University (ISU) was International Space Station: The Next Space Marketplace. The Symposium covered this topic from the unique- interdisciplinary, international and intercultural - perspectives of ISU. It focussed on significant issues related to policy, innovative management, commerce, regulation, education and outreach rather than concentrating on engineering and scientific issues. Although admirable progress has already been made in defining the utilisation of the International Space Station (ISS) in its early operational phases, what does the future hold? What important new applications will arise? What commercial opportunities may emerge? And how will the political, legal and financial hurdles be overcome, not to mention the technical challenges? The aim of the Symposium was to discuss such questions and draw out new ways of using the Space Station in the future. Among the 120 attendees were members of the fourth Master of Space Studies class, young professionals and postgraduate students who are developing the Symposium's theme in their Team Project. Their comprehensive overview of the subject is presented as an Annex here. Their final report on the Team Project will be completed at the end of July 1999, and published separately.

Space Forces Fred Scharmen,2021-11-02 The radical history of space exploration from the Russian Cosmists to Elon Musk Many societies have imagined going to live in space. What they want to do once they get up there - whether

conquering the unknown, establishing space colonies, privatising the moon's resources - reveals more than expected. In this fascinating radical history of space exploration, Fred Scharmen shows that often science and fiction have combined in the imagined dreams of life in outer space, but these visions have real implications for life back on earth. For the Russian Cosmists of the 1890s space was a place to pursue human perfection away from the Earth. For others, such as Wernher Von Braun, it was an engineering task that combined, in the Space Race, the Cold War, and during World War II, with destructive geopolitics. Arthur C. Clark in his speculative books offered an alternative vision of wonder that is indifferent to human interaction. Meanwhile NASA planned and managed the space station like an earthbound corporation. Today, the market has arrived into outer space and exploration is the plaything of superrich technology billionaires, who plan to privatise the mineral wealth for themselves. Are other worlds really possible? Bringing these figures and ideas together reveals a completely different story of our relationship with outer space, as well as the dangers of our current direction of extractive capitalism and colonisation.

**Satellite Spies** Sandra Hochman, Sybil Wong, 1976

**Whiskey Kilo One Is Down** Dietmar Arthur Wehr, 2020-08-21 An alien satellite has been orbiting Earth since at least the 1950s. The U.S. Space Force wants to capture it and bring it back for analysis. China will do anything to stop them, even if it means risking nuclear war. This 42,000 word action-packed, technothriller set in the year 2022, is fiction. But it could become tomorrow's headlines. Historical Fact: The May 14th, 1954 edition of the San Francisco Examiner revealed to the public the existence of a mysterious satellite of unknown origin in a highly unusual polar orbit, later nicknamed the Black Knight. British astronomers estimated its weight at over 9 tons! Space Force Major Curt Branson's X-37C spaceplane has been damaged by a Chinese anti-satellite weapon. His oxygen is running out fast, and he has only two choices, crash land on the Arctic icecap with a slim chance of survival or make an emergency landing in Russia, against Presidential orders. What would you do?

**Fatal Orbit** Tom Grace, 2017-08-21 Grace's prose recalls Ian Fleming at his most lean, and although the focus is on the ticking time bomb in orbit, he throws in a wealth of technical details and gadgetry to satisfy techno-thriller aficionados. This is a complex story, but Grace keeps the plot clean and streamlined, making this a brisk, enjoyable read. —Publishers Weekly You won't put this one down once you start it. Tom Grace is a masterful plotter. He draws you into his net and doesn't release you until the final sentence.—Clive Cussler Tom Grace's [Fatal Orbit] had me spellbound. It's the first genuine page-turner I couldn't put down in years. His Nolan Kilkenny is one of the most compelling new heroes of the techno-thriller genre you'll ever meet.—The Detroit Free Press Nolan Kilkenny has done it again. [Fatal Orbit] is 21st Century technological suspense... be prepared to be aghast at big business's potential for evil.—Jonathan Swift, PBS Nolan Kilkenny is about to propose to his NASA astronaut girlfriend Kelsey when a mysterious satellite blackout forces Kelsey to board the space shuttle Liberty to investigate. Kilkenny soon realizes that his would-be fiancée is in grave danger—targeted miles above Earth by a weaponized spacecraft called Zeus. A ruthlessly determined Nolan must track down the tycoon creator of Zeus to

prevent silent terror from being launched from the sky—and he'll have to confront a billion-dollar conspiracy, an army of ruthless thugs, and apocalyptic weapons technology that defies comprehension.

*Satellite* David Michael Brown, 2019-08-09 What has the Soviet Satellite been doing to us? A fired weatherman is asked to debug an old abandoned satellite left over from the collapse of the Soviet Union. Considered a dead-end project, Aber Trendel is thrown on the project with a team of rejects from the University of Ohio. When they discover the satellite's metaphysical properties and a mysterious signal that showers down on humans below, they find themselves in a race against other world governments who try to hack into it for control. This well-researched novel pieces together information that asks: Does this technology already exist?

*The Ancient Alien Theory: Part Nine* C.R. Hale, 2018-07-25 The Ancient Alien Theory: Part Nine and [ancientalienpedia.com](http://ancientalienpedia.com) is both a written and online resource. The written guide serves as an opportunity to log out, shut down, and unplug from the online world.
