CRC World Dictionary of Medicinal and Poisonous Plants Umberto Quattrocchi,2016-04-19 Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold. —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.

The Individual and the Authority Figure in Egyptian Prose Literature Yona Sheffer,2018-05-15 The Individual and the Authority Figure in Egyptian Prose Literature explores and analyses political conflicts between individuals and authority figures, as those conflicts are depicted in thirteen Egyptian novels written from 1957 to the last years of Mubarak's presidency. The book discusses the various reasons that lead an individual or a group of people from all strata of society (common people, intellectuals, and public figures) to confront policemen, senior security officials, and even the heads of the state. It further examines how the conflicts develop and what their outcomes are in the short term as well as in the long term, for both the individuals and the authority figures. In this context, the volume also examines the possibility of standing against an oppressive regime and even overcoming it. This text argues that while the authority figure initially subdues individuals who confront them, their victory is short term. In the long term, their cruelties bring about sown deaths, either by the individuals themselves or by their relatives. Furthermore, large assemblies of people can confront the regime with success. These discoveries, along with other findings presented in the book, remain relevant to the reality in the Middle East and the events leading to the Arab Spring.

On Sunday, November 26, 2017, the University of Tennessee attempted to hire a football coach. It didn't happen. In Decade of Dysfunction, Nagi examines what caused the revolt that squashed the hiring of Greg Schiano. It was an uprising that not only brought forth a national backlash, but also led to the return of a Tennessee legend.

Research Skill Development in Social Sciences, Communication and Management Dr. B.S. Nagi,Dr. (Prof.) A.M. Khan,2021-07-03 In a series of 100 mini workshops on proposal development during one month training of senior professionals on research methodology, orientation and refresher training of faculty from universities and colleges, and analysis of data of more than 5000 Ph.D scholars and national level projects by the authors of this book, several pitfalls emerged in the selection of research area and topic/title of a study, objectives, hypothesis formulation, research design, development of research tools, and analysis of data. The errors committed at planning stage of research continue throughout the research work and get its serious reflection in the quality of research. During the training, the presentation of Research Proposals developed as part of individual and group assignments reinforced the faith of authors that the skills required for quality research are missing in the system. And it cannot be fully overcome through the tutorial methodology. The knowledge about the research process is crucial but not sufficient to enrich the research skills for quality research. It was realized that most of the books do not explain how to decide the research area and title of a study? How to set the objectives and how to establish relationship between two? These two features not independent constructs and should be mirror of each other. How to ensure the quality in the review of literature? How should it be carried out? How to find research gaps and how to set research questions to be answered in the research studies? How to formulate correct hypothesis, decide the research design, and develop research tools? How and from where to pick up variables for developing the research tools? How much crystallization of each objective helps researchers to get items for developing the tools such as questionnaire, interview schedule, check list for observation, and measurement scale for attitude, perception, belief, etc. about the phenomenon under exploration. What type of statistical tools are used for data analysis? In-depth understanding of these sub-steps under

each stage of research looks to be bigger area of confusion for researchers. The book on Research Skill Development in Social Sciences, Communication and Management has been written in the self-guide form to answer the issues listed above

Japan International Monetary Fund. Asia and Pacific Dept, 2020-02-10 This 2019 Article IV Consultation with Japan highlights that the rapid aging and shrinking of Japan's population has become central to macroeconomic policies and outcomes. The consultation centered on the macroeconomic effects of Japan's demographics. Mutually reinforcing policies are needed to lift current and expected inflation, stabilize public debt, and raise potential growth. Underlying growth is expected to remain resilient but will be increasingly challenged by slowing external demand and intensifying demographic headwinds. Growth in domestic demand is being eroded by the weaker external environment. Frontloading of private consumption ahead of the October 2019 consumption tax rate increase appears to have been smaller than in 2014.

I am Yusuf and This Is My Brother Amir Nizar Zuabi, 2010-01-15 I am Yusuf and This Is My Brother is a powerful, poetic exploration of history, memory and different forms of love. 'Before it happened I didn't know those people existed. Now I'm not certain that we do...' January 1948. Palestine. The British Mandate is ending. The UN is voting on who will control what part of the land. Ali is in love with Nada - but he is in despair. Her father won't let them marry because his brother Yusuf is 'odd' with his own eccentric, child-like point of view. Rufus, a soldier on the occupying British forces, longs for the cold fogs of Sheffield. War begins and, as the villagers are scattered and become refugees, the secret that's kept Ali and Nada apart is revealed. Although set within a politically charged context, the play is full of haunting, dreamlike poetry rather than didactic polemicism. Instead of simply exploring the political debate, Zuabi concentrates more on the richness of language and culture. With a keen awareness of the vulnerability and fragile ephemerality of life, I am Yusuf and This Is My Brother explores humanity and love in the context of loss and death.

Just Below the Line Korydon H. Smith, 2010-05 With America on the brink of the largest number of older adults and persons with disabilities in the country's history, the deceleration in housing production during the first decade of the twenty-first century, and a continued reliance on conventional housing policies and practices, a perfect storm has emerged in the housing industry. The lack of fit between the existing housing stock and the needs of the U.S. population is growing pronounced. Just as housing needed to be retooled at the end of WWII, the American housing industry is in dire need of change today. The South—with its high rates of poverty, older residents, residents with disabilities, extensive rural areas, and out-of-date housing policies and practices—serves as a “canary in the coal mine” for the impending, nationwide housing crisis. Just Below the Line discusses how reworking the policies and practices of the housing industry in the South can serve as a model for the rest of the nation in meeting the physical and social needs of persons with disabilities and aging boomers. Policy makers, designers, builders, realtors, advocates, and housing consumers will be able to use this book to promote the production of equitable housing nationwide. Published in collaboration with the Fay Jones School of Architecture.

Through her continued presence, a new walk of life opens itself to Keiichi. MANNER OF THE SUND OG Ted Cabana, 2013-11 Nearing the end of the 21st century, the world has been devastated by catastrophic climate change, war, disease and overpopulation. Now the most sought after of all continents to live, Antarctica, has developed into a vastly inhabited and civilized oasis with its own cities, communities, cultures and native population known as the Annortics. Still under the control of the United Nations Consultative Parties, this utopian society established in the exclusive city of Ellsworth is governed by an international coalition of scientists known as ICS, more simply referred to as ICE. The governing laws have been set in accordance with the Antarctic treaty, which has continued to ban any exploitation of its prized resources for over a century. But the tyrannical global corporation known as GRANT, has begun to manipulate, extort and even assassinate key party members in order to take control of the most magnificent frontier on the planet for their own self-indulgence. With the recent discovery of an ancient and highly elusive Nazi military installment, members of GRANT's abducted science team have learned to develop and exceed the technology that would have allowed the Third Reich to conquer the world during WWII. Together with their covert elite force known as the Lynx, they will use this technology of an unknown origin to once again continue the pursuit of absolute power. In its capital city of Ellsworth, young physics prodigy Bane Elrick is drawn into conflict between Antarctica's own governing body, the International Coalition of Science and GRANT, a powerful global organization that has seized control of the world's economy, and now desires to take control of the planet's last frontier...Antarctica. After inadvertently learning of its profound history and dark secrets, Bane is forced to make decisions that will impact his future, while struggling to save his loved ones from losing the only home they have ever known to GRANT. Bane is guided by his mentor, Dr. Pierce Gödel, president of the Coalition and a renowned geneticist who lives confined to his self-made endodermic suit, which allows his paralyzed body to continue functioning as normal while preparing his revenge on GRANT for their failed assassination attempt which claimed the lives of his beloved wife and daughters. Under his preceptor, world renowned physicist, Professor Sergei Isen, Bane learns of an intangible and extremely valuable isotope that can be used dynamically for inter-stellar travel, anti-gravity propulsion, or as a powerful weapon against all civilization. Throughout his adventure, Bane learns the uglier side of politics, science and life from his friends, mentors and his father, Marlin Elrick, an architectural engineer who tries to guide him toward a more prosperous future. The ghostly memoirs of his deceased mother, a paleo-geologist, lead him as he recalls her cryptic cyphers from his childhood to unravel the secrets of Antarctica's history, and his own destiny. Markus Blackmore, a former UN Special Forces agent and commander of the Antarctic Regional Guard, shows Bane the darker side of humanity and how to fight for what he believes in. His nomadic neighbor, Donnar McKinley, a wise but eccentric old man, advises him through troubled times with what at first seems to be equivocal nonsense. All the while being driven by his passion for science, his native land and his love for an esteemed politician's daughter. Bane relates his tale to a new denizen of Ellsworth, sharing his accounts of early life and adventures as a scientist, where he was born and raised and his rise to leadership of the world's most intriguing continent, and sovereign nation of its own...Antarctica.
