

Nakajima B5n

Jack Holroyd

Nakajima B5N 'Kate' and B6N 'Jill' Units Mark Chambers, Tony Holmes, 2017-06-29 Entering service during the Sino-Japanese War, the Nakajima B5N (code-named 'Kate') excelled and went on to achieve surprising and dramatic successes in the Japanese attack on Pearl Harbor. It also contributed to the sinking of the US aircraft carriers USS Lexington at the Battle of the Coral Sea, USS Yorktown at the Battle of Midway, and USS Hornet at the Battle of the Santa Cruz Islands. Its replacement, the Nakajima B6N 'Jill', while a marked improvement over its illustrious predecessor, was never able to achieve its full potential in combat due to advances in Allied aircraft, finding itself relegated to the dreaded Kamikaze strikes in the latter part of the war. Using previously unpublished photographs as well as colour illustrations, this book will cover the history of the 'Kate' and 'Jill' torpedo/attack bombers, including their design and development, as well as the combat highs and lows of the Imperial Japanese Navy's premier torpedo-bombers.

Nakajima B5n Kate Dariusz Paduch, 2022-01-31 When war broke out in the Pacific, the Japanese naval air force had the world's most advanced Nakajima B5N2 torpedo-bomber aircraft, which was far superior to the American Douglas TBD-1 Devastator and a generation ahead of the British Fairey Swordfish biplanes. The Japanese aircraft were faster, more maneuverable, and could drop torpedoes from a higher altitude. After a successful debut over Pearl Harbor, these machines were involved in every major naval battle until

1944, making a permanent mark on aviation history. It was not until 1943/1944 that this superb aircraft began to be replaced by the modern Nakajima B6N Tenzan. The road to the creation of B5N was not easy and was fraught with many failures.

Nakajima B5N Kate Anirudh Rao,2020-10-31

Nakajima B6n Tenzan Anirudh Rao,2021-09-30 The navy carrier torpedo bomber Tenzan or Nakajima B6N, was codenamed Jill by the Allies. It was the replacement of the famous Nakajima B5N (Kate) torpedo bomber, and although more B6N's were built than B5N's, the plane never achieved the spectacular success of its predecessor. It entered service in the second half of 1943 but wouldn't be used on a large scale until June 1944 during the air and sea battles in the Philippine Sea for the Mariana Islands. Later it would be used in Taiwan, the Philippines, Iwo Jima, Okinawa, and for Kamikaze attacks. The crushing air superiority of the Allies and the loss of nearly all the Japanese aircraft carriers and their trained pilots led to many Tenzans being lost, while never having had a chance to prove their worth. In spite of the fact that the Tenzan never achieved any real successes, it was undoubtedly one of the best carrier based torpedo bombers of WWII.

Warplanes of World War II Up Close Robert

Jackson,2015-12-15 Although airplanes were used to some degree in conflicts prior to 1939, World War II was when military aviation truly became a vital component of war plans. Many sophisticated warplanes were developed, increasing the power and

accuracy of aerial bombing and tactical air support. This resource provides an in-depth look from every angle at aircraft such as the P-51 Mustang and Boeing B-29 Superfortress, demonstrating how these planes contributed to how each nation waged war during World War II.

Pearl Harbor Spencer C. Tucker, 2015-10-13 This book provides students with an understanding of the motives behind the Japanese attack on Pearl Harbor and the consequences of this action on Japan, on the United States, and on the outcome of World War II. This essential reference guide is devoted to one of the most important military events in American history: the Pearl Harbor attack of December 7, 1941, the day of infamy. Distinguished military historian Spencer C. Tucker is the editor of this thorough study of the Japanese attack that contains reference entries as well as primary documents and oral histories describing the circumstances that led up to the attack, the event itself, and its immediate aftermath and consequences, thereby providing readers with the necessary context to understand all aspects of the attack on Pearl Harbor. Readers will understand why Japanese leaders decided to go to war with the United States, what they expected to accomplish in attacking Pearl Harbor, why this key American base was not better defended, and what the aftereffects of the attack were for the outcome of the war. Biographies on major players in the crisis such as Franklin Roosevelt, Chester Nimitz, Isoroku Yamamoto, and Hideki Tojo will provide insight into the individuals who played key roles in the events before, during, and after

December 7, 1941.

Pearl Daniel Allen Butler, 2020-10-23

"Simultaneously sweeping and intimate . . . an eminently readable and engrossing account of the actions that pulled America into the Second World War." –Parks Stephenson, producer, *The Fight for Owens Pearl*: December 7, 1941 is the story of how America and Japan, two nations with seemingly little over which to quarrel, let peace slip away, so that on that "day which will live in infamy," more than 350 dive bombers, high-level bombers, torpedo planes, and fighters of the Imperial Japanese Navy did their best to cripple the United States Navy's Pacific Fleet, killing 2,403 American servicemen and civilians, and wounding another 1,178. It's a story of emperors and presidents, diplomats and politicians, admirals and generals—and it's also the tale of ordinary sailors, soldiers, and airmen, all of whom were overtaken by a rush of events that ultimately overwhelmed them. *Pearl* shows the real reasons why America's political and military leaders underestimated Japan's threat against America's security, and why their Japanese counterparts ultimately felt compelled to launch the Pearl Harbor attack. *Pearl* offers more than superficial answers, showing how both sides blundered their way through arrogance, over-confidence, racism, bigotry, and old-fashioned human error to arrive at the moment when the Japanese were convinced that there was no alternative to war. Once the battle is joined, *Pearl* then takes the reader into the heart of the attack, where the fighting men of both nations showed that neither side had a

monopoly on heroism, courage, cowardice, or luck, as they fought to protect their nations. "An engrossing read on a well-tread but important subject. Pearl will interest readers new to this history and satiate military historians." –Air & Space Power Journal

Torpedo Bombers, 1900–1950 Jean-Denis

Lepage, 2020-01-27 The torpedo-bomber was a very short-lived weapon system, operational for scarcely half a century from just prior WWI to the 1960s. Yet during its brief existence it transformed naval warfare, extending the ship-killing range of ships and coastal defences to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces. The torpedo-bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the Bismarck and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history and the aircraft themselves, including such well-loved types as the Swordfish, Beaufighter and Avenger. Over 300 aircraft are beautifully illustrated.

The Aircraft Carrier Hiryu Stefan

Draminski, 2022-07-07 A uniquely detailed study of a Japanese aircraft carrier that took part in the attack on Pearl Harbor, before being sunk at Midway. Superbly illustrated with line drawings, full-colour artwork of the ship through its career, internal reconstructions of deck layouts, and 3D illustrations of every detail of the ship from its rigging to its aircraft to its anchors, this book reconstructs and dissects one of the most prominent carriers of the early Pacific War. Built in the late 1930s, Hiryu took part in the attack on Pearl Harbor and most of the operations of Japan's triumphant first months of the war, before being sunk at Midway. Drawing on Stefan Draminski's new research and making the best use yet of his acclaimed 3D illustration techniques, this is the most comprehensive examination of Hiryu ever published. It includes a complete set of detailed line drawings with fully descriptive keys and full-color 3D artwork, supported by technical details, photographs, and a concise history of the ship's construction and service.

Military Aircraft, 1919-1945 Justin D.

Murphy, Matthew A. McNiece, 2008-12-08 An in-depth history of the time when airpower became the great equalizer, changing military strategy forever and bringing once-safe targets in reach. *Military Aircraft, 1919-1945: An Illustrated History of Their Impact* covers a crucial era in modern warfare technology. Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II, it provides an expert summing-up of the decades when

the use of aircraft in battle came of age. In chapters covering both the history of air power and specific types of aircraft (fighters, bombers, reconnaissance and auxiliary planes), *Military Aircraft, 1919–1945* introduces key theorists and designers, describes important changes in technology and production, and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay. Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea. They will also see how the expansion of war to the skies brought economic opportunity to some home fronts, and looming terror and devastation to others.

The Axis Air Forces Frank Joseph, 2011-11-29 This comprehensive volume tells the rarely recounted stories of the numerous foreign air forces that supported the German Luftwaffe as part of the Axis' quest to dominate the European and Pacific theaters—a highly compelling and often overlooked chapter of World War II history. *The Axis Air Forces: Flying in Support of the German Luftwaffe* presents an untold history of that global conflict's little-known combatants, who nonetheless contributed significantly to the war's outcome. While most other books only attempt to address this subject in passing, author Frank Joseph provides not only an extremely comprehensive account of the unsung heroes of the Axis fliers, but also describes the efforts of Axis air forces such as those of the Iraqi, Manchurian, Thai or Chinese—specific groups of wartime aviators that have never been discussed

before at length. This book examines the distinct but allied Axis air forces of Western Europe, Eastern Europe, the Middle East, and Asia. An extensive introduction provides coverage of Luftwaffe volunteers from Greece, Lithuania, Holland, Denmark, Norway and even the United States. Detailed descriptions of the personnel themselves and the aircraft they operated are portrayed against the broader scope of combat missions, field operations, and military campaigns, supplying invaluable historical perspective on the importance of their sorties.

The Setting of the Rising Sun Terry C. Treadwell, 2010-12-15 The first complete history of Japanese military aviation from its beginnings until 1945.

U.S. Aircraft Carriers 1939–45 Ingo Bauernfeind, 2021-08-04 A detailed and fully illustrated account of the development of American aircraft carriers up to and during World War II. This extensively illustrated volume tells the dramatic yet successful story of U.S. aircraft carriers in World War II by class, ranging from early pre-war designs to escort carriers built from destroyer hulls, to the gigantic fleet carriers serving as the predecessors of modern-day super carriers. Besides covering the famous great carrier battles in the Pacific, this book also tells of the equally important actions of U.S. flat tops hunting and destroying German U-boats in the Atlantic, making an enormous contribution to the elimination of the U-boat dangers and the safe arrival of transatlantic supplies, so desperately needed for the launch of D-Day. Including profiles

and explanatory text boxes, the concise text gives a clear overview of each ship's career, its fate and its significance in American naval history. Moreover, the reader learns about the technical evolution of U.S. carriers throughout the war, and the various aircraft launched from these magnificent vessels to engage their Japanese or German foes. This volume provides an overview of preserved World War II flat tops serving as floating museums for future generations as well as a dive to the sunken U.S.S. Saratoga at Bikini Atoll. Praise for U.S. Aircraft Carriers 1939–45 “Bauernfeind brings to the reader a fitting conclusion to a superb historical portrait of these capital warships that carried naval aviation to victory in World War II. This is an exemplary work and is recommended as an introductory reference for readers not already steeped in World War II ship history.” –Air Power History “The coverage of the CVEs and CVLs, coupled with the book's first-rate graphics, profuse and precisely captioned photographs, well-written text, and reasonable price make it a very good choice for readers looking for an overview of U.S. carriers in World War II.” –Naval Historical Foundation

The Second World War Illustrated Jack Holroyd, 2022-01-31 A pictorial history of the third year of World War II, featuring archive and color photographs. This third volume sees Hitler experiencing problems reminiscent of a previous invader of Russia, Napoleon Bonaparte: extreme winter conditions that first drenched then froze the vast Nazi war machine, immobilizing tanks, guns, support vehicles, and grounding the

Luftwaffe. Unlike Napoleon, Hitler failed to capture Moscow. In North Africa, the British were sent reeling back towards Egypt when Rommel launched an attack at the end of January. Much to the amazement of all and the disappointment of Churchill—the Axis troops took Tobruk in a single day. Churchill dismissed the commander and appointed Montgomery, who made a stand at El Alamein. Great Britain's stand-alone position ended abruptly on when Tojo launched a surprise attack on Pearl Harbor. Both Hitler and Mussolini declared war on the United States and the war became global. With the attack on Pearl Harbor the Japanese flooded through the South Pacific, the Philippines, Dutch East Indies, Malaya, Burma all fell to the Japanese. Once more Great Britain was humiliated when Singapore surrendered and thousands of Allied troops went into captivity. An attempt by the Japanese to deliver a knock-out blow to the Americans by an attack on Midway failed catastrophically and the Americans scored a momentous victory in the Pacific. Air Marshal Sir Arthur Harris became leader of the RAF and the thousand bomber raids and carpet bombing of German cities began. The third year of the war ended with the disastrous Dieppe Raid, carried out by Canadians, in August 1942. Praise for The Second World War Illustrated: The Third Year "Packed with photographs of machines, battles, weapons, and soldiers. . . . The book is nicely split into separate chapters with each concentrating on a specific event or operation that was being carried out during 1942, so you have the fight for North Africa, the war in the East, Pearl Harbor, Burma,

the Bomber Raids over Germany, War in the Pacific and the Commando Raid on St Nazaire etc. . . . Having read the previous book of the previous year I would say it was an equal and would happily recommend it to others, especially if you're a younger learner or new to the subject." –UK Historian

The Nation's Hangar F. Robert van der Linden, 2011-11-01 The Nation's Hangar: Aircraft Treasures of the Smithsonian offers a fascinating textual and visual history of civilian, military, and commercial aviation from the earliest balloon flights to today's most advanced aircraft. The Nation's Hangar charts the awe-inspiring history of flight around the world. F. Robert Van Der Linden, a Smithsonian curator and leading expert on aviation history, explains the fascinating stories behind aviation's great technological advances and provides historic and social context that highlights the many ways in which these innovations have changed the course of human history. The Nation's Hangar is also a visual delight. The Smithsonian aircraft collection has never looked so compelling and sleek. The Nation's Hangar is a must-have for that fly boy or fly girl in your flight pattern.

Truk 1944–45 Mark Lardas, 2021-12-23 A fully illustrated history of how the US Navy destroyed Truk, the greatest Japanese naval and air base in the Pacific, with Operation Hailstone, and how B-29 units and the carriers of the British Pacific Fleet kept the base suppressed until VJ-Day. In early 1944, the island base of Truk was a Japanese Pearl Harbor; a powerful naval and air base that

needed to be neutralized before the Allies could fight their way any further towards Tokyo. But Truk was also the most heavily defended naval base outside the Japanese Home Islands and an Allied invasion would be costly. Long-range bombing against Truk intact would be a massacre so a plan was conceived to neutralize it through a series of massive naval raids led by the growing US carrier fleet. Operation Hailstone was one of the most famous operations ever undertaken by American carriers in the Pacific. This book examines the rise and fall of Truk as a Japanese bastion and explains how in two huge raids, American carrier-based aircraft reduced it to irrelevance. Also covered is the little-known story of how the USAAF used the ravaged base as a live-fire training ground for its new B-29s -- whose bombing raids ensured Truk could not be reactivated by the Japanese. The pressure on Truk was kept up right through 1945 when it was also used as a target for the 509th Composite Squadron to practise dropping atomic bombs and by the British Pacific Fleet to hone its pilots' combat skills prior to the invasion of Japan.

Submerged Cultural Resources Assessment of Micronesia Toni Carrell, 1991

Kamikaze Peter C. Smith, 2014-11-28 In this brand new publication from eminent historian Peter C. Smith, we are regaled with the engaging and often incredibly disturbing history of the Kamikaze tradition in Japanese culture. Tracing its history right back to the original Divine Wind (major natural typhoons) that saved Japan from invaders in ancient history, Smith explores the subsequent

resurrection of the cult of the warrior in the late nineteenth century. He then follows this tradition through into the Second World War, describing the many Kamikaze suicide attacks carried out by the Emperor's pilots against Allied naval vessels in the closing stages of the Pacific campaign. These pilots were at the mercy of an overriding cultural tradition that demanded death over defeat, capture or perceived shame. Despite often being under-trained and ill-prepared psychologically for the sacrifices they were about to make, they were nonetheless expected to make them. The dedication of sacrifice for the Emperor and the Nation is explored by dissecting the traces left behind by these pilots. Smith provides a detailed look at the heartbreak of the pilot's families and the men themselves, the notes they left and the effects on those who did not share their philosophy. The views of individuals under attack are also included in this balanced history. Countless attacks carried out over the Philippine Islands (including the sinking of the St Lo) are analyzed and the Okinawa campaign is afforded particularly strong coverage, with the sinking of HMAS Australia explored in detail. The collective sacrifice is then summed up, with reflections from survivors on both sides appraising events in a humane historical context. A detailed appendices then follows, featuring units formed, sorties mounted, ships sunk and damages inflicted.
