*Beacon 23* Hugh Howey,2016 For centuries, men and women have manned lighthouses to ensure the safe passage of ships. It is a lonely job, and a thankless one for the most part. Until something goes wrong. Until a ship is in distress. In the 23rd century, this job has moved into outer space. A network of beacons allows ships to travel across the Milky Way at many times the speed of light. These beacons are built to be robust. They never break down. They never fail. At least, they aren't supposed to.

**The Chemistry of Heterocyclic Compounds, Volume 23** Ahmed Mustafa,2007-05-21 The Chemistry of Heterocyclic Compounds, since its inception, has been recognized as a cornerstone of heterocyclic chemistry. Each volume attempts to discuss all aspects - properties, synthesis, reactions, physiological and industrial significance - of a specific ring system. To keep the series up-to-date, supplementary volumes covering the recent literature on each individual ring system have been published. Many ring systems (such as pyridines and oxazoles) are treated in distinct books, each consisting of separate volumes or parts dealing with different individual topics. With all authors are recognized authorities, the Chemistry of Heterocyclic Chemistry is considered worldwide as the indispensable resource for organic, bioorganic, and medicinal chemists.

*Black Cat Weekly #23* Cynthia Ward,Michael Allan Mallory,Laird Long,Richard Wilson,Lester del Rey,Allan Danzig,Frank Kane,Hulbert Footner,James H. Beard,2022-02-06 Welcome to Black Cat Weekly #23. Lots of good stuff this time—highlighted by a novel from Golden Age mystery author Rufus King, Duenna for a Murder. Plus a few novellas, and lots of great short stories, a solve-it-yourself mystery from Hal Charles, and great selections from Michael Bracken (Laird Long’s “Taken for a Ride”—which qualifies as both a mysery and a fantasy story) and Barb Goffman (Michael Allan Mallory’s “Random Harvest”). On the science fiction side, the Cynthia Ward Presents story is missing this week, but that’s only because we have a fantastic alternate-history story from Cynthia herself! Check out her “On Stony Ground.” Plus an epic disaster story from Allan Danzig, a fantasy from Unknown by Lester del Rey and James H. Beard, a space-based tale by Richard Wilson, and a miniature military SF story from Larry Tritten. Here’s the complete lineup: Mysteries / Suspense / Adventure: “Soul Searching,” by Laird Long [short story] “A Fine Kettle of Fish,” by Hal Charles [Solve-It-Yourself Mystery] “Dead Wrong,” by Frank Kane [short story] “Taken for a Ride,” by Hulbert Footner [short novel] “Random Harvest,” by Michael Allan Mallory [Barb Goffman Presents short story] Duenna to a Murder, by Rufus King [novel] Science Fiction & Fantasy: “On Stony Ground,” by Cynthia Ward [short story] “Corrigan’s Homunculi,” by Larry Tritten [short story] “Carillon of Skulls,” by Lester del Rey and James H. To settle the score, she'll have to retrieve a family heirloom from a vicious beast... but it could be worse. (After all, some heroes are forced to perform twelve labors, not just one!) A Redactional Study of the Book of Isaiah 13-23 Jongkyung Lee,2018-05-31 A Redactional Study of the Book of Isaiah 13-23 argues that a series of programmatic additions were made to the oracles concerning the nations in Isaiah 13-23 during the late-exilic period by the same circle of writers who were responsible for Isaiah 40-55. These additions were made to create continuity between the ancient oracles against the nations from the Isaiah tradition and the future fate of the same nations as the late-exilic redactor(s) foresaw. The additions portray a two-sided vision concerning the nations. One group of passages depicts a positive turn for certain nations while the other group of passages continues to pronounce doom against the remaining nations. This double-sided vision is set out first in Isaiah 14 surrounding the famous taunt against the fallen tyrant. 14:1-2, before the taunt, paints the broad picture of the future return of the exiles and the attachment of the gentiles to the people of Israel. After the taunt and other sayings of YHWH against his enemies, 14:26-27 extends the sphere of the underlying theme of 14:4b-25a, namely YHWH's judgement against boastful and tyrannical power(s), to all nations and the whole earth. The two sides of this vision are then applied accordingly to the rest of the oracles concerning nations in chapters 13-23. To the nations that have experienced similar disasters as the people of Israel, words of hope in line with 14:1-2 were given. To the nations that still possessed some prominence and reasons to be proud, words of doom in line with 14:26-27 were decreed.

**23 European Symposium on Computer Aided Process Engineering** A.H. Alexopoulos,J Milenkovic,C Kiparissides,2013-06-10 The present work describes an integrated computational model of airflow as well as particle dispersion, breakage and deposition in a Dry Powder Inhaler, DPI. The integrated model combines computational fluid dynamics, CFD, an Eulerian/Lagrangian model for particle motion and deposition, and a particle-wall collision model, which are employed to determine the parameters of a multi-compartment model of the DPI. Dynamic population balance models are solved in the compartment model to determine the breakup and deposition of particle agglomerates in the DPI during inhalation. This approach provides detailed information on the dispersion and deposition of powder particles in the DPI connecting formulation properties to key outflow features, e.g. emitted mass and fine particle fraction.

*23 European Symposium on Computer Aided Process Engineering* Javier Silvente,Adrián Aguirre,Guillem Crexells,Miguel Zamarripa,Carlos Méndez,Moisès Graells,Antonio Espuña,2013-06-10 A new optimization model is presented for the short-term management of the energy supply and demand in smart grids. The detailed model includes a flexible demand profile in order to manage the energy requirements by incorporating penalizations in the economic objective function for delays in satisfying energy demand. The MILP model for the optimization of deterministic scenarios is reformulated in order to incorporate discrete and hybrid time representations. This approach allows considering a different granularity of the problem. Finally, the improved performance of the hybrid approach introduced is shown by comparing the performance of these two time representations.

**23 European Symposium on Computer Aided Process Engineering** Chengchuan Zhou,Pei Liu,Zheng Li,2013-06-10 CO2 capture and sequestration (CCS) is a major means to reduce greenhouse gas emissions,

especially from centralized energy conversion sites. Many studies have been conducted either on the CO2 capture side or on the sequestration side, but research on CO2 transport, which connects the capture side and the sequestration side, is rather limited. CO2 capture sites and sequestration sites are usually not geographically located in the same region, thus planning and design of CO2 transport infrastructure must be considered before capture and sequestration activities are conducted. Previously, some studies have been conducted to address the optimal planning problem of CO2 pipelines network via a source-sink match approach, which is applicable to early stages of CCS development when the total amount of CO needed to be transported is rather small. However, in scenarios with large amount of CO to be transported, the source-sink match approach appears to be less efficient. In this manuscript, we propose a superstructure based modelling and optimization framework for optimal planning of CO2 transport pipelines network, where all CO2 emissions sources and sequestrations sites can be connected by pipelines, and pump stations can also be built along pipelines to maintain the pressure of CO transported. We also provide a case study of a region in North China, with 45 emissions sources and four sequestration sites. Different configurations of pipelines network are illustrated in scenarios with low, medium, and high CO2 capture rates.

23 European Symposium on Computer Aided Process Engineering Chandrakant R. Malwade,Haiyan Qu,Ben-Guang Rong,Lars P. Christensen,2013-06-10 In this work, to understand the separation behavior of the flash column chromatography during purification of artemisinin from the crude extract of Artemisia annua, multivariate data analysis technique PARAFAC (Parallel factorization) is used to mine the relevant chemical information from analytical chromatograms of 9 artemisinin containing fractions. The size of three way dataset obtained from chromatogram measurements in sample, retention time, and spectral mode is 9 × 1981 × 82. Prior to the application of PARAFAC, the dataset is preprocessed to remove baseline drift and peak misalignment caused by retention time shifts due to matrix effects. Due to the complicated nature of chromatograms, the preprocessed HPLC data were divided into intervals containing analytical signals and then PARAFAC modeling was performed on individual intervals. Loadings from the PARAFAC analysis provided pure elution profiles and pure UV spectra even for co-eluting peaks, thus enabling the identification of chromatographically unresolved components. Also, loadings were used to determine the number of components and their relative concentrations in the fractions containing artemisinin which are the most important information of the flash column performance.

23 European Symposium on Computer Aided Process Engineering Nádson M.N. Lima,Lamia Zuniga Linan,Flavio Manenti,Rubens Maciel Filho,Marcelo Embiruçu,Maria R. Wolf Maciel,2013-06-10 It is known that the applications of a material are totally dependent on their characteristics. In the particular case of the manufacture of bone tissues from polymer sources, high molecular weights are necessary to ensure optimum mechanical and optical properties. However, exothermic reactions and strong nonlinearities, which are peculiarities of such reaction systems, require rigorous control in order to achieve to the desired objectives. In this paper, an optimal control policy applied to a batch methyl methacrylate polymerization reactor is presented. The proposed methodology determines the optimal time profile of reactor temperature; if the temperature is maintained along the calculated profiles, a polymer product with desired molecular weight distribution could be obtained at the pre-specified final monomer conversion rate. The good agreement with experimental results reveals that the described control procedure is suitable to ensure that the polymer product satisfies the specifications.
