**Chasing New Horizons** Alan Stern, David Grinspoon, 2018-05-01 Called spellbinding (Scientific American) and thrilling...a future classic of popular science (PW), the up close, inside story of the greatest space exploration project of our time, New Horizons' mission to Pluto, as shared with David Grinspoon by mission leader Alan Stern and other key players. On July 14, 2015, something amazing happened. More than 3 billion miles from Earth, a small NASA spacecraft called New Horizons screamed past Pluto at more than 32,000 miles per hour, focusing its instruments on the long mysterious icy worlds of the Pluto system, and then, just as quickly, continued on its journey out into the beyond. Nothing like this has occurred in a generation—a raw exploration of new worlds unparalleled since NASA's Voyager missions to Uranus and Neptune—and nothing quite like it is planned to happen ever again. The photos that New Horizons sent back to Earth graced the front pages of newspapers on all 7 continents, and NASA's website for the mission received more than 2 billion hits in the days surrounding the flyby. At a time when so many think that our most historic achievements are in the past, the most distant planetary exploration ever attempted not only succeeded in 2015 but made history and captured the world's imagination. How did this happen? Chasing New Horizons is the story of the men and women behind this amazing mission: of their decades-long commitment and persistence; of the political fights within and outside of NASA; of the sheer human ingenuity it took to design, build, and fly the mission; and of the plans for New Horizons' next encounter, 1 billion miles past Pluto in 2019. Told from the insider's perspective of mission leader Dr. Alan Stern and others on New Horizons, and including two stunning 16-page full-color inserts of images, Chasing New Horizons is a riveting account of scientific discovery, and of how much we humans can achieve when people focused on a dream work together toward their incredible goal.

**The Pluto System After New Horizons** S. Alan Stern, 2021-08-10 Once perceived as distant, cold, dark, and seemingly unknowable, Pluto had long been marked as the farthest and most unreachable frontier for solar system exploration. The Pluto System After New Horizons is the benchmark research compendium for synthesizing our understanding of the Pluto system. This volume reviews the work of researchers who have spent the last five years assimilating the data returned from New Horizons and the first full scientific synthesis of this fascinating system.

**New Horizons** August Derleth, 1998 Before his untimely death in 1971, August Derleth, already acclaimed for editing numerous SF anthologies, selected the contents for a final retrospective gathering of first rate, exemplary SF tales, but never completed the project. Now, with an Introduction and Authors' notes provided by Joseph Wrzos, New Horizons finally appears. Among the now celebrated pulp SF authors represented are Murray Leinster, Clark Ashton Smith, Donald Wandrei, and Frank Belknap Long. As a special feature, the contents include The Countries of the Sea, a newly discovered SF novelette by August Derleth and Mark Schorer, published for the first time.

**Pluto** Richard Grossinger, 2015 Encompassing astronomy, mythology, psychology, and astrology, Pluto offers a wealth of knowledge about our most famous dwarf planet. First observed in 1930 and once defined as the ninth and final planet in our solar system, Pluto and its discovery and reclassification throw a unique light on how we generate meaning in science and culture. This anthology, timed to appear in concordance with NASA's New Horizons's approach to Pluto in July 2015, shows that while the astronomical Pluto may be little more than an ordinary escaped moon or tiny Kuiper Belt object, it is a powerful hyperobject, for its mythological and cultural effigies on Earth incubate deep unconscious seeds of the human psyche. Certain astronomical features pertain to Pluto in terms of its distance from the Sun, coldness, and barrenness. These also inform its mythology and astrology as befitting a planet named after the God of the Underworld. Among the issues central to this collection are the meanings of darkness, loss, grief, inner transformation, rebirth, reincarnation, and karmic revelation, all of which are associated with the astrology of Pluto. Pluto also embodies the meaning of true wealth as being nonmaterial essence instead of property, conventional accolades, ego identity, achievement. It is the marker of negative capability. Table of Contents Dana Wilde: Pluto on the Borderlands Richard Grossinger: Pluto and The Kuiper Belt Richard C. Hoagland: New Horizon ... for a Lost Horizon J. F. Martel: Pluto and the Death of God James Hillman: Hades Fritz Bruhubner: The Mythology and Astrology of Pluto Thomas Frick: Old Horizons John D. New Worlds, New Horizons National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Board on Physics and Astronomy,Space Studies Board,Committee on the Review of Progress Toward the Decadal Survey Vision in New Worlds, New Horizons in Astronomy and Astrophysics,2016-11-24 New Worlds, New Horizons in Astronomy and Astrophysics (NWNH), the report of the 2010 decadal survey of astronomy and astrophysics, put forward a vision for a decade of transformative exploration at the frontiers of astrophysics. This vision included mapping the first stars and galaxies as they emerge from the collapse of dark matter and cold clumps of hydrogen, finding new worlds in a startlingly diverse population of extrasolar planets, and exploiting the vastness and extreme conditions of the universe to reveal new information about the fundamental laws of nature. NWNH outlined a compelling program for understanding the cosmic order and for opening new fields of inquiry through the discovery areas of gravitational waves, time-domain astronomy, and habitable planets. Many of these discoveries are likely to be enabled by cyber-discovery and the power of mathematics, physics, and imagination. To help realize this vision, NWNH recommended a suite of innovative and powerful facilities, along with balanced, strong support for the scientific community engaged in theory, data analysis, technology development, and measurements with existing and new instrumentation. Already in the first half of the decade, scientists and teams of scientists working with these cutting-edge instruments and with new capabilities in data collection and analysis have made spectacular discoveries that advance the NWNH vision. New Worlds, New Horizons: A Midterm Assessment reviews the responses of NASA's Astrophysics program, NSF's Astronomy program, and DOE's Cosmic Frontiers program to NWNH. This report describes the most significant scientific discoveries, technical advances, and relevant programmatic changes in astronomy and astrophysics over the years since the publication of the decadal survey, and assesses how well the Agencies' programs address the strategies, goals, and priorities outlined in the 2010 decadal survey.

**Multiple Intelligences** Howard E. Gardner,1993-04-20 Howard Gardner's brilliant conception of individual competence is changing the face of education today. In the ten years since the publication of his seminal Frames of Mind , thousands of educators, parents, and researchers have explored the practical implications of Multiple Intelligences (MI) theory-the powerful notion that there are separate human capacities, ranging from musical intelligence to the intelligence involved in understanding oneself. Multiple Intelligences: The Theory in Practice brings together previously published and original work by Gardner and his colleagues at Project Zero to provide a coherent picture of what we have learned about the educational applications of MI theory from projects in schools and formal research over the last decade.

**New Horizons in Chinese Linguistics** C-T James Huang,Audrey Li Yen Hui,2012-12-06 The past decade and a half has witnessed a great deal of renewed interest in the study of Chinese linguistics, not only in the traditional areas of philological studies and in theoretically oriented areas of syn chronic grammar and language change but also in the cultivation of new frontiers in related areas of the cognitive sciences. There is a significant increase in the number of students studying one area or another of the linguistic structure of Chinese in various linguistic programs in the United States, Europe, Australia and in China, Hong Kong, Singapore, Taiwan, and other parts of Asia. Several new academic departments devoted to the study of linguistics have been established in Taiwan and Hong Kong in the past few years. The increasing research and study activities have also resulted in a number of national and international conferences, including the North American Conference on Chinese Linguistics (NACCL), which has been held annually in the United States; the International Symposium on Chinese Languages and Linguistics (ISCLL), which has had its fourth meeting since it was launched by Academia Sinica in Taiwan in 1990;

the International Association of Chinese Linguistics (IACL), created in Singapore in 1992 and now incorporated in Irvine, California, which has held its annual meetings at major institutions in Asia, Europe, and the US.
