*Algorithms, Automation, and News* Neil Thurman, Seth C. Lewis, Jessica Kunert, 2021-05-18 This book examines the growing importance of algorithms and automation—including emerging forms of artificial intelligence—in the gathering, composition, and distribution of news. In it the authors connect a long line of research on journalism and computation with scholarly and professional terrain yet to be explored. Taken as a whole, these chapters share some of the noble ambitions of the pioneering publications on ‘reporting algorithms’, such as a desire to see computing help journalists in their watchdog role by holding power to account. However, they also go further, firstly by addressing the fuller range of technologies that computational journalism now consists of: from chatbots and recommender systems to artificial intelligence and atomised journalism. Secondly, they advance the literature by demonstrating the increased variety of uses for these technologies, including engaging underserved audiences, selling subscriptions, and recombining and re-using content. Thirdly, they problematise computational journalism by, for example, pointing out some of the challenges inherent in applying artificial intelligence to investigative journalism and in trying to preserve public service values. Fourthly, they offer suggestions for future research and practice, including by presenting a framework for developing democratic news recommenders and another that may help us think about computational journalism in a more integrated, structured manner. The chapters in this book were originally published as a special issue of Digital Journalism.

**Practical Docker with Python** Sathyajith Bhat, 2018-07-26 Learn the key differences between containers and virtual machines. Adopting a project based approach, this book introduces you to a simple Python application to be developed and containerized with Docker. After an introduction to Containers and Docker you'll be guided through Docker installation and configuration. You'll also learn basic functions and commands used in Docker by running a simple container using Docker commands. The book then moves on to developing a Python based Messaging Bot using required libraries and virtual environment where you'll add Docker Volumes to your project, ensuring your container data is safe. You'll create a database container and link your project to it and finally, bring up the Bot-associated database all at once with Docker Compose. What You'll Learn Build, run, and distribute Docker containers Develop a Python App and containerize it Use Dockerfile to run the Python App Define and run multi-container applications with Docker Compose Work with persisting data generated by and used by Docker containers Who This Book Is For Intermediate developers/DevOps practitioners who are looking to improve their build and release workflow by containerizing applications

**The Royal Trials (Last Gate of the Emperor #2)** Kwame Mbalia, Prince Joel Makonnen, 2022-07-19 From Kwame Mbalia and Prince Joel David Makonnen comes an Afrofuturist adventure about a mythical Ethiopian empire. Sci-fi and fantasy combine in this epic journey to the stars. Yared has traveled a long way to find his place in the universe. Light years, even. Though the battle of Addis Prime is over, the spacefaring Axum Empire is still fractured. The kingdom once gave their technology away free of charge, to better humankind. Now, having been missing for over a decade, they're returning to the planet where their galaxy-spanning civilization began—Earth. But they find the planet in disarray. Old Earth's atmosphere is a mess of junked shuttles and satellites. This is especially true of Debris Town, an orbital flotilla where poor spacefarers—left to rot by the Intergalactic Union that rose up in Axum's place—have taken to piracy to survive. Yared is set to speak at the opening of the Royal Trials, a competition of the best exo pilots in the Sol System. But on the day of his speech, the pirates launch an attack! The siege sets off a chain of events that will lead Yared into the depths of Old Earth—and the jaws of a cruel betrayal. There's more to the pirates—and Debris Town—than anyone saw coming.

*Using the Internet* Jerry Honeycutt, 1998 Power tools and tasks on the Internet are a focus of this complete reference. The book examines major tasks on the Internet and Web and shows users how to best exploit the tools to get the job done. This edition continues to cover less introductory material and more intermediate tools and techniques than previous editions. The CD-ROM contains a collection of must have utilities, along with two additional Que books in HTML format.

Google Scholar and More William Miller,Rita Pellen,2014-01-02 In only a few years, Google has become an authoritative provider of multiple products which have changed the digital information landscape. This book discusses how libraries can go beyond Google's basic search and Scholar functions to expand services for their patrons. Respected authorities reveal the expanding variety of new Google applications developed in the past few years, many of which have not received wide attention and are as yet not often used in libraries. Applications explored include Google Co-op, Google News, Google Docs & Spreadsheets, Google Calendar, and Google Talk. This book also discusses different important aspects of the company's expansion of functions, such as the failure of the Google Answers experiment, the broad variety of free Google applications that librarians can use to collaborate, and the success of Google's Blogger, among others. A helpful chronology of Google's growth is provided, as well as comparative analyses between various Google functions and other functions that are currently available. The book is extensively referenced. This book is an invaluable resource for academic librarians, public librarians, school librarians, library science faculty, and special librarians. This book was published as a special issue of the *Journal of Library Administration*.

The Algorithmic Distribution of News James Meese,Sara Bannerman,2022-09-22 This volume explores how governments, policymakers and newsrooms have responded to the algorithmic distribution of the news. Contributors analyse the ongoing battle between platforms and publishers, evaluate recent attempts to manage these tensions through policy reform and consider whether algorithms can be regulated to promote media diversity and stop misinformation and hate speech. Chapter authors also interview journalists and find out how their work is changing due to the growing importance of algorithmic systems. Drawing together an international group of scholars, the book takes a truly global perspective offering case studies from Switzerland, Germany, Kenya, New Zealand, Canada, Australia, and China. The collection also provides a series of critical analyses of recent policy developments in the European Union and Australia, which aim to provide a more secure revenue base for news media organisations. A valuable resource for journalism and policy scholars and students, *Governing the Algorithmic Distribution of News* is an important guide for anyone hoping to understand the central regulatory issues surrounding the online distribution of news.

**Untangling the Web** National Security Agency (NSA),2013 Use the internet like a real spy. *Untangling the Web* is the National Security Agency's once-classified guide to finding information on the internet. From the basic to the advanced, this 650-page book offers a fascinating look at tricks the real spies use to uncover hidden (and not-so-hidden) information online. Chapters include: Google hacks Metasearch sites Custom search engines Maps & mapping Uncovering the invisible internet Beyond search engines: Specialized research tools Email lookups Finding people Researching companies A plain english guide to interworking Internet toolkits Finding ISPs Cybergeography Internet privacy and security ....and over a hundred more chapters. This quote from the authors hints at the investigative power of the techniques this book teaches: Nothing I am going to describe to you is illegal, nor does it in any way involve accessing unauthorized data, [...but] involves using publicly available search engines to access publicly available information that almost certainly was not intended for public distribution. From search strings that will reveal secret documents from South Africa ( filetype: xls site: za confidential ) to tracking down tables of Russian passwords ( filetype: xls site: ru login ), this is both an instructive and voyeuristic look at how the most powerful spy agency in the world uses Google.

Transparent Data Mining for Big and Small Data Tania Cerquitelli,Daniele Quercia, Frank Pasquale,2017-05-09 This book focuses on new and emerging data mining solutions that offer a greater level of transparency than existing solutions. Transparent data mining solutions with desirable properties (e.g. effective, fully automatic, scalable) are covered in the book. Experimental findings of transparent solutions are tailored to different domain experts, and experimental metrics for

evaluating algorithmic transparency are presented. The book also discusses societal effects of black box vs. transparent approaches to data mining, as well as real-world use cases for these approaches. As algorithms increasingly support different aspects of modern life, a greater level of transparency is sorely needed, not least because discrimination and biases have to be avoided. With contributions from domain experts, this book provides an overview of an emerging area of data mining that has profound societal consequences, and provides the technical background to for readers to contribute to the field or to put existing approaches to practical use.

Journalism in the Data Age Jingrong Tong, 2022-03-05 This book is your guide to understanding what journalism is and could be in an age of digital technology and datafication. Journalism today is entwined with the digital. Stories can come from crowdsourcing and content farms. They can incorporate data visualisations and virtual reality. Journalists can find themselves working as self-employed digital entrepreneurs or for tech giants like Google and Facebook. This book explores the development of journalism in this era of digital tech, and big and open data. It explores the crucial new developments of online journalism, data journalism, computational journalism and entrepreneurial journalism, and what this means for our understanding of journalism as a profession, and as a part of society. Using a wealth of international case studies, Jingrong Tong explores contemporary issues such as: AI, Automated news, 'robot reporters', and algorithmic accountability. Digital business models, from venture capital to tech start-ups to crowd-funding. Audiences and dissemination in and age of platform capitalism Questions of censorship, democracy and state control. Digital challenges to journalistic autonomy and legitimacy. With clear explanations throughout, *Journalism in the Data Age* introduces you to a range of ideas, debates and key concepts. It is essential reading for all students of journalism. Dr Jingrong Tong is Senior Lecturer in Digital News Cultures at the University of Sheffield.

**Grundlagen der Medienwirtschaft** Christoph Zydorek, 2018-01-29 Dieses Lehrbuch setzt an den Inhalten des Bandes Einführung in die Medienwirtschaftslehre von Christoph Zydorek an und erweitert diese entsprechend den Anforderungen von medienbezogenen Masterstudiengängen. Dabei wird ein hochaktuelles und für die Medienwirtschaft hoch bedeutsames Thema fokussiert: der Einsatz von Algorithmen in Verbindung mit großen Datenmengen in alltäglichen medienwirtschaftlichen Zusammenhängen. Es wird analysiert, auf welche Weise Medienunternehmen in jüngster Zeit veränderte technische Rahmenbedingungen für ihre Leistungserstellungs-, Leistungsangebots-, Interaktions- und Distributionskonfigurationen nutzen, um damit den seit jeher gegebenen ökonomischen Herausforderungen zu begegnen, die sie bei der Produktion und Vermarktung medialer Inhalteangebote haben. Nachdem der Algorithmusbegriff und seine medienwirtschaftlichen Zusammenhänge erläutert wurden, diskutiert der Autor konkrete Beispiele, die die aktuellen Veränderungen illustrieren.

**Journalismus der Dinge** Jakob Vicari, 2019-10-30 Wir leben in einer Welt der vernetzten Dinge. Doch was heißt das für den Journalismus? In seinem Buch *Journalismus der Dinge*. Strategien für den

Journalismus 4.0 macht sich Dr. Jakob Vicari auf die Suche nach neuen Geschichten, Strategien und Prototypen für den Journalismus von Morgen. Der Journalismus der Dinge (Journalism of Things, JoT) erzählt Geschichten aus und mit dem Internet der Dinge. Ob Sensoren in Kühen oder Sprachassistenten, Nachrichtenmöbel oder Investigativ-Journalismus mit Fitnesstrackern: Erstmals versammelt ein Werk die neuen Herausforderungen für das Storytelling im Internet der Dinge. Der Journalismus der Dinge ist keine bloße Spielart des Datenjournalismus, es geht nicht allein um eine neue Form alter Ausspielgeräte oder ein neues Steuerungskonzept mit Sprache statt Knöpfen. Es geht um viel mehr. Das Internet der Dinge setzt an, den Journalismus zu verändern, wie einst das Internet den Journalismus verändert hat. Das Buch Journalismus der Dinge vereint die Analyse mit zahlreichen Beispielen und Rezepten für eigene Experimente.

**No Shelf Required 2** Sue Polanka,2012 E-book content, devices, and services have created challenges for libraries as well as opportunities. Because the e-book playing field is constantly changing, any predictions are, at best, tenuous. Librarians must be resilient in order to manage, and not be managed by, e-books and their progenies. With their explosive sales and widespread availability over the past few years, e-books have definitively proven that they are here to stay. In this sequel to her first book of the same title, the author dives even deeper into the world of digital distribution. Contributors from across the e-book world offer their perspectives on what is happening now and what to expect in the coming months and years. Included in this resource are: Guidelines for performing traditional library processes such as cataloging, weeding, archiving, and managing e-book accessibility for patrons with special needs; Explorations of topics such as the e-book digital divide and open-access publishing; Case studies from an array of academic, public, and school libraries, offering firsthand accounts of what works, what doesn't, and why; Discussions of the emerging model of the electronic-only library and the rich possibilities of enhanced e-books.
