Nieuport 11/16 Bébé vs Fokker Eindecker Jon Guttman,2014-04-22 The Nieuport 11 boasts an important place in the technology race against German aircraft in World War I aerial warfare. It eventually led Nieuport to produce the first plane flown in large numbers in aerial combat by the United States. The appearance in July 1915 of Germany's Fokker E I, armed with interrupter gear that allowed its machine gun to fire forward without striking the propeller, heralded a reign of terror over the Western Front that the Allies called the Fokker Scourge. Among several alternative means for countering the Fokkers, until the Allies introduced practical synchronisation mechanisms of their own, was the French Nieuport - 11 a single-seat version of the Nieuport 10 sesquiplane (one-and-a-half wing) mounting a Lewis machine gun above the upper wing, firing over the airscrew. Nicknamed the Bébé because of its comparatively small size, the Nieuport 11 was, though less robust than true biplanes, superior in structure and overall performance to the German monoplane. During 1916 the Nieuport 11, and its more powerful but more difficult to control stablemate, the Nieuport 16, battled a succession of improved Fokkers, the E II, E III and E IV, until the Germans abandoned the monoplane in favour of a new and deadly generation of biplane fighters. Even so, the Bébé's early successes also influenced the Germans to adopt sesquiplane designs of their own - most notably the Albatros D III and D V - while Nieuport also held on to the sesquiplane format longer than it should have. Fully illustrated with specially commissioned full-colour artwork, this is the absorbing story of the clash between these two innovative fighters at the height of World War I.

Nieuport 11/16 Bébé vs Fokker Eindecker Jon Guttman,2014-04-20 The appearance in July 1915 of the Fokker E I heralded a reign of terror over the Western Front that the Allies called the 'Fokker Scourge'. The French Nieuport 11 was one type desperately thrown into action to counter the Fokkers. The swirling dogfights between this fighter – and its more powerful but more unwieldy stablemate, the Nieuport 16 – and a succession of improved Fokkers, the E II, E III and E IV, came to symbolise air combat in World War I. This book gives a detailed look at the developmental history of the fighters, contrasting the interrupter gear-equipped Fokker with the more improvised solution incorporated in the Nieuport – a machine gun fitted to the upper wing to avoid the propeller entirely. The Germans went on to abandon the monoplane in favour of a new and deadly generation of biplane fighters, based on the lessons learned from these vicious engagements and influenced by the success of the French Nieuport.

Nieuport Aces of World War 1 Norman Franks,2000-04-25 The French Nieuport company provided the Allied air forces with the first true fighter scout of World War 1 in the shape of the diminutive XI of 1915. Based on the Bebe racer, built for the abandoned Gordon-Bennett Trophy of the previous year, the aircraft utilised a sesquiplane (lower wing much smaller than the upper wing) arrangement which gave the XI extreme manoeuvrability. It was the only scout respected by the all-conquering German Fokker E-series of 1915-16, and was flown by French, British, Russian, Belgian and Italian aces. The XI was replaced from May 1916 onwards by the bigger and more powerful XVII. which proved to be one of the best fighters of World War 1.

Murphy,2005-04-27 An expert examination of the evolution of military aviation and its profound impact on warfare—from the employment of balloons during the French Revolutionary wars to the use of aircraft in World War I. *Military Aircraft, Origins to 1918: An Illustrated History of Their Impact* is a detailed, authoritative exploration of the role and development of military aviation, from its beginnings to the conclusion of World War I. Military history scholar Justin Murphy carefully illustrates the impact of aircraft on military warfare, examines the different types of aircraft, and includes a wealth of photographs and descriptions. Organized thematically, the work covers everything from the origins of military aviation and the impact of aircraft on World War I to the role of reconnaissance missions, auxiliary aircraft, fighters, and bombers. Australian Hawk Over the Western Front Adrian Hellwig,2006-08-19 The true story of Australia's greatest flying ace and his WWI victories, based on his letters, combat reports, and other documents. Includes photos. Major Roderick Dallas is Australia's leading air ace of all time and, with fifty victories, also one of the highest-scoring Commonwealth aces. Yet, until this excellently researched volume, there has never been a full biography of this exceptional pilot, whose fighting career spanned from 1916 to 1918. Flying Nieuport Scouts, Triplanes, and Camels with the RNAS and RAF, he was an ever-present threat over the Western Front and the scourge of the German Air Force. Adrian Hellwig's book has been taken principally from primary sources—Dallas's own letters, log book, and service record, in addition to squadron record books, combat reports and contemporary accounts—and his resulting conclusions will surprise many. Here is a fitting tribute not just to Australia's greatest war hero of the air but to a man any country would be proud to call its own.

California Warplanes Harold Skaarup,2012 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of California. The aircraft include those flown by members of the US Air Force, the US Navy, the US Army, the US Marine Corps, the US Coast Guard, the Air and Army National Guard units, and by various NATO and allied nations as well as a number of aircraft previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 150 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who would like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers, websites and email addresses have been included, along with a list of aircraft held in each museum's current inventory or that on display as gate guardians throughout the state of California. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of California's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and a good number have been restored to flying condition. This guide-book should help you to find and view California's Warplane survivors.

The Headlong Fury J. Fred MacDonald,2014-04-25 How innocent he was in the summer of 1914. Philip Belmont, Professor of History at the University of California and expert on the diplomacy of Louis XVI had come in Paris to conduct historical research on 18th century politics. In love with France and in awe of its marvelous civilization, he arrived wide-eyed, full of expectation, and ready for a year of serious study. Through a series of interwoven circumstances, however, he was rapidly drawn into contemporary affairs that lured him into espionage and active involvement in the Great War that erupted soon after his arrival. Belmont's activities include a dangerous mission to Rome—participation in the defense of Paris—work with the American Field Service Ambulance Corps—membership in the Lafayette Escadrille as an American fighter pilot flying for France—secret work for President Woodrow Wilson--and molding public opinion to support a free Polish Republic. Too often World War One is portrayed as a series of battles between Germany, France, Great Britain, and eventually the United States. In reality, it was a global struggle stretching from Japan to Europe, North America to Southern Africa. Professor Belmont's travels underscore this point as he confronts the brutality of battle in France, as well in Russia on the Eastern Front, in Cairo on the Near Eastern Front, and in Salonika on the Macedonian Front. His adventures also intersect with major political figures, among them Woodrow Wilson, Lenin, and Lawrence of Arabia—plus various military leaders and diplomatic officials. Belmont's activities also involve him in matters such as Zionism, the Armenian Massacres, the rise of Arab nationalism, and the Spanish Flu pandemic.
