Vehicle Refinement Matthew Harrison,2004 High standards of NVH (Noise, Vibration and Harshness) performance are expected by consumers of all modern cars. Refinement is one of the main engineering and design attributes to be addressed in the course of developing new vehicle models and vehicle components. Written for students and engineering practitioners, this is the first book to address automotive NVH. It will help readers to understand and develop quieter, more comfortable cars. With chapters on the fundamentals of acoustics and detailed coverage of practical engineering solutions for noise control issues it is suitable for students of automotive engineering and engineers who haven't been trained in acoustics, and will be an important reference for practicing engineers in the motor industry.

Head Injury Simulation in Road Traffic Accidents Fábio A. O. Fernandes,Ricardo J. Alves de Sousa,Mariusz Ptak,2018-04-27 In this work the development of a new geometrically detailed finite element head model is presented. Special attention is given to sulci and gyri modelling, making this model more geometrically accurate than others currently available. The model was validated against experimental data from impact tests on cadavers, specifically intracranial pressure and brain motion. Its potential is shown in an accident reconstruction case with injury evaluation by effectively combining multibody kinematics and finite element methodology.

Japanese Inward Investment in UK Car Manufacturing Young-Chan Kim,2018-02-06 This title was first published in 2002. This compelling text provides fresh insight into an area that is often touched upon, but rarely examined in any great detail - the relationship between Multinational Enterprises (MNEs) and their host governments. Taking Japanese Foreign Direct Investment (FDI) strategy, arguably the model of FDI, Young-Chan Kim takes a revealing look at why the United Kingdom (UK) has dominated among the EU member states for FDI destination, while ironically losing its nationalized car manufacturers. Scholars of business history, international business and business economics will find this work invaluable.

The Knowledge-creating Company Ikujiro Nonaka,Hiroataka Takeuchi,1995 The authors contend that Japanese firms are successful because they are innovative--and not merely masters of imitation as some think--and because they create new knowledge and use it to produce successful products and technologies. Born to be Riled Jeremy Clarkson,2007-01-25 Born to be Riled is a collection of hilarious vintage journalism from Jeremy Clarkson. Jeremy Clarkson, it has to said, sometimes finds the world a maddening place. And nowhere more so than from behind the wheel of a car, where you can see any number of people acting like lunatics while in control (or not) of a ton of metal. In this collection of classic columns, first published in 1999, Jeremy takes a look at the world through his windscreen, shakes his head at what he sees - and then puts the boot in. Among other things, he explains: • Why Surrey is worse than Wales • How crossing your legs in America can lead to arrest • The reason cable TV salesmen must be punched • That divorce can be blamed on the birth of Jesus Raving politicians, pointless celebrities, ridiculous 'personalities' and the Germans all get it in the neck, together with the stupid, the daft and the ludicrous, in a tour de force of comic writing guaranteed to have Jeremy's postman wheezing under sackfuls of letters from the easily offended. Praise for Jeremy Clarkson: 'Brilliant . . . laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out Number-one bestseller Jeremy Clarkson writes on cars, current affairs and anything else that annoys him in his sharp and funny collections. Clarkson On Cars, Don't Stop Me Now, Driven To Distraction, Round the Bend, Motorworld and I Know You Got Soul are also available as Penguin paperbacks; the Penguin App iClarkson: The Book of Cars can be downloaded on the App Store. Jeremy Clarkson because his writing career on the Rotherham Advertiser. Since then he has written for the Sun and the Sunday Times. Today he is the tallest person working in British television, and is the presenter of the hugely popular Top Gear.

Inside the machine David Twohig,2022-06-15 This book tells the story of the modern car industry from the inside. What is it really like to work for the carmakers – the industrial giants that influence the daily lives of millions? How are mass-production cars really designed, engineered, and manufactured?

What does it take to engineer a successful vehicle? The story is told through the author’s own journey around the globe – starting as a young graduate engineer working for Nissan in the UK, to working for Nissan in Japan and, finally, for Renault in France as Chief Engineer of its ‘halo’ sports-car, designed to relaunch the Alpine brand. It tells the behind-the-scenes story of three well-known vehicles, whose development teams were led by the author – the Nissan Qashqai, the Renault ZOE, and the Alpine A110 – revealing some of the fascinating stories of how these vehicles came into being. The book seeks to show the real work that goes on behind the glamour of the Motor Shows and the well-honed corporate press releases – work that is sometimes exciting, but often grindingly difficult.

Systemic Changes in the German and Japanese Economies Werner Pascha,2004-08-05 Should Japan and Germany strive to restructure their institutional fabric and arrangements to make them more similar to Anglo-American standards? Where will systemic change lead? This book offers fresh insights by collecting Japanese and German contributions to this scholarly discussion both from theoretical and empirical viewpoints. A major conclusion of several papers is that the forces of differentiation are frequently underestimated. Important thematic issues include: contingency, path dependence and complementarity. Examinations of economic globalisation and rapidity of technological change pose questions about the nature of socio-economic system analysis in the future.
