The Very Quiet Cricket Eric Carle,2021-09-07 One day, a little cricket is born and meets a big cricket who chirps his welcome. But the little cricket cannot make a sound. The cricket meets many insects, but it isn't until he meets a beautiful female cricket that he can finally chirp hello! Excerpt: Hello! whispered a praying mantis, scraping its huge front legs together. The little cricket wanted to answer, so he rubbed his wings together. But nothing happened. Not a sound.

The Art of Centuries Steve James,2015-04-09 A century has always had a special resonance, in all walks of life, and none more so than in cricket. Scoring one hundred runs is the ultimate for a batsman. As former England captain Andrew Strauss admits, it's incredibly hard to do; for Ricky Ponting, it's a transformational moment in the career of a cricketer. Or in the words of Geoffrey Boycott, 'a century has its own magic'. In *The Art of Centuries*, Steve James applies his award-winning forensic insight to the very heart of batting. Through interviews with the leading run-scorers in cricket history and his own experiences, Steve discovers what mental and physical efforts are required to reach those magical three figures. Despite his own haul of 47 first-class tons, he himself felt at times that he was poorly equipped for the task. So working out how to score centuries is an art. And bowlers might not agree, but there really is no better feeling in cricket.

Sport in South Asian Society Boria Majumdar,J A Mangan,2013-09-13 A detailed study of sports' arrival, spread and advance in colonial and post-colonial South Asia. A selection of articles addresses critical issues of nationalism, communalism, commercialism and gender through the lens of sport. This book makes the point that the social histories of South Asian sport cannot be understood by simply looking at the history of the game in one province or region. Furthermore, it demonstrates that it would be wrong to understand sport in terms of the exigencies of the colonial state. Drawing inspiration from C.L.R. James' well-known epigram, 'What do they know of cricket who only cricket know?' the findings suggest that South Asian sport makes sense only when it is placed within the broader colonial and post-colonial context. The book demonstrates that sport not only influences politics and vice versa, but that the two are inseparable. Sport is not only political, it is politics, intrigue, culture and art. To deny this is to denigrate the position of sport in modern South Asian society. This volume was previously published as a special issue of *The International Journal of the History of Sport*.

The Cowboy Year Ethan D. Bryan,2015-05-29 Mosey on over to the campfire, take a load off, and let me tell you

about the adventures of J-Bar and me, Fret Maverick. J-Bar is my dad, a multi-state cowboy action shooting champion. To the best of my recollection, in nearly forty years, I had shot guns twice in my life. Returning home from a family vacation, I suddenly felt compelled to take a risk and try something completely new. So, I joined my recently retired father in playing the cowboy action game. Competing under the alias "Fret Maverick," I was introduced to a slice of Americana I would have never known otherwise. The Cowboy Year is a quirky and beautiful, Midwest-set, father-and-son memoir. But ultimately, The Cowboy Year is a story about having the courage to tell new stories.

Journey of a Lifetime Ajaz Haque, 2024-04-16 Inspired by the flow of tourists from Europe to Asia, author Ajaz Haque and his friend Bilal planned in 1963 to hitchhike from Asia to Europe. By doing this, the teenagers charted an unprecedented course, hitchhiking from Lahore, Pakistan, to Stuttgart, Germany, while carrying nothing but dreams. With hardly any money and only ambition in their pockets, they embarked on a journey about which they had hardly any idea. In 1964, their journey led them to Iran, where they encountered an unexpected roadblock due to passport restrictions in Bulgaria, Yugoslavia, and Austria. They were dejected in Tehran, but their fortunes took a remarkable turn when they spotted a world map on a nearby newsstand. In a flash of inspiration, they decided to bypass Bulgaria and Yugoslavia, opting for an alternate route through Greece, Italy, and Switzerland, a choice that turned their mission impossible into a feat. Along the way they experienced the warmth and hospitality of Turkey, suspicion in Greece during the Cyprus conflict, a progressive and fast-developing environment Italy, and the beauty of Switzerland. Their story shares the unfamiliar cultures and cuisines they encountered, the challenges of indecipherable languages and survival, and finally accomplishing their mission and experiencing the elation of making it to Stuttgart, Germany. This personal narrative recalls a vital journey taken in one man's youth in the 1960s and explores the way it affected the rest of his life.

Benson Brock, 2009-04-01 A Sci-Fi Thriller, Eden's Fallen Shaman is a portrayal of a pair of brilliant fraternal twin brothers whose love of Chemistry and Botany lead them on a journey of romance, success, global adventure and discovery. But they both share a dark and unwarranted past, genetically inherited, which relentlessly haunts them, eventually demanding a confrontation. The classic battle between good and evil severs their close relationship, evolving into one of the greatest Metaphysical feats performed by humans but ending in a plethora of misfortune.

The Self-Field Chris Abel, 2021-03-15 In this incisive study of the biological and cultural origins of the human self, the author challenges readers to re-think ideas about the self and consciousness as being exclusive to humans. In their place, he expounds a metatheoretical approach to the self as a purposeful system of extended cognition common to animal life: the invisible medium maintaining mind, body and environment as an integrated 'field of being'. Supported by recent research in evolutionary and developmental studies together with related discoveries in animal behaviour and the neurosciences, the author examines the factors that have shaped the evolution of the animal self across widely different species and times, through to the modern, technologically enmeshed human self; the differences between which, he contends, are relations of degree rather than absolute differences. We are, he concludes, instinctive and 'fuzzy individuals' clinging to fragile identities in an artificial and volatile world of humanity's own making, but which we now struggle to control. This book, which restores the self to its fundamental place in identity formation, will be of great interest for students and academics in the fields of social, developmental and environmental psychology, together with readers from other disciplines in the humanities, especially philosophy, cultural theory and architecture.
