

North American A 36 Apache

E. W. Nelson

North American A-36A Apache Przemyslaw Skulski,2011-12-01 The initial version of the famous P-51 Mustang to go into USAAF service was the dedicated fighter-bomber variant, the A-36A Apache. This book describes and illustrates the design and development of this version of the most famous American WWII fighter.It contains: Scale plans, photos and drawings from technical manuals, superb color illustrations of camouflage and markings, rare black and white archive photographs, and color photos of the preserved aircraft. It is essential reading for aviation enthusiasts and scale aeromodelers.

Straight Down! Peter Charles Smith,2000 This story, which has largely been ignored by historians, charts the development of the North American A-36 dive-bomber, the training of its young pilots, and finally, through their own eyes, the graphic accounts of combat missions in Europe and Asia come to life in unbelievable detail.

Allison-Engined P-51 Mustang Martyn Chorlton,2012-09-20 While the introduction of the Merlin engine did improve the Mustang's performance and produce the bubble-canopied fighters with which we associate the name, credit must be given to the Allison-engined variants that preceded it. From its inception in early 1940, the Mustang's development was extraordinarily rapid – such was the need for a fighter at the time, and the confidence in its design. By early January 1942, the Mustang was in service with the RAF, flying low-level armed reconnaissance operations over Northern France. Despite later Merlin variants arriving in-theatre, this remained a hunting ground for the Allison Mustangs through to D-Day and beyond – a remarkable service length. In American hands the Allison-engined Mustangs performed as dive-bombers and fighters, serving with distinction in North Africa and the Far East.

The Fight in the Clouds James P. Busha,2014-03-15 Get as close as you'll get to a World War II-era P-51 Mustang without flying one yourself with this spellbinding collection of tales from the men who actually flew the planes into war.The North American Aviation P-51 Mustang first started appearing in real numbers in 1943, at the climax of the Allied campaign in World War II. Able to fly long ranges, it was the perfect escort, keeping bombers protected all the way from Allied bases in Europe, the Mediterranean, and the Pacific to a variety of Axis industrial targets and military installations and back. The Mustang would go on to provide pivotal air support on D-Day, and by the end of the war, the P-51 would be responsible for nearly half of all enemy aircraft shot down.In *The Fight in the Clouds*, aviation writer and EAA Warbirds of America editor James P. Busha draws on interviews conducted with dozens of veteran P-51 pilots to trace the progress of war through the men's exciting, chronologically organized experiences. You'll encounter: ·Mustangs tangling with Soviet-built Yaks ·A Mustang ace shooting down an Me 262 Stormbird ·An epic long-range battle over the Pacific Ocean ·And a score of other riveting accounts underscoring the P-51's versatility and its vital importance to the Allied victoryBolstered by Busha's own commentary and historical analysis, along with a gallery of rare black-and-white period photographs, *The Fight in the Clouds* offers a cockpit-seat view of one of WWII's most celebrated aircraft and the men who bravely flew it into harm's way.

Mustang Designer Ray Wagner,2014-12-02 *Mustang Designer* tells the story of American wartime fighter development, including engines and armaments, as part of a nationwide program of aircraft builders and fliers, focusing on Edgar Schmued, the designer of the Mustang. The P-51 Mustang is widely regarded as the best propeller-driven fighter that ever flew. What many might not realize is that the plane's developer was a German migrant. This book tells of how Schmued created a weapon that would ultimately prove lethal to the aspirations of those who had seized control over his native land.

U.S. 86th Fighter Group in WWII Steve Luce,2008-01-15 This volume is the commemoration of the sacrifices and dedication of a group of extremely courageous, though largely unheralded young men who volunteered to answer a call, and to prosecute to its finish, in a manner up close and very personal, a war not of their making so as to make the world free of tyranny and a safer, better place in which to live. Written by Steve Luce, the son of one of the pilots of the 86th, their story is presented by over 225 photographs from the veterans, most never before published and with personal stories about their war experiences. This is the story of the men and machines of the 86th Fighter-Bomber Group, 12th Air Force. The 86th was operationally assigned only two aircraft during WW II. From their combat debut in early July, 1943, out of Korba, Tunisia and later based out of Italy, until the summer of 1944 they flew the North American A-36 Apache or Invader. They also flew a small number of the straight P-51, the cannon-armed version of the same airframe, for pinpoint demolition work where the Browning .50 caliber weapon, of which the A-36 carried six, was considered too light, and bombs were considered too inaccurate. From the summer of 1944 until VE-Day they flew the Republic P-47 Thunderbolt. In the interim between official assignments, they filled in with P-40's. There is a certain kind of man who is greater than the sum of his parts. The moral imperative generated by his acknowledgment of duty and his regard for innocent life is stronger than his biological imperative for self preservation and he, the consummate altruist, goes in harm's way under the most dire circumstances imaginable, often on a daily basis, putting his life on the line (sometimes several times daily), knowing that there is a strong possibility that he might not return. Fighter-bomber pilots fought a unique kind of war in which they were often the sole targets for massed enemy guns. Flying in very small

groups of usually less than a dozen, they engaged in what amounted to single combat, flying essentially alone, close to the ground, very visible to those multitudes of enemy guns, of which the pilots were often not aware until they started taking lead, steel and high explosive at very close range. When they died, they died alone, at low altitude and high speed with very little chance and less time to get out of aircraft turned into sieves by everything the enemy could put in the air, from large-caliber cannon shells to pistol rounds to bricks to the kitchen sink. Reading personal combat logs and squadron daily reports, it was stated very clearly that, in many instances, pilots on low-level strikes simply vanished. No one saw them get hit, no one saw them go in, no radio calls, nothing. This is their story, fully illustrated with dozens of color profiles by Aviation Artist Terry Higgins.

Naa Mustang III, (P-51b-5-Na) ,2021-06-10 This book compiles 4-view color profiles, scale plans, and photo details of the single variant of the NAA Mustang III, (P-51B-5-NA). Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also includes photos of the details in B&W and color.

California Warplanes Harold Skaarup,2012-04-16 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of California. The aircraft include those flown by members of the US Air Force, the US Navy, the US Army, the US Marine Corps, the US Coast Guard, the Air and Army National Guard units, and by various NATO and allied nations as well as a number of aircraft previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 150 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who would like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers, websites and email addresses have been included, along with a list of aircraft held in each museums current inventory or that on display as gate guardians throughout the state of California. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Californias heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and a good number have been restored to flying condition. This guide-book should help you to find and view Californias Warplane survivors.

Warbird Factory John M. Fredrickson,2015-09-10 Explore the WWII history of the company that later became a part of Boeing and made more aircraft from 1938 to 1944 than any other company in the United States. During World War II, Los Angeles was the ultimate boom town. By the end of the war, the L.A. area had produced 17 percent of all of America's war needs. North American Aviation, Inc. (NAA), operating out of their main Inglewood, California, plant, which is south of and adjacent to the city, was a key player in that work. From 1938 to 1944, NAA built over 40,000 aircraft, more than any other company in the United States. The bulk of them were of three iconic types designed by NAA: - The P-51 Mustang, arguably the best fighter of WWII. - B-25 Mitchell medium bombers, which saw worldwide combat. - Two-seat military pilot trainers, such as the AT-6 Texan. This is a fascinating story of a remarkable time in aviation history, when American businesses helped fund the arsenal of democracy that helped defeat the Axis powers. Warbird Factory tells this story with over 200 photographs, many of which come directly from the NAA/Boeing archives, where they have resided since WWII. This is an essential book for anyone interested in warbirds, aviation, Boeing/NAA, WWII, and/or the history of Southern California!

Allied Aircraft Piston Engines of World War II Graham White,2019-05-16 Allied Aircraft Piston Engines of World War II, now in its second edition, coalesces multiple aspects of war-driven aviation and its amazing technical accomplishments, leading to the allied victory during the second world war. Not by chance, the air battles that took place then defined much of the outcome of one of the bloodiest conflicts in modern history. Forward-thinking airplane design had to be developed quickly as the war raged on, and the engines that propelled them were indeed the focus of intense cutting-edge engineering efforts. Flying higher, faster, and taking the enemy down before they even noticed your presence became a matter of life or death for the allied forces. Allied Aircraft Piston Engines of World War II, Second Edition, addresses British- and American-developed engines. It looks at the piston engines in detail as they supported amazing wins both in the heat of the air battles, and on the ground supplying and giving cover to the troops. This new edition, fully revised by the original author, Graham White, offers new images and information, in addition to expanded specifications on the Rolls-Royce/ Packard Merlin and the Pratt & Whitney R-2800 engines. Jay Leno, a known enthusiast, wrote the Foreword.

American Attack Aircraft Since 1926 E.R. Johnson,2012-05-14 This book provides a concise historical survey of the various types of aircraft used by the United States Army Air Corps, Army Air Forces, and Air Force, and the Navy and Marine Corps to accomplish air attack missions since 1926. The text covers

four types of fixed-wing aircraft: designated attack aircraft; light, medium, and tactical bombers; fighter-bombers; and adapted attack aircraft. Reports on individual aircraft types include the aircraft's original military requirements, production history, and operational record, usually accompanied by photographs, illustrations, and technical specifications. Four appendices detail aircraft designations and nomenclature used throughout the military, the organizational structure of various military air units, aircraft designs that never made it into official service, and the evolution of attack aircraft weapons and tactics.

Native American Civilizations Marion Wood,Andy Mathis,2009-08-15 A selection of myths from the various regions of North America are beautifully retold and illustrated in colorful scenes. The myths reflect people's lives and explain many tribal customs and rules of behavior. These aspects of Native American life and culture are explored using lifelike illustrations and factual texts. It includes sections on Native American tribes of the Northwest, Plateau and Basin, California, Northern forests, Plains, Southwest, and Eastern Woodlands. Some of the myths concern creation, the raven and the first human beings, coyote and wolf, the buffalo dance, the rain chant, the floating island, and the search for the corn sisters.

The Encyclopedia of North American Indian Wars, 1607–1890 [3 volumes] Bloomsbury Publishing,2011-09-19 This encyclopedia provides a broad, in-depth, and multidisciplinary look at the causes and effects of warfare between whites and Native Americans, encompassing nearly three centuries of history. The Battle of the Wabash: the U.S. Army's single worst defeat at the hands of Native American forces. The Battle of Wounded Knee: an unfortunate, unplanned event that resulted in the deaths of more than 150 Lakota Sioux men, women, and children. These and other engagements between white settlers and Native Americans were events of profound historical significance, resulting in social, political, and cultural changes for both ethnic populations, the lasting effects of which are clearly seen today. The Encyclopedia of North American Indian Wars, 1607–1890: A Political, Social, and Military History provides comprehensive coverage of almost 300 years of North American Indian Wars. Beginning with the first Indian-settler conflicts that arose in the early 1600s, this three-volume work covers all noteworthy battles between whites and Native Americans through the Battle of Wounded Knee in December 1890. The book provides detailed biographies of military, social, religious, and political leaders and covers the social and cultural aspects of the Indian wars. Also supplied are essays on every major tribe, as well as all significant battles, skirmishes, and treaties.
