**North American F-100 Super Sabre** Peter E. Davies, 2003

The North American F-100 Super Sabre was the world's first jet fighter capable of supersonic speed in level flight. This expert, detailed history presents the last word on this well-loved aircraft.

*F-100 Super Sabre Units of the Vietnam War* Peter E.

Davies, David Menard, 2012-11-20 The F-100 Super Sabre may have been superseded by the superior technology of the F-105 Thunderchief and the F-4 Phantom by the Vietnam War it remained in service. The Super Sabre was deployed as an air defence fighter, and was later given nuclear capability. The F-100's toughness, adaptability and reliability made it ideal for the incessant missions that were demanded by close support and counter-insurgency missions. 242 Super Sabres and 87 aircrew were lost during the war but their role, particularly in developing the tactics used for discovering and destroying SAM sites, was invaluable. This book describes some of the most important actions that the F-100 took part in, looks at the pilots who flew it and analyses the impact of the aircraft on the war.

*F-100D/F Super Sabre Walk Around* Len Lundh, Don Greer, Dave Gebhardt, Matheu Spraggins, 2007-01-01 F-100D/F Super Sabre Walk Around. North American's F-100 Super Sabre was the first of the famous Century Series fighters, and America's first capable of supersonic speed in level flight. During the Cold War, it stood as a guardian of freedom around the world. Capable of carrying nuclear weapons while operating from bases in the US, Pacific and Europe, it helped deter communist aggression. In Vietnam, Super Sabres shouldered the bulk of the attack role for many years provided a platform for high-speed forward Air Control, and pioneered the Wild Weasel concept before the F-105s and F4s took on the role. Under peaceful skies, performances by the USAF Skyblazers and Thunderbirds served to awe the crowds and inspire future pilots. At the end of their service lives, more than 200 F-100s served as target drones, training the crews of later generations of fighters. More than 150 photographs, line drawings and 20 color profiles.

**American Aviation Icons 1** Theodore Gianna, 2022-07-08 The F-100 Super Sabre, was the first of the elite jets; the famous 'Century Series'. It was also America's first jet to enter the Vietnam War, where it performed well as a close support fighter-bomber. This book offers a concise history of the F-100 Super Sabre, and describes the different variants. There is also a section in the book which recounts some of the more important operations that the Super Sabre performed in the Vietnam conflict, like the 'Wild Weasel' operations, and the 'Misty' 'Forward Air Control' (FAC) operations. The book also includes over 40 paint schemes of the aircraft, and it is mainly composed of color photos of the F-100 Super Sabre. Maybe the 'Hun', as the jet was nicknamed, was not the perfect jet fighter, but it broke several records throughout its illustrious service life, and it will forever be remembered for being the first jet in the world to break the sonic barrier in level flight. No one can ever take that away from the 'HUN'.

*F-100 Super Sabre Units of the Vietnam War* Peter E. Davies, David Menard, 2011-08-23 Osprey's examination of the F-100 Super Sabre Units' participation in the Vietnam War (1955-1975). While the F-105 Thunderchief and F-4 Phantom flew the majority of the fighter-bomber missions over North Vietnam, the Thunderchief's service predecessor, the F-100 Super Sabre stayed on to fight the air war in South Vietnam until June 1971. Although it was designed as an air defence fighter, and was later given nuclear capability as the mainstay of Tactical Air Command's deterrent posture, it was the F-100's toughness, adaptability and reliability that made it ideally suited to the incessant 'taxi-rank' close support and counter-insurgency missions in Vietnam. The jet's four 20 mm cannon and external loads of bombs, rockets and fire-bombs defeated many enemy incursions, with US troops in contact expressing a preference for the accuracy and skill of F-100 pilots to save them in situations where ordnance had to be dropped very close to their own lines. Many courageous deeds were performed, although 242 F-100s and 87 aircrew were lost in action. Used at the start of Operation Rolling Thunder in March 1965 as an escort for F-105 strikes, the Super Sabre fought MiGs and one pilot made a credible claim for a MiG-17 destroyed, but the more capable F-4 Phantom II soon replaced it in this role. The air-to-ground war was fought by F-100C/D/F pilots from 21 TAC and Air National Guard squadrons at six bases in South Vietnam and Thailand. From September 1965, a number of two-seat F-100Fs were equipped to detect and pinpoint SA-2 missile sites, and they led F-105s in to destroy them in hazardous missions that founded the suppression of enemy air defences (SEAD) techniques developed for F-105F and F-4C 'Wild Weasel' aircraft later in the war. Other F-100Fs replaced fragile piston-engined forward air control (FAC) aircraft, providing more survivable high-speed airborne management of strike missions. Maj George Day, awarded the Medal of Honor in 1973, was the first leader of this

'Misty FAC' unit. The aircraft's strengths and eccentricities will be examined through analysis of its performance and the anecdotes of those who flew and serviced it.

**Bury Us Upside Down** Rick Newman,Don

Shepperd,2007-12-18 They had the most dangerous job n the Air Force. Now Bury Us Upside Down reveals the never-before-told story of the Vietnam War's top-secret jet-fighter outfit-an all-volunteer unit composed of truly extraordinary men who flew missions from which heroes are made. In today's wars, computers, targeting pods, lasers, and precision-guided bombs help FAC (forward air controller) pilots identify and destroy targets from safe distances. But in the search for enemy traffic on the elusive Ho Chi Minh Trail, always risking enemy fire, capture, and death, pilots had to drop low enough to glimpse the telltale signs of movement such as suspicious dust on treetops or disappearing tire marks on a dirt road (indicating a hidden truck park). Written by an accomplished journalist and veteran, Bury Us Upside Down is the stunning story of these brave Americans, the men who flew in the covert Operation Commando Sabre-or "Misty"-the most innovative air operation of the war. In missions that lasted for hours, the pilots of Misty flew zigzag patterns searching for enemy troops, vehicles, and weapons, without benefit of night-vision goggles, infrared devices, or other now common sensors. What they gained in exhilarating autonomy also cost them: of 157 pilots, 34 were shot down, 3 captured, and 7 killed. Here is a firsthand account of

courage and technical mastery under fire. Here, too, is a tale of forbearance and loss, including the experience of the family of a missing Misty flier—Howard K. Williams—as they learn, after twenty-three years, that his remains have been found. Now that bombs are smart and remote sensors are even smarter, the missions that the Mistys flew would now be considered no less than suicidal. *Bury Us Upside Down* reminds us that for some, such dangers simply came with the territory.

**The F-100 Units of USAFE** Doug Gordon, 2024-01-07 The North American F-100 Super Sabre served with the United States Air Forces in Europe for a total of sixteen years at the height of the Cold War. The primary mission of the USAFE units that flew the 'hun' was the delivery of tactical nuclear weapons on targets in the Soviet Union and Eastern Europe. The nuclear mission was practised on the gunnery ranges of Europe, the Mediterranean region, and North Africa. The pilots, called bomb commanders, sat alert all over Europe to take off at a moment's notice and fly alone into the heart of enemy territory carrying just one atomic bomb often more powerful than those dropped on the cities of Hiroshima and Nagasaki at the end of the Second World War. These dedicated pilots acknowledged that many of their targets were situated so far away that there would be no prospect of return to their home base and their families and friends. The secondary mission of the USAFE F-100 units was to prepare for conventional war.

**F-100 Super Sabre** Lou Drendel, 2019 The North American F-100 Super Sabre was the first of the Century Series of American fighters. It was also the most heavily produced of that series, and as such, was flown by more USAF fighter pilots than any other Century Series fighter. It was at the leading edge of supersonic fighters (It was the first American airplane capable of level supersonic speeds) and those pilots who flew this pioneering fighter have many stories to tell of their experiences. Many of those stories appear in this book, whether in testing, peacetime

Cold War missions or combat in Vietnam. Those stories are augmented by more than 200 color photos and illustrations, many of which come from hi-resolution private collections.--
