

Northrop F 5

Frederick A. Johnsen

Northrop F-5 Gérard Paloque,2013 Although it was originally intended to provide the USAF with a lightweight fighter, in the end the Northrop F-5 had rather a marginal career in the United States, which used it mainly for training pilots in aerial combat. On the other hand it was a real success in the export market, with more than twenty countries around the world choosing this little effective twin-engined fighter which above all was cheap, particularly when it was partly subsidized by the United States. Its success continued with the improved version, the Tiger II, so much so that in all more than 2600 examples of all versions of the F-5 came of the production lines with a few of them still flying nowadays in some air forces, thanks to the various update programs which have permitted air forces to envisage prolonging their use until 2015-20.

Northrop F-5 Case Study in Aircraft Design William G. Stuart,1978

Northrop F-5/F-20/T-38 Frederick A. Johnsen,2006 In the late 1950s, an era when some Cold War allies still flew cast-off World War II propeller-driven bombers and fighters, Northrop seized on the need to deliver modern warplanes with modest maintenance requirements. The shapers of American foreign policy needed an economical way to give allies supersonic performance. The U.S. Air Force and Navy only tangentially used the F-5, but decades of new American fliers honed their skills on the similar T-38 variant, a high-performance training aircraft. The F-5, an all-out air superiority fighter, possesses remarkable performance to match its classy good looks. It has served U.S. allies (and a few former allies like Iran) for decades. Many still fly, including F-5Es, F-5Fs, and

modified F-5Ns used by the U.S. Navy as aggressor training aircraft at its famous Top Gun school. The T-38 carries the sleek lines into the training world. And the powerful single-engine F-20, the ultimate iteration of this Northrop line, brought the basic F-5 premise forward into a new era. Vintage and modern photos in this WarbirdTech volume depict F-5s, T-38s, and the few F-20s in many guises; technical drawings and detail photos show the inner workings. Declassified documents illuminate the story of USAF F-5s combat-tested in Vietnam. Color photos capture variations in camouflage and markings since 1959. The enduring story of the Northrop F-5 series and the aircraft it spawned is overdue and timely for an audience that increasingly seeks reliable information and photos about Cold War aircraft.

F-5 Illustrated Lou Drendel, 2020-03-28 The Northrop F-5 series is one of the longest-serving fighters in the world. The Freedom Fighter was the first 'lightweight fighter and the first international fighter serving in air forces throughout the free world. The F-5 Tiger II is even more prolific and is still in service with USAF and US Navy aggressor squadrons. The T-38 Talon was derived from the original NF-156 design that produced the Freedom Fighter. The T-38 has trained over 70,000 USAF pilots and is still in service 60 years after its first flight. It is still used by NASA and others. This book contains dozens of very high resolution color photos from the remarkable collection of Gerrit Kok as well as official DOD photos. It covers all the air forces that flew the F-5 series.

Iranian Tigers at War Babak Taghvaei, 2015 The development of the F-5 lightweight supersonic fighter in the mid 1950s was almost a gamble for the Northrop Corporation, but ultimately resulted in one of most commercially successful combat aircraft in modern history. Iran was one of its major export customers, yet the long and often violent history of deployment of the F-5 in that country has largely escaped attention of historians. No less than 309 aircraft of five major variants of the jet - the F-5A, F-5B, RF-5A, F-5E and F-5F - have provided the backbone of the front line strength of the Iranian Air Force since the mid 1960s. Additional examples were clandestinely purchased from Ethiopia and Vietnam in the 1980s. The type bore the brunt of combat operations during the long war with Iraq, 1980-1988, and remains a mainstay of the Islamic Republic of Iran Air Force as of today. This breathtaking account provides a detailed chronological history of the F-5 in combat service in Iran, a history dominated by long-range strikes against some of best defended targets inside Iraq, and by thousands of dramatic close-air-support and reconnaissance sorties, but also fierce air combats against the then most modern fighter types in Iraqi service, including the MiG-23s and MiG-25s. It is completed with practically unknown stories of their combat presence in Pakistan, Afghanistan and the war against drug traffickers in recent years. Good though the F-5 has been, the advances of domestic Iranian aircraft building companies have resulted in attempts to continue the F-5 line with further redesign and developments, resulting in a number of indigenous variants. Combined, this means that the diverse and involved story about one of most interesting military aircraft of modern times is still far from over. The author's detailed text is fully supported by an extensive selection of photographs and color profiles. Middle East@War - following on from our highly successful Africa@War series, Middle East@War replicates the same format - concise, incisive

text, rare images and high quality color artwork providing fresh accounts of both well-known and more esoteric aspects of conflict in this part of the world since 1945.

Northrop F-5 Case Study in Aircraft Design STUART,2001-11 This case study describes the overall development of the T-38/F-5 family of fighter/trainer aircraft in terms of configuration development motivation and constraints. Northrop F-5, du Freedom Fighter au Tiger II 1954-2012 Gérard Paloque, 2013-05-09 Prévu à l'origine pour doter l'USAF d'un chasseur léger, le Northrop F-5 n'eut finalement qu'une carrière marginale aux Etats - Unis, qui l'utilisa essentiellement pour l'entraînement des pilotes au combat aérien. C'est en revanche à l'exportation qu'il connut un véritable succès, plus d'une vingtaine de pays, sur quasiment tout le globe, choisissant ce petit biréacteur efficace et surtout bon marché, notamment quand son achat était en partie financé par les Etats - Unis. Et ce succès se poursuivit avec sa version améliorée, le Tiger II, si bien qu'au total, toutes versions confondues, plus de 2600 exemplaires du F-5 sortirent des chaînes, une partie d'entre eux volant encore aujourd'hui dans certaines armées de l'Air, les différentes remises à niveau leur permettant d'envisager une utilisation jusqu'en 2015-2020...

Northrop F-5E Tigre II/III 813 Julio Arrospide, 2023-10-08 Aviation Art & History's fifth monograph in the Aircraft with History series tells the story of the Chilean Air Force (FACH) Northrop F-5E Tigre II/III No. 813. In twenty-four pages, it covers details of its construction and service with the FACH. This F-5E operated for 34 years with the Group of Aviation No. 7 at Cerro

Moreno Air Base in Antofagasta, facing crises with Argentina in 1978 and 1982. In the mid-1990s, it was modified to the Tigre III standard at ENAER by Israeli IAI technicians and Chilean technicians. In 1997, it gained the capability for in-flight refueling by specialists from the American factory Tiger Century. At the end of 1998, it participated in the deployment of Group No. 7 to the United States for the Red Flag Exercise. In 2010, it was transferred along with the rest of the F-5E/F fleet to Group No. 12, operating at Chabunco Air Base in Punta Arenas. It is currently still in service, having reached the milestone of 60,000 flight hours for the F-5 material in the FACH in 2016.

Northrop Flying Wings Graham M. Simons,2013-06-19 The aviation historian and author of Memphis Belle presents an authoritative analysis of the groundbreaking, post-WWI series of military aircraft. In the years following the First World War, a new imperative arose in aviation technology: stealth, speed, and precision. American aircraft designer Jack Northrop developed a streamlined craft that did away with superfluous appendages, including the weighty fuselage and tail units. This was an extreme measure, but Northrop was determined to push aircraft design to a new level. Eliminating both the fuselage and tail meant placing the pilot, the engines, and the payload entirely within the wing envelope. The resulting craft, Northrop's flying wings, were some of the most spectacular machines ever to grace the skies. With barely any vertical surfaces at all, they looked like something from the realm of science fiction. Indeed, one even appeared in the film version of H.G. Wells' War of the Worlds. Written off by many as a mere novelty, the development of these unique bombers provided aeronautical innovations that paved the way for a raft of new designs. During the 1970s, when the United States needed a new strategic bomber to replace the B-52 Superfortress, the flying wing design was brought to the fore once again. The B-2 Spirit was born

out of this, continuing the legacy of this stealthy design. This craft, along with the B-35, the eight-engined YB-49 and the YRB-49A, are all highlighted in this authoritative history. Detailed analyses of each design, set within a wider historical context, make for a compelling record of this landmark design.

Sierra Hotel : flying Air Force fighters in the decade after Vietnam ,2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

Northrop Yf-23 Atf - Op Paul Metz,2016-12-07 The photos in this edition are black and white.

The Northrop YF-23 stealth fighter was evaluated with the Lockheed YF-22. Two aircraft were built, PAV-1 and PAV-2. The Chief Test Pilot for the program was Paul Metz, the author of this book. Although the YF-22 was eventually chosen for production, the YF-23 ATF proved to be a very capable and superb example of Low Observable (LO) fighter technology. This book covers origins of the ATF requirement, other manufacturers submissions including alternate Northrop designs, RFI phase May 1981 to May 1982, CDI phase May 1983 to May 1984, ATF DEM/VAL phase 1986 through 1991, Northrop ATF evolution 1971-1986, ATF team, construction, flight test program, engines, summary and selection, NATF proposal, F/B-23 proposal, aircraft nuts-and-bolts, where are they now, program patches, YF-23 pilots, and YF-23 models.
