F-5 Tigers Over Vietnam Anthony J. Tambini,2001

Northrop F-5 Gérard Paloque,2013 Although it was originally intended to provide the USAF with a lightweight fighter, in the end the Northrop F-5 had rather a marginal career in the United States, which used it mainly for training pilots in aerial combat. On the other hand it was a real success in the export market, with more than twenty countries around the world choosing this little effective twin-engined fighter which above all was cheap, particularly when it was partly subsidized by the United States. Its success continued with the improved version, the Tiger II, so much so that in all more than 2600 examples of all versions of the F-5 came of the production lines with a few of them still flying nowadays in some air forces, thanks to the various update programs which have permitted air forces to envisage prolonging their use until 2015-20.

Northrop F-5 Freedom Fighter and Tiger II Robert Pied,Nicolas Deboeck,2023-06-30 This book features a close-up of both the F-5E/F/N Tiger II and the F-5A/BM Freedom Fighter. Included is a plethora of walk-around and action photography.

F-5 Illustrated Lou Drendel,2020-03-28 The Northrop F-5 series is one of the longest-serving fighters in the world. The Freedom Fighter was the first 'lightweight fighter and the first international fighter serving in air forces throughout the free world. The F-5 Tiger II is even more prolific and is still in service with USAF and US Navy aggressor squadrons. The T-38 Talon was derived from the original NF-156 design that produced the Freedom Fighter. The T-38 has trained over 70,000 USAF pilots and is still in service 60 years after its first flight. It is still used by NASA and others. This book contains dozens of very high resolution color photos from the remarkable collection of Gerrit Kok as well as official DOD photos. It covers all the air forces that flew the F-5 series.

Northrop F-5, du Freedom Fighter au Tiger II 1954-2012 Gérard Paloque,2013-05-09 Prévu à l'origine pour doter l'USAF d'un chasseur léger, le Northrop F-5 n'eut finalement qu'une carrière marginale aux Etats - Unis, qui l'utilisa essentiellement pour l'entraînement des pilotes au combat aérien. C'est en revanche à l'exportation qu'il connut un véritable succès, plus d'une vingtaine de pays, sur quasiment tout le globe, choisissant ce petit biréacteur efficace et surtout bon marché, notamment quand son achat était en partie financé par les Etats - Unis. Et ce succès se poursuivit avec sa version améliorée, le Tiger II, si bien qu'au total, toutes versions confondues, plus de 2600 exemplaires du F-5 sortirent des chaînes, une partie d'entre eux volant encore aujourd'hui dans certaines armées de l'Air, les différentes remises à niveau leur permettant d'envisager une utilisation jusqu'en 2015-2020...

Iranian Tigers at War Babak Taghvaei,2015 The development of the F-5 lightweight supersonic fighter in the mid 1950s was almost a gamble for the Northrop Corporation, but ultimately resulted in one of most commercially successful combat aircraft in modern history. Iran was one of its major export customers, yet the long and often violent history of deployment of the F-5 in that country has largely escaped attention of historians. No less than 309 aircraft of five major variants of the jet - the F-5A, F-5B, RF-5A, F-5E and F-5F - have provided the backbone of the front line strength of the Iranian Air Force since the mid 1960s. Additional examples were clandestinely purchased from Ethiopia and Vietnam in the 1980s. The type bore the brunt of combat operations during the long war with Iraq, 1980-1988, and remains a mainstay of the Islamic Republic of Iran Air Force as of today. This breathtaking account provides a detailed chronological history of the F-5 in

combat service in Iran, a history dominated by long-range strikes against some of the best defended targets inside Iraq, and by thousands of dramatic close-air-support and reconnaissance sorties, but also fierce air combats against the then most modern fighter types in Iraqi service, including the MiG-23s and MiG-25s. It is completed with practically unknown stories of their combat presence in Pakistan, Afghanistan and the war against drug traffickers in recent years. Good though the F-5 has been, the advances of domestic Iranian aircraft building companies have resulted in attempts to continue the F-5 line with further redesign and developments, resulting in a number of indigenous variants. Combined, this means that the diverse and involved story about one of the most interesting military aircraft of modern times is still far from over. The author's detailed text is fully supported by an extensive selection of photographs and color profiles. Middle East@War - following on from our highly successful Africa@War series, Middle East@War replicates the same format - concise, incisive text, rare images and high quality color artwork providing fresh accounts of both well-known and more esoteric aspects of conflict in this part of the world since 1945.

Northrop F-5/F-20/T-38 Frederick A. Johnsen, 2006 In the late 1950s, an era when some Cold War allies still flew cast-off World War II propeller-driven bombers and fighters, Northrop seized on the need to deliver modern warplanes with modest maintenance requirements. The shapers of American foreign policy needed an economical way to give allies supersonic performance. The U.S. Air Force and Navy only tangentially used the F-5, but decades of new American fliers honed their skills on the similar T-38 variant, a high-performance training aircraft. The F-5, an all-out air superiority fighter, possesses remarkable performance to match its classy good looks. It has served U.S. allies (and a few former allies like Iran) for decades. Many still fly, including F-5Es, F-5Fs, and modified F-5Ns used by the U.S. Navy as aggressor training aircraft at its famous Top Gun school. The T-38 carries the sleek lines into the training world. And the powerful single-engine F-20, the ultimate iteration of this Northrop line, brought the basic F-5 premise forward into a new era. Vintage and modern photos in this WarbirdTech volume depict F-5s, T-38s, and the few F-20s in many guises; technical drawings and detail photos show the inner workings. Declassified documents illuminate the story of USAF F-5s combat-tested in Vietnam. Color photos capture variations in camouflage and markings since 1959. The enduring story of the Northrop F-5 series and the aircraft it spawned is overdue and timely for an audience that increasingly seeks reliable information and photos about Cold War aircraft.

Kites, Birds & Stuff - Northrop Aircraft P.D. Stemp, 2019-08-27 The aviation history of Northrop aircraft. From their very beginnings up to their later years. Their products over numerous years. Types with their performance, construction, weights, dimensions, first flights, power plants, plans in in some cases their demise, plus many other hard to find details. Around 495 aircraft details - 202 pictures and 73 plan diagrams.

Northrop F-5E Tigre II/III 813 Julio Arrospide, 2023-10-08 Aviation Art & History's fifth monograph in the Aircraft with History series tells the story of the Chilean Air Force (FACH) Northrop F-5E Tigre II/III No. 813. In twenty-four pages, it covers details of its construction and service with the FACH. This F-5E operated for 34 years with the Group of Aviation No. 7 at Cerro Moreno Air Base in Antofagasta, facing crises with Argentina in 1978 and 1982. In the mid-1990s, it was modified to the Tigre III standard at ENAER by Israeli IAI technicians and Chilean technicians. In 1997, it gained the capability for in-flight refueling by specialists from the American factory Tiger Century. At the end of 1998, it participated in the deployment of Group No. 7 to the United States for the Red Flag Exercise. In 2010, it was transferred along with the rest of the F-5E/F fleet to Group No. 12, operating at Chabunco Air Base in Punta Arenas. It is currently still in service, having reached the milestone of 60,000 flight hours for the F-5 material in the FACH in 2016.

Quieting the Boom Lawrence R. Benson,2013

Topgun Days Dave Baranek,2012-10-01 The fascinating history of one man's rise from naval flight officer to Hollywood hero.

Sierra Hotel : flying Air Force fighters in the decade after Vietnam ,2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

Northrop F-5/F-20 Jerry Scutts,1986 Beskriver udviklingen og anvendelsen af T-38 og F-5 samt om det avancerede F-20-fly.

Northrop F-20 Tigershark Paul Metz,2023-08-14 The F-20 was conceived as the next evolution of the Fighter for Export (FX), a concept that had been in place for over 50 years and a formalized U.S. government policy for over 25 years. Northrop invested \$1.2 billion of its own money on that policy. However, no production contract followed, not because of any technical deficiency but because of a changing government policy on what our allies would receive in U.S. military aid. This book traces the development of the 3 generations of a 1955 design called the N-156 which became the T-38 and the F-5A/B. The F-5A/B evolved into the F-5E/F and finally the F-20 Tigershark. Each step in that progression was to keep up with the latest Soviet fighters. The F-20 was designed to counter the Mig-29 and Su-27, 4th generation fighters. The book reveals the unique design goals that produced a reliable, easily maintained, easy to fly, agile fighter-bomber that was affordable for many allied air forces in the wake of WW II. The story is told from the first

person accounts (Tigershark Voices) of the struggles and triumphs to create a new type fighter in a world of increasingly complex, expensive and maintenance-intensive fighters. Other Tigershark Voices bring the reader into the F-5 and F-20 cockpits as the pilots describe flying this breed of fighters. This definitive Tigershark book features original documents and photographs, most in color and previously unpublished. Original documents of USAF struggles to name the Tigershark the F-20, Presidential directives to build a fighter for export and limitations on sales, performance with no government funding are a few of the many examples of original documents pivotal to the F-20 story. Also included are the various F-20 follow-on proposals: RF-20A/B, F-20B/C/E/F and Lavi fighters. As with all Ginter books, the F-20 Tigershark also presents information of interest to the scale modeler.

Flying Dragons Robert C. Mikesh, 2005 This book contains the most complete history of the South Vietnamese Air Force that surviving records and accounts can convey. In many ways, this is an American story; since VNAF was organized, trained, equipped, and attained its maximum strength under the tutelage of the US military. In view of numbers of aircraft, the South Vietnamese Air Force emerged as the fourth largest Air Force in the world-behind Communist China, the United States, and the Soviet Union. This is not a political history of the Vietnam War; rather it is the story of the transition of the VNAF from an under-trained and ill-equipped French Air Force auxiliary unit to a size during its 20-year life span, so large that it was almost incapable of sustaining itself with sufficient numbers of trained personnel and support materials. This is an up-dated version of the book by this same name and author published in 1988, which now features an abundance of color photographs and new incites of the air forces role in that war that have settled with time.
