Droplets of Life Vladimir N Uversky,2022-11-09 Droplets of Life: Membrane-Less Organelles, Biomolecular Condensates, and Biological Liquid-Liquid Phase Separation provides foundational information on the biophysics, biogenesis, structure, functions, and roles of membrane-less organelles. The study of liquid-liquid phase separation has attracted a lot of attention from disciplines such as cell biology, biophysics, biochemistry, and others trying to understand how, why, and what roles these condensates play in homeostasis and disease states in living organisms. This book's editor recruited a group of international experts to provide a current and authoritative overview of all aspects associated with this exciting area. Sections introduce membrane-less organelles (MLOs) and biomolecular condensates; MLOs in different sizes, shapes, and composition; and the formation of MLOs due to phase separation and how it can tune reactions, organize the intracellular environment, and provide a role in cellular fitness. . Presents the first book to establish the foundations of this exciting research area Combines biophysics, structural and cell biology, and biochemistry perspectives into a single volume Edited and authored by world-leading scientists Covers basic physical and biological principles and health and disease implications

Parrots Mike Parr,Tony Juniper,2010-07-30 This is the first book created primarily for the field identification of parrots, one of the most familiar and colorful groups of birds. From the mighty. macaws to the diminutive pygmy parrots, the 350 species of parrots include cockatoos, parakeets, lovebirds, and Budgerigar. Most are brightly colored or even gaudy, but a few are drab, and some are nocturnal and flightless. Parrots, found throughout most of the warmer regions of the world, occur in greatest numbers in Australasian and South America. This book includes 88 superb color illustrations of every species and most identifiable subspecies of parrot, as well as range maps of their locations. It offers many firsthand insights into the ecology of each species, vocalizations, life cycle characteristics, and geographical variation. It also provides up-to-date information on the conservation status of those species of parrots that are threatened or endangered.

Contemporary Persian Gulf P.R. Kumaraswamy,Md. Muddassir Quamar,2018-02-13 Since the outbreak of the Arab Spring the Middle East is going through a turbulent phase as violence, internal conflicts and civil wars are ravaging a number of countries. Even relatively stable Gulf monarchies are not untouched by the impact of popular demand for change. For India, the Persian Gulf is an extended neighbourhood and the region of vital importance receives scant attention. In the light of the Arab Spring, Iranian nuclear deal and the rise of ISIS, it has become impossible for India to be indifferent to the changing internal dynamics. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Dwell ,2006-11 At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real

life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Stress and Environmental Regulation of Gene Expression and Adaptation in Bacteria Frans J. de Bruijn, 2016-07-13 Bacteria in various habitats are subject to continuously changing environmental conditions, such as nutrient deprivation, heat and cold stress, UV radiation, oxidative stress, dessication, acid stress, nitrosative stress, cell envelope stress, heavy metal exposure, osmotic stress, and others. In order to survive, they have to respond to these conditions by adapting their physiology through sometimes drastic changes in gene expression. In addition they may adapt by changing their morphology, forming biofilms, fruiting bodies or spores, filaments, Viable But Not Culturable (VBNC) cells or moving away from stress compounds via chemotaxis. Changes in gene expression constitute the main component of the bacterial response to stress and environmental changes, and involve a myriad of different mechanisms, including (alternative) sigma factors, bi- or tri-component regulatory systems, small non-coding RNA's, chaperones, CRIS-Cas systems, DNA repair, toxin-antitoxin systems, the stringent response, efflux pumps, alarmones, and modulation of the cell envelope or membranes, to name a few. Many regulatory elements are conserved in different bacteria; however there are endless variations on the theme and novel elements of gene regulation in bacteria inhabiting particular environments are constantly being discovered. Especially in (pathogenic) bacteria colonizing the human body a plethora of bacterial responses to innate stresses such as pH, reactive nitrogen and oxygen species and antibiotic stress are being described. An attempt is made to not only cover model systems but give a broad overview of the stress-responsive regulatory systems in a variety of bacteria, including medically important bacteria, where elucidation of certain aspects of these systems could lead to treatment strategies of the pathogens. Many of the regulatory systems being uncovered are specific, but there is also considerable "cross-talk" between different circuits. *Stress and Environmental Regulation of Gene Expression and Adaptation in Bacteria* is a comprehensive two-volume work bringing together both review and original research articles on key topics in stress and environmental control of gene expression in bacteria. Volume One contains key overview chapters, as well as content on one/two/three component regulatory systems and stress responses, sigma factors and stress responses, small non-coding RNAs and stress responses, toxin-antitoxin systems and stress responses, stringent response to stress, responses to UV irradiation, SOS and double stranded systems repair systems and stress, adaptation to both oxidative and osmotic stress, and desiccation tolerance and drought stress. Volume Two covers heat shock responses, chaperonins and stress, cold shock responses, adaptation to acid stress, nitrosative stress, and envelope stress, as well as iron homeostasis, metal resistance, quorum sensing, chemotaxis and biofilm formation, and viable but not culturable (VBNC) cells. Covering the full breadth of current stress and environmental control of gene expression studies and expanding it towards future advances in the field, these two volumes are a one-stop reference for (non) medical molecular geneticists interested in gene regulation under stress.

Ancient Records of Egypt: The twentieth to the twenty-sixth dynasties James Henry Breasted, 2001 With volume 4 of *Ancient Records of Egypt*, James Henry Breasted brings us to the end of the self-governed era of ancient Egyptian civilization. Chief among the documents contained in this volume are the inscriptions from the Medinet Habu Temple, one of the most completely preserved temples of Egypt, and the great Papyrus Harris, the largest (133 feet long) and most sumptuous papyrus extant, 95 percent of which Breasted was the first to study closely. Together these documents present a detailed record of the reign and benefactions of Ramesses III, whose reign lasted more than thirty years. Volume 4 includes intriguing records of the harem conspiracy and legal documents that indicate the extent of robberies of royal tombs. Records of the Nile levels at Karnak provide important chronological landmarks, while the Stela of Piye (Piankhi), which documents the Nubian kingdom already in existence as a full-fledged power, provides information on the internal political climate of Egypt during a time when no aggressive monarch controlled the whole country. Breasted also notes where these ancient Egyptian records intersect with accounts of the same events from other sources, such as the mutiny of Psamtik I's troops as inscribed on the alabaster statue of Nesuhor and as narrated by Herodotus. In effect, *Ancient Records of Egypt* offers a valuable dual record. On the one hand, Breasted presents the events and personages of ancient Egypt as recorded in the documents. On the other hand, he presents a history of the documents themselves. Fragmentary or partially destroyed, carved on temple and tomb walls or written on fragile scrolls of leather or papyrus, even inscribed on the coffins and temple linens of the royal and priestly mummy wrappings, these records offer an irreplaceable primary source on a fascinating civilization.

Readers will be guided through each step of determining priority order using the AHP method through a case study accompanied by mathematical calculations. In addition, readers will also be guided step-by-step in implementing the AHP method in a decision support system to determine the scholarship recipients using Python GUI and MySQL. Readers will be guided step-by-step in designing a decision support system and realizing each design made using Python GUI and MySQL. The ultimate goal of this book is to enable readers to build a decision support system application independently by applying the AHP method to determine the scholarship recipients in a college using Python GUI and MySQL.

Competitiveness Analysis And Development Strategies For 33 Indonesian Provinces Tan Khee Giap, Amri Mulya, Tan Kong Yam, 2013-03-05

Indonesia is on the cusp of transformative take-off, poised to become a major economic power not just in Asia, but also on the global-stage. This book is a pioneering attempt in comprehensively assessing all attributes, conditions and policies for 33 Indonesian provinces and Indonesia's trajectory as an emerging middle power. It contains papers and data-sets presented in July 2012, at ACI's signature Annual Conference. The information that was shared at the conference and presented in the book posit a future where tens of millions of Indonesians will be lifted out of poverty to become a self-sustaining middle-class, which will in turn drive the country into a global leadership role in the 21st century. It is a compelling value-added proposition for policy simulations enabling policy-makers to identify relative weaknesses, strengths, threats and opportunities of individual 33 provinces, guiding them to prioritise areas in crafting policies and development strategies. It is a resource for governments and policy-makers seeking to accelerate economic growth and poverty alleviation. Overall, the book is an excellent introduction to the current and future competitiveness of Indonesia's provinces. The reader should approach the rankings with an appropriate knowledge of Indonesia's political and economic history." Adiwan Aritenang Institute of Southeast Asian Studies, Singapore "Despite the complexity of the calculations behind the rankings, the authors present their findings in figures and tables that are easy to read and understand." Regulating with RNA in Bacteria and Archaea Gisela Storz, Kai Papenfort, 2020-07-10 Revealing the many roles of RNA in regulating gene

expression For decades after the discoveries of messenger RNA, transfer RNA, and ribosomal RNA, it was largely assumed that the role of RNA in the cell was limited to shuttling the genomic message, chaperoning amino acids, and toiling in the ribosomes. Eventually, hints that RNA molecules might have regulatory roles began to appear. With the advent of genomics and bioinformatics, it became evident that numerous other RNA forms exist and have specific functions, including small RNAs (sRNA), RNA thermometers, and riboswitches to regulate core metabolic pathways, bacterial pathogenesis, iron homeostasis, quorum sensing, and biofilm formation. All of these functions, and more, are presented in *Regulating with RNA in Bacteria and Archaea*, written by RNA biologists from around the globe. Divided into eight sections-RNases and Helicases, Cis-Acting RNAs, Cis Encoded Base Pairing RNAs, Trans-Encoded Base Pairing RNAs, Protein Titration and Scaffolding, General Considerations, Emerging Topics, and Resources-this book serves as an excellent resource for established RNA biologists and for the many scientists who are studying regulated cellular systems. It is no longer a fair assumption that gene expression regulation is the provenance of proteins only or that control is exerted primarily at the level of transcription. This book makes clear that regulatory RNAs are key partners along with proteins in controlling the complex interactions and pathways found within prokaryotes.

Proceedings of the 1st International Hospitality, Travel and Event Conference (IHTREC 2023) Derinta Entas,2023-06-12 This is an open access book.Reinventing Hospitality, Travel, and Event for a Future DirectionThe tourism industry is an important sector in the world, particularly in terms of its ability to create jobs, generate income and contribute to people's well-being. While of its importance, the tourism industry is vulnerable to external disruptions. Historically, the tourism industry has been vulnerable to terrorist attacks, recessions, pandemics, natural disasters, and the effects of climate change. Such challenges have also forced the industry to accelerate innovation and transformation to survive and thrive. Technology and digitalization are more commonly used in businesses and organizations' operations. There are shifts in consumer behavior as a result of disruptions. Travelers demand safer products and services and more efficient ways to travel. New products and services emerge as a result of the disruptions, for example, trends in virtual conferences, cloud kitchens, staycations, and many more.

Industry 4.0 Elena B. Zavyalova,Elena G. Popkova,2021-08-09 This book reflects the futuristic scientific view of the consequences of transition to Industry 4.0 for climate change. The authors present a systemic overview of the current negative consequences of digitization for the environment, new outlines of the energy sphere in Industry 4.0 and the change of the environment pollution level in Industry 4.0. The book also analyses the ecological consequences of growth and development of Industry 4.0, and considers Industry 4.0 as an alternative to fighting climate change. The book presents a view on fighting climate change in Industry 4.0 from the positions of shifting the global community’s attention from environment protection to formation of the digital economy. A logical continuation of this book is a view from the opposite side, which would allow reflecting the contribution of Industry 4.0 into fighting climate change and the perspectives of harmonization of these top-priority directions of the global economy’s development. This book will be of interest to academics and practitioners interested in climate change and development of Industry 4.0, as well contributing to a national economic policy for fighting climate change and corporate strategies of sustainable development in Industry 4.0.
