**When Universes Collide** Jacob Emerald, Videocracy Kevin Allocca, 2018-01-25 From YouTube's Head of Culture and Trends, a rousing and illuminating behind-the-scenes exploration of internet video's massive impact on our world. Whether your favorite YouTube video is a cat on a

Roomba, "Gangnam Style," the "Bed Intruder" song, an ASAPscience explainer, Rebecca Black's "Friday," or the "Evolution of Dance," Kevin Allocca's Videocracy reveals how these beloved videos and famous trends--and many more--came to be and why they mean more than you might think. YouTube is the biggest pool of cultural data since the beginning of recorded communication, with four hundred hours of video uploaded every minute. (It would take you more than sixty-five years just to watch the vlogs, music videos, tutorials, and other content posted in a single day!) This activity reflects who we are, in all our glory and ignominy. As Allocca says, if aliens wanted to understand our planet, he'd give them Google. If they wanted to understand us, he'd give them YouTube. In Videocracy, Allocca lays bare what YouTube videos say about our society and how our actions online--watching, sharing, commenting on, and remixing the people and clips that captivate us--are changing the face of entertainment, advertising, politics, and more. Via YouTube, we are fueling social movements, enforcing human rights, and redefining art--a lot more than you'd expect from a bunch of viral clips.

*Global Arts Leadership in the Digital Age*  
Alexandra Solea, Giosuè Prezioso, 2022-11-25 This book gathers some of the world's most respected voices from the performing and visual art industries to discuss, through case studies and critical commentaries, how technology and art have created some of the most iconic cultural products in recent decades. Through their work in the crypto, metaverse, gamification, robotics, and artificial intelligence realms, the authors share their experiences from a conceptual, managerial, economic, and ethical perspective, providing both theoretical and tangible tools to a broad spectrum of readers. Through artists, intermediaries, managers, and global art leaders, this book

provides a crescendo of professional and human experiences that solidify in a manual for those young and established cultural practitioners, who are willing to participate in the arts.

**Products of Our Time** David Redhead,2000 A book about design in an age of technological revolution. It explores our relationship with the objects which surround us, arguing that contemporary design-from plastic surgery to Prozac, from landmines to Tamagotchis-is instant cultural history: a window through which we can observe ourselves and perhaps even make sense of our world. Products of Our Time categorises design in the 1990s into a number of key themes. It tracks the move from cheap, 'no-brand' supermarket goods to the up-market minimalism of much of today's packaging; it examines the way in which design is used to create our own identity, including the ways in which we pierce, decorate and change the design of our own bodies; and it looks at the design of electronic objects and the ways in which technology reflects a cultural drift towards violence and high speed. Published to coincide with a major international touring exhibition, starting in Glasgow from November 1999 to February 2000.

Vision, Sensing and Analytics: Integrative Approaches Md Atiqur Rahman Ahad, Atsushi Inoue, 2021-06-05 This book serves as the first guideline of the integrative approach, optimal for our new and young generations. Recent technology advancements in computer vision, IoT sensors, and analytics open the door to highly impactful innovations and applications as a result of effective and efficient integration of those. Such integration has brought to scientists and engineers a new approach—the integrative approach. This offers far more rapid development and scalable architecting when comparing to the traditional hardcore developmental approach. Featuring biomedical and healthcare challenges including COVID-19, we present a collection of

carefully selective cases with significant added-values as a result of integrations, e.g., sensing with AI, analytics with different data sources, and comprehensive monitoring with many different sensors, while sustaining its readability.

**Portugal, Paraíso das Criptomoedas** Inês Rocha, Fábio Monteiro, 2023-05-01 Em Portugal, Paraíso das Criptomoedas, à história do dinheiro digital – desde que foi inventado e pela primeira vez transacionado (em troca de piza) –, os autores juntam as histórias dos primeiros investidores portugueses, incluindo a de um adolescente que pagou a licenciatura e do mestrado em Engenharia Informática com as bitcoins que ganhou a jogar RunScape ou dos fundadores da primeira corretora nacional de criptomoedas, a CriptoLoja. E

demonstram - recorrendo a conversas com políticos e outros especialistas - como, graças ao seu deficiente enquadramento fiscal, Portugal tem sido um autêntico paraíso das criptomoedas, em que é possível transacionar milhões sem pagar impostos ou, sequer, declarar os ganhos às Finanças. Porém, neste paraíso podem surgir tempestades a qualquer momento, como a do “criptoinverno” de 2022. Disso mesmo nos dá conta esta profunda investigação dos premiados jornalistas Fábio Monteiro e Inês Rocha, que aqui reúnem tudo o que se deve saber para começar a investir - com cautela - no dinheiro digital.
