Adaptive Fisheries Governance in Changing Coastal Regions in Japan Akiko Ikeguchi, Takafumi Yokoyama, Seishiro Sakita, 2021-03-09 Japan's fisheries sector is undergoing a major restructuring. The coastal ecological change and natural disasters such as tsunami demand that communities transform or organize resource governance anew. Under the national policy of decentralization to cope with the aging and declining population, the availability of local infrastructure, both physical and social, plays a significant role in the adaptive capacity of the community. This book presents the historical and spatial dynamics of coastal fisheries resource governance in response to different environmental changes, its socio-political context, and challenges raised by academicians. The reader will find the national trends and geographical patterns of the administrative restructuring in the communities and fisheries cooperatives from abundant maps and figures, as well as a rich description of adaptive governance in the scale of region and community by ecological-historical approaches. Comparative analysis of the communities provides a practical framework to understand a variety of local resources in Japan's coastal regions, which will serve as a guide to the development of alternative adaptive governance in community-based small-scale fisheries in the world.

Toxicants of Plant Origin Peter R. Cheeke, 2023-05-31 This comprehensive treatise offers an in-depth discussion of natural toxicants in plants, emphasizing their effects as defenses against herbivory. Coevolution of plants and herbivores are covered with a detailed treatment of toxicant metabolism and systemic effects in mammalian tissues. Consideration of the economic importance of plant toxins, modification by plant breeding, management of toxicosis, and toxicant problems in various geographic areas are included. Each volume offers an extensive description of chemistry, biosynthesis, analysis, distribution in plants, metabolism in mammals and insects, and practical problems in humans and livestock.

The Ikessar Falcon K. S. Villoso, 2020-09-22 Intricate, intimate, and intensely plotted. - Nicholas Eames on The Wolf of Oren-yaro The Ikessar Falcon retains the excellent characterization and intrigue of The Wolf of Oren-yaro while expanding both its world and the plot at a head-spinning rate. It does everything the middle book of a trilogy should with an uncommon degree of authorial skill, and is a thoroughly entertaining read in its own right.—BookPage The stunning sequel to The Wolf of Oren-yaro where the queen of a divided land struggles to unite her people. Even if they despise her. K. S. Villoso is a powerful new voice in fantasy. (Kameron Hurley) The

spiral to madness begins with a single push. Abandoned by her people, Queen Talyien's quest takes a turn for the worst as she stumbles upon a plot deeper and more sinister than she could have ever imagined, one that will displace her king and see her son dead. The road home beckons, strewn with a tangled web of deceit and impossible horrors that unearth the nation's true troubles - creatures from the dark, mad dragons, and men with hearts hungry for power. To save her land, Talyien must confront the myth others have built around her: Warlord Yeshin's daughter, symbol of peace, warrior and queen, and everything she could never be. The price of failure is steep. Her friends are few. And a nation carved by a murderer can only be destined for war. The Discovery and Utility of Chemical Probes in Target Discovery Paul Brennan,Saleta Vazquez

Rodriguez,2020-11-17 Numerous genetic methods can be utilised to link a phenotype to a single molecular target but annotated small molecule chemical probes and even entire chemogenomic libraries are increasingly being used as a complementary approach. This book will comprehensively cover the state of the art in chemical probes and best practice for use in target discovery, illustrated throughout with examples. Ideal for students and established biochemists, the book will also cover new technologies for probe discovery, new probe modalities, the new field of probes for RNA targets and the mature field of kinase chemical probes.

Chemical Ecology Melany P. Puglisi,Mikel A. Becerro,2018-08-30 During the past 20 years, marine chemical ecology has emerged as a respected field of study providing a better understanding of the role natural products play in organisms and their environments. Ample data in this book advocates the conservation of marine environments for future drug discovery efforts while sustaining their overall health. Marine chemical ecology has expanded to include research in the areas of predator-prey interactions, marine microbial chemical ecology, and seasonal and geographical distribution of marine natural products.

Handbook of Anticancer Drugs from Marine Origin Se-Kwon Kim,2014-11-27 This timely desk reference focuses on marine-derived bioactive substances which have biological, medical and industrial applications. The medicinal value of these marine natural products are assessed and discussed. Their function as a new and important resource in novel, anticancer drug discovery research is also presented in international contributions from several research groups. For example, the potential role of Spongistatin, Apratoxin A, Eribulin mesylate, phlorotannins, fucoidan, as anticancer agents is explained. The mechanism of action of bioactive compounds present in marine algae, bacteria, fungus, sponges, seaweeds and other marine animals and plants are illustrated via several mechanisms. In addition, this handbook lists various compounds that are active candidates in chemoprevention and their target actions. The handbook also places into context the demand for anticancer nutraceuticals and their use as potential anti-cancer pharmaceuticals and medicines. This study of advanced and future types of natural compounds from marine sources is written to facilitate the understanding of Biotechnology and its application to marine natural product drug discovery research.

Polyketides and Steroids Jiaju Zhou, 2019-09-23 This 8-volume set provides a systematic description on 8,350 active marine natural products from 3,025 various kinds of marine organisms. The diversity of structures, biological resources and pharmacological activities are discussed in detail. Molecular structural classification system with 264 structural types are developed as well. The 5th volume mainly illustrates the molecular formula and structures of polyketides and steroids.

Unconditional Love Vivienne Eesha, 2014-12-05 This novel is based on true events of an effeminate boy named Aarav, who was sexually, physically, and emotionally abused as a child by the people he knew and trusted. Unconditional Love is a journey of a well-educated boy who became a doctor and an ambassador for the HIV prevention and human rights. All he wanted was love and solace, but because of his past, he only found lies and deceit from his numerous partners. They always blamed him for being abused. He claimed his sorrows and went into a world of silence. With time, his femininity blossomed into beautiful Arohi. His transgender avatar provided temporary relief, and she eventually found love and control of her destiny. As she tried to overcome the demons of her past, she was diagnosed with HIV. Why did you give me all this pain my Lord, she prayed. What wrong did I do? Where had I erred? She went into depression and attempted suicide. She had gone through so much pain as a child; will this revelation destroy her or make her into a stronger individual?

Bioactive Natural Products Steven M. Colegate, Russell J. Molyneux, 2007-12-14 Bioactive natural products are proving to be a rich source of novel therapeutics to both protect against and combat diseases, as well as serve as lead compounds in crop protection. Bioactive Compounds from Natural Sources Corrado Tringali, 2003-09-02 Interest in obtaining biologically active compounds from natural sources has recently spiked due to their low toxicity, complete biodegradability, availability from renewable sources, and in most cases, low cost. Taking an interdisciplinary approach, *Bioactive Compounds from Natural Sources: Isolation, Characterization, and Biological Properties* covers general methods and main topics in the research field of bioactive natural products. The book describes general screening methods, modern HPLC hyphenated techniques, and NMR methods in the structural elucidation of compounds and devotes individual chapters to specific topics of research. Surveys on compounds displaying important pharmacological activities are presented in chapters devoted to Mexican medicinal plants, anti-tumor drugs of natural origin, cancer chemopreventive flavonoids, and metabolites displaying anti-HIV, antioxidative, antimalarial, and anti-inflammatory activity. The final chapters are devoted to representative examples of research into marine metabolites: immunomodulating marine glycolipids and surveys of bioactive compounds from marine opisthobranchs and Japanese soft corals. With its focus on modern approaches to the isolation of biologically active natural

products, this book encourages interdisciplinary work among chemists, pharmacologists, biologists, botanists, and agronomists with an interest in bioactive natural products.

Anticancer Agents from Natural Products, Second Edition Gordon M. Cragg, David G. I. Kingston, David J. Newman, 2011-10-10 The approach to drug discovery from natural sources has yielded many important new pharmaceuticals inaccessible by other routes. In many cases the isolated natural product may not be an effective drug for any of several reasons, but it nevertheless may become a drug through chemical modification or have a novel pharmacophore for future drug design. In summarizing the status of natural products as cancer chemotherapeutics, *Anticancer Agents from Natural Products, Second Edition* covers the: History of each covered drug—a discussion of its mechanism on action, medicinal chemistry, synthesis, and clinical applications Potential for novel drug discovery through the use of genome mining as well as future developments in anticancer drug discovery Important biosynthetic approaches to unnatural natural products *Anticancer Agents from Natural Products, Second Edition* discusses how complex target-oriented synthesis—enabled by historic advances in methodology—has enormously expanded the scope of the possible. This book covers the current clinically used anticancer agents that are either natural products or are clearly derived from natural product leads. It also reviews drug candidates currently in clinical development since many of these will be clinically used drugs in the future. Examples include the drugs etoposide and teniposide derived from the lead compound podophyllotoxin; numerous analogs derived from taxol; topotecan, derived from camptothecin; and the synthetic clinical candidates, E7389 and HTI-286, developed from the marine leads, halichondrin B and hemiasterlin.
