**Tabernacle Tour** Joe Olivio,2007-09 This book details redemption through typical truths in the Tabernacle. In the Tabernacle are spiritual realities that are only revealed in the resurrected all-powerful Christ. (Christian)

**Food Into Cities** Olivio Argenti,2000 The rapid growth of African cities means they have a great challenge in ensuring an adequate supply of food to satisfy their nutritional needs in terms of quantity, variety and taste, at accessible/affordable prices. Food supply and distribution systems (FSDS), whether formal or informal, are a key element. An efficient FSDS can increase the availability of food to the urban consumer, and at the same time increase the revenues of both traders and producers. However, there are a number of constraints that impede the efficiency of FSDS and these are discussed in the papers in this Bulletin that address the whole issue of food supply and food security. They are addressed towards urban managers and planners together with professionals and researchers concerned with urban food security.

**Conversations with Durito** Marcos (subcomandante.),2005 'We are all Zapatistas.' Subcomandante Marcos This book began in 1994, when Zapatista Subcomandante Marcos replied to a 10-year-old girl from Mexico City who had sent him a drawing. The ensuing collection of related tales about the warrior-beetle, narrated by his pipe-smoking, black-ski-masked human squire is an extraordinary account for the general reader of current global political struggle. Marcos created a humorous fictitious character, Don Durito, a beetle with Quixotic fantasies which regards Marcos as his Sancho Panza. In this book, Marcos creates a new political genre, so-called postdata: ironical commentaries which he affixes to his formal communiqués or declarations. In one of them he even offers to perform a striptease for government negotiators. 'We are the product of 500 years of struggle... They [Mexican government] don't care that we have nothing, absolutely nothing, not even a roof over our heads; no land, no work, no health care, no food, no education... nor is there peace nor justice for ourselves and our children. But today, we say ENOUGH IS ENOUGH!' First EZLN declaration of war, December 31st 1993 The Zapatistas are not Marxist, Rightists, or Anarchists. They seek not to replace one infrastructure of power with another, thus rejecting the normal goal of an armed struggle. They are armed but do not use violence as a tool to expand their aims. Although a localized rebellion, the Zapatistas are unified in a worldwide struggle that transcends the mainstream media's limited perspective through eloquent dictations distributed globally via the Internet. With a fresh perspective and tactics that have never been seen in relation to an armed insurrection, the EZLN (Zapatista National Liberation Army) has changed the definition of what revolution means. From the marginalized confines of the poorest region in Mexico, a new concept of revolutionary change with a new solution to societies woes is currently being proposed.

Longevity, Regeneration, and Optimal Health William C. Bushell,Erin L. Olivio,Neil D. Theise,2009-09-21 A revolution is occurring in

the Western science of longevity, regeneration, and health that is elucidating the potential for extended human lifespan in an optimal state of health. This investigation is being conducted on the molecular, cellular, physiological, and psychological levels. Rigorous integrative medicine research can only be adequately developed if collaboration between scientists and practitioners from both fields is involved. This volume brings together researchers and scholars from both the Indo-Tibetan traditions and the international scientific community to open a dialogue about the potential to build a program of collaborative research to study the impact of Indo-Tibetan practices on longevity and health. Indo-Tibetan Buddhism claims that its core of meditative, yogic, and related practices can potentially produce dramatic enhancements of physiological and psychological functioning, and a substantial body of Western scientific evidence is supportive of these claims. The evidence includes direct and indirect clinical medicine and data from basic science research in physiology, neurobiology, and medicine. The reports in this volume establish a basis for a program of research that will advance our current understanding of longevity and health.
