Genre - text - interpretation Kaarina Koski,Frog,Ulla Savolainen,2016-01-01 This book presents current discussions on the concept of genre. It introduces innovative, multidisciplinary approaches to contemporary and historical genres, their roles in cultural discourse, how they change, and their relations to each other. The reader is guided into the discussion surrounding this key concept and its history through a general introduction, followed by eighteen chapters that represent a variety of discursive practices as well as analytic methods from several scholarly traditions. This volume will have wide appeal to several academic audiences within the humanities, both in Finland and abroad, and will especially be of interest to scholars of folklore, language and cultural expression.

Routledge Handbook of Food as a Commons Jose Luis Vivero-Pol,Tomaso Ferrando,Olivier De Schutter,Ugo Mattei,2018-12-17 From the scientific and industrial revolution to the present day, food – an essential element of life – has been progressively transformed into a private, transnational, mono-dimensional commodity of mass consumption for a global market. But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons. This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought, interpreted and practiced around the old/new paradigms of commons and commoning. The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re-imagined from a commons perspective. Chapters do not define the notion of commons but engage with different schools of thought: the economic approach, based on rivalry and excludability; the political approach, recognizing the plurality of social constructions and incorporating epistemologies from the South; the legal approach that describes three types of proprietary regimes (private, public and collective) and different layers of entitlement (bundles of rights); and the radical-activist approach that considers the commons as the most subversive, coherent and history-rooted alternative to the dominant neoliberal narrative. These schools have different and rather diverging epistemologies, vocabularies, ideological stances and policy proposals to deal with the construction of food systems, their governance, the distributive implications and the socio-ecological

impact on Nature and Society. The book sparks the debate on food as a commons between and within disciplines, with particular attention to spaces of resistance (food sovereignty, de-growth, open knowledge, transition town, occupations, bottom-up social innovations) and organizational scales (local food, national policies, South-South collaborations, international governance and multi-national agreements). Overall, it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food, the planet and living beings.

Industrial and Environmental Biotechnology Nuzhat Ahmed, Fouad M. Qureshi, Obaid Y. Khan, 2014-04-14 The contamination of the environment by herbicides, pesticides, solvents, various industrial byproducts (including toxic metals, radionucleotides and metalloids) is of enormous economic and environmental significance. Biotechnology can be used to develop green or environmentally friendly solutions to these problems by harnessing the ability of bacteria to adapt metabolic pathways, or recruit new genes to metabolise harmful compounds into harmless byproducts. In addition to its role in cleaning-up the environment, biotechnology can be used for the production of novel compounds with both agricultural and industrial applications. Internationally acclaimed authors from diverse fields present comprehensive reviews of all aspects of Industrial and Environmental Biotechnology. Chapters concerned with environmental biotechnology cover two major categories of pollutants: organic compounds and metals. Organic pollutants include cyclic aromatic compounds, with/without nitrogenous or chloride substitutions while metal pollutants include copper, chromate, silver, arsenic and mercury. The genetic basis of bioremediation and the microbial processes involved are examined, and the current and/or potential applications of bioremediation are discussed. The use of biotechnology for industrial and agricultural applications includes a chapter on the use of enzymes as biocatalysts to synthesize novel opiate derivatives of medical value. The conversion of low-value molasses to higher value products by biotechnological methods and the use tissue culture methods to improve sugar cane and potatoes crop production is discussed.

Microbial Ecology of Foods V2 Unknown ICMSF, 2012-12-02 *Microbial Ecology of Foods, Volume II: Food Commodities* is a comprehensive treatise on the microbiology of specific commodity groups. The commodity groups discussed include meat, milk, egg, fish, shellfish, and their products. Other groups included are feeds of animal origin and pet foods; agricultural crops and their products; fats and oils; beverages; confectioneries; miscellaneous foods; and natural mineral waters. Composed of 15 chapters, this book has chapters that cover the important properties of the food commodity that affects the microbial content. The initial microbial flora on flesh foods at slaughter or on vegetable foods at harvest and the effects of harvest, transport, processing, and storage on the microbial content are discussed as well. Furthermore, this text explains the means of controlling the process and the microbial content. Each chapter is a review of applied microbiology, compiled by leading authorities selected solely for their expert knowledge. The final chapter emphasizes factors that contribute to outbreaks of foodborne disease. This volume will greatly appeal to those interested primarily in applied aspects of food microbiology, such as food processors, microbiologists, and technologists; veterinarians; public health workers; and regulatory officials.

Prince Ribbit Jonathan Emmett,2017-03-01 Enchanted prince or just a plain old frog? Pucker up, princesses! There's only one way to find out... Fairy tales are just stories--or so Princess Martha believes. But when her sisters meet a talking frog, they're convinced that giving him the royal treatment will turn him into Prince Charming. After all, that's what happens in their story books. Martha isn't so sure. The more she sees of Prince Ribbit, the more suspicious she becomes. Armed with the facts, Martha sets out to expose Prince Ribbit and prove to her sisters that just because it's in a book doesn't mean it's true. But before The End, Princess Martha might just learn that lesson for herself! Jonathan Emmett's clever twist on the The Frog Prince pits a spunky, bespectacled princess against a sly amphibian to teach a charming lesson on the pitfalls of trusting everything you read

Religion Kent Brintnall,2016 Composed of twenty-two thematic chapters, Embodied Religion orients students and scholars to the critical study of religion, gender, sexuality, and the body. The introduction and first section provide a foundational overview of key terms, topics, and questions for such scholarly work. In the second section, essays examine the multiple and complex ways that various traditionsâ from Hinduism to Christianity to Paganismâ seek to regulate and celebrate embodiment and desire. A final section examines relevant theoretical approaches, including ethnography, phenomenology, queer studies, and disability studies. The volume also includes bibliographies filmographies, images, a glossary, and a comprehensive index, all of which aid the reader in exploring this rich, rewarding, and relevant field.

Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with

school refusal

The Idea of History R. G. Collingwood, 2020-07-14 Robin George Collingwood, FBA (1889 – 1943) was an English historian, philosopher, and archaeologist most famous for his philosophical works. Along with “The Principles of Art” (1938), Collingwood’s “The Idea of History” was his best-known work, originally collated from numerous sources following his death by a student of his, T. M. Knox. It became a major inspiration for philosophy of history in the western world and is extensively cited to this day. This fascinating volume on history and its relationship to philosophy will appeal to students and collectors of vintage philosophical works alike. Contents include: “The Philosophy of History”, “History’s Nature”, “Object”, “Method”, “Greco-Roman Historiography”, “The Influence of Christianity”, “The Threshold of Scientific History”, “Scientific History”, “England”, “Germany”, “France”, “Italy”, etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume today in an affordable, high-quality, modern edition complete with a specially-commissioned new biography of the author.

Heartstream Tom Pollock, 2019-07 I just wanted to see you. Before the end. A taut psychological thriller about obsession, fame and betrayal, for fans of Black Mirror. Cat is in love. Always the sensible one, she can’t believe that she’s actually dating, not to mention dating a star. But the fandom can’t know. They would eat her alive. And first at the buffet would definitely be her best friend, Evie. Amy uses Heartstream, a social media app that allows others to feel your emotions. She broadcasted every moment of her mother’s degenerative illness, and her grief following her death. It’s the realest, rawest reality TV imaginable. But on the day of Amy’s mother’s funeral, Amy finds a strange woman in her kitchen. She’s rigged herself and the house with explosives - and she’s been waiting to talk to Amy for a long time. Who is she? A crazed fan? What does she want? Amy and Cat are about to discover how far true obsession can go.

Bioseparation Engineering I. Endo, T. Nagamune, S. Katoh, T. Yonemoto, 2000-03-17 The bioseparation engineering of today includes downstream process engineering such as waste water, material and gas treatment. Taking this tendency into account, bioseparation engineers gathered in Japan as a special research group under the main theme of Recovery and Recycle of Resources to Protect the Global Environment. The scope of this book is based on the conference, and deals not only with recent advances in bioseparation engineering in a narrow sense, but also the environmental engineering which includes waste water treatment and bioremediation. The contributors of this book cover many disciplines such as chemical engineering, analytical chemistry, biochemistry, and microbiology. Bioseparation Engineering will stimulate young engineers and scientists who will develop bioseparation engineering further in the 21st century, and contribute to a world-wide attention to the global environment

Mental Images in Human Cognition R.H. Logie, M. Denis, 1991-06-25 This book represents the research efforts of individuals whose scientific expertise lies in reflection on what Sartre described as reflective acts. Theory in the cognitive psychology of mental imagery, endeavors not only being able to describe the contents and nature of mental imagery, but also being able to understand the underlying functional cognition. Psychologists need not solely rely on the techniques of introspection, and the last two decades have seen highly creative developments in techniques for eliciting behavioural data to be complemented by introspective reports. This level of sophistication has provided singular insights into the relationship between imagery and other consequential and universal aspects of human cognition: perception, memory, verbal processes and problem solving. The recognition that imagery, despite its ubiquitous nature, differs between individuals both in prevalence and in kind, and the dramatic rise in cognitive science has provided the additional

potential for integrating our understanding of cognitive function with our understanding of neuroanatomy and of computer science. All of these relationships, developments and issues are dealt with in detail in this book, by some of the most distinguished authors in imagery research, working at present in both Europe and the USA.
