Bearing Light: Flame Relays and the Struggle for the Olympic Movement John J. Macaloon, 2020-07-24 The Flame Relay and the Olympic Movement is the first book-length scholarly study in English of the contemporary Olympic flame relay. Reporting for the first time on years of intensive ethnographic research and organizational intervention, MacAloon literally follows the Olympic flame through twenty years of intercultural encounter, conflict, and negotiation. Focusing on the frequently harmonious, sometimes perilous encounters among Greek flame relay officials, cultural agents, and discourses, foreign Olympic Games organizing committees, and such transnational actors as the IOC and its corporate sponsors since 1984, a context is created for understanding the significance for the Olympic movement and for globalization studies of the 2004 Athens flame relay, the first to travel the entire world. Through intensive interviews and co-participations with leading Greek and American actors and the contributions of young Greek researchers who worked backstage on the relay, Bearing Light demonstrates how culturally parochial the managerial regime of world's best practices often turns out to be and yet how inescapable it has become for those who wish to communicate across cultural and political boundaries. This dilemma, the contributors argue, constitutes the practical form in which the struggle to preserve a sense of Olympism and the Olympic Movement against the demands and prerogatives of today's Olympic sports industry is being chiefly fought out. This book was previously published as a special issue of Sport in Society

Dropping the Torch Nicholas Evan Sarantakes, 2011 Dropping the Torch: Jimmy Carter, the Olympic Boycott, and the Cold War offers a diplomatic history of the 1980 Olympic boycott. Broad in its focus, it looks at events in Washington, D.C., as well as the opposition to the boycott and how this attempted embargo affected the athletic contests in Moscow. Jimmy Carter based his foreign policy on assumptions that had fundamental flaws and reflected a superficial familiarity with the Olympic movement. These basic mistakes led to a campaign that failed to meet its basic mission objectives but did manage to insult the Soviets just enough to destroy détente and restart the Cold War. The book also includes a military history of the Soviet invasion of Afghanistan, which provoked the boycott, and an examination of the boycott's impact four years later at the Los Angeles Olympics, where the Soviet Union retaliated with its own boycott.

No Boston Olympics Chris Dempsey,Andrew Zimbalist,2017-05-02 In 2013 and 2014, some of Massachusetts' wealthiest and most powerful individuals hatched an audacious plan to bring the 2024 Summer Olympics to Boston. Like their counterparts in cities around the world, Boston's Olympic boosters promised political leaders, taxpayers, and the media that the Games would deliver incalculable benefits and require little financial support from the public. Yet these advocates refused to share the details of their bid and only grudgingly admitted, when pressed, that their plan called for billions of dollars in construction of unneeded venues. To win the bid, the public would have to guarantee taxpayer funds to cover cost overruns, which have plagued all modern Olympic Games. The United States Olympic Committee (USOC) chose Boston 2024's bid over that of other American cities in January 2015-and for a time it seemed inevitable that the International Olympic Committee (IOC) would award the Games to Boston 2024. No Boston Olympics is the story of how an ad hoc, underfunded group of diverse and engaged citizens joined together to challenge and ultimately derail Boston's boosters, the USOC, and the IOC. Chris Dempsey was cochair of No Boston Olympics, the group that first voiced skepticism, demanded accountability, and catalyzed dissent. Andrew Zimbalist is a world expert on the economics of sports, and the leading researcher on the hidden costs of hosting mega-events such as the Olympics and the World Cup. Together, they tell Boston's story, while providing a blueprint for citizens who seek to challenge costly, wasteful, disruptive, and risky Olympic bids in their own cities.

Hitler's Olympics John R Webb,2019-03-25 No sporting venue has been subject to more lies, distortions and half-truths than the Berlin Olympics of 1936. In this diligently researched and annotated work, the author sets the record straight. The first matter tackled by the author is the international campaign to boycott the Games. This was a failure because, as the President of the International Olympic Committee said at the time, it had no significant support among the athletes themselves. In fact, despite the US led boycott campaign, more nations than ever, 12 more (or 32% more) participated than in the previous Games at Los Angeles. New ideas adopted at the Games, which became standard features of future Games, are highlighted: the Olympic Torch, the Olympic Bell and the direct relay of television. The traditional Olympic Salute is also discussed, though it has now been effectively banned from the Olympics by the tyranny of political correctness. Controversies relating to the following participants are investigated: Gretel Bergmann, the Jewish athlete dropped from the German team less than three weeks after equalling the German women's high jump record; Dora Ratjen, the German high jumper later exposed (by the Germans) as a man; two Jewish sprinters replaced by the US team (by two African-Americans) in the men's relay; and the Peruvian football team, required to replay a match with Austria. In particular, the author deals at length with the Jesse Owens saga, establishing that it was President Roosevelt, not Hitler, who snubbed the great athlete and showing that African-American athletes were treated far better in Germany than in their own country. Includes over 60 original photographs.
