Dunkirk and the Little Ships Philip Weir, 2020-10-29 During 1940 the German army swept with devastating speed across the Low Countries and into northern France and drove Allied forces back into a small pocket around Dunkirk. Without a swift withdrawal across the English Channel, the latter faced certain death or capture. The evacuation plan – Operation Dynamo – initially calculated that 45,000 men might be rescued, but between 26 May and 4 June 338,226 men were in fact brought back to England. Naval historian Philip Weir shows how this was made possible by a vast armada of disparate vessels including destroyers, minesweepers, fishing vessels and, most famously of all, the privately owned 'Little Ships'. He explores the vessels' various roles within the evacuation, and their subsequent fates, including preservation and participation in commemorative return runs to the port, which now take place every five years.

German U-Boat Losses During World War II Axel Niestlé, 2014-06-30 A deep dive into the fate of German submarines lost during the Second World War. "This has to be the best reference you can find on the subject."—Military Modelling No other publication on this subject comes even close to including the amount of detail provided in this book. An introduction both summarizes previous works on the subject and describes the difficulties of obtaining and verifying information from either the Germans or the Allies on U-boat losses. The main part of the book lists by hull number each U-boat's date of commissioning, its commanding officer, and the date and port of departure for its last patrol. It also gives the date, position, and cause of loss of each submarine, with complete details on Allied units involved in the sinking, the names and ranks of their commanding officers and pilots, and the number of crew killed or rescued. An appendix neatly summarizes data on the disposition of surviving U-boats at the end of the war and provides valuable statistical data on German U-boat losses. "Highly recommended for every serious scholar of the Atlantic war, and every library in naval history and the history of the Second World War."—The Mariner's Mirror "The level of detail is quite impressive and this edition is the result of 16 years of further research since the first edition . . . If you are seeking data on the fate of U-Boats then this book should be your 'first place of call'—no other book has such detailed data."—Military Archive Research

Mum's the Word Eve Branson, 2013 Eve Branson's life reads like a fast-paced adventure novel. A classically trained ballet dancer, she appeared in racy West End productions, disguised herself as a boy to take glider lessons, enlisted in the Women's Royal Navy Service, and then embarked on a series of harrowing adventures as a Star Girl air hostess on the ill-fated British South American Airways. Though marrying the dashing ex-Calvary officer, Edward Ted Branson, brought her down to earth to raise three children, Eve's quest for adventure never faltered. After running several businesses, traveling the world, and doing global charity work, Eve is preparing to launch the first commercial space travelers to the edge of space in a Virgin Galactic mother ship that bears her name. In this lively, absorbing memoir - part diary, part adventure story, part family history - Eve Branson's formidable energy propels the reader through an extraordinary life. Along the way, she divulges some of the unorthodox but effective trade secrets behind raising one of the world's most colorful entrepreneurs.

Spoils of War Aidan Dodson, Serena Cant, 2020-03-30 While a large number of books have dealt with the navies and war at sea during the World Wars, the immediate aftermaths have generally received only minimal coverage. However, the fates of defeated navies are of enormous interest from a number of perspectives. These include the relative priorities of the victorious powers, acquisition and testing of ex-enemy materiel and the intended future capabilities of those ex-enemy navies that were to be allowed to continue to exist. This new book traces the histories of navies and ships of the defeated powers from the months leading up to the relevant armistices or surrenders through to the final execution of the appropriate post-war settlements. In doing so, it discusses the way in which the victorious powers reached their final demands, how these were implemented, and to what effect. The later histories of ships that saw subsequent service, either in their original navies or in those navies which acquired them, are also described. In doing this, much use is made of material drawn from archival, and in some cases archaeological, sources, some of which has never previously been used. Through these, a wide range of long-standing myths are busted, and some badly distorted modern views and assessments of events in the wake of the conflicts put right. The fascinating narrative will be accompanied by tabulated lists of all major navy-built (and certain significant ex-mercantile) enemy ships in commission at the relevant date of the armistice or surrender, or whose hulks were specifically listed for attention in post-Second World War allied agreements. These will include key dates in their careers and their ultimate fates. This highly original book, drawing on archaeological evidence as well as archival sources, and including numerous photographs will become an essential reference tool for all those interested in the naval history of the two World Wars.

The collection includes official documents but also many letters to his family and brother officers that exhibit his feelings, as well as his illuminating diary entries from April 1944 onwards.

Poland 1939 Roger Moorhouse, 2020-07-14 A chilling and expertly written history of the 1939 September Campaign and the onset of World War II (Times of London). For Americans, World War II began in December of 1941, with the bombing of Pearl Harbor; but for Poland, the war began on September 1, 1939, when Hitler's soldiers invaded, followed later that month by Stalin's Red Army. The conflict that followed saw the debut of many of the features that would come to define the later war-

blitzkrieg, the targeting of civilians, ethnic cleansing, and indiscriminate aerial bombing-yet it is routinely overlooked by historians. In Poland 1939, Roger Moorhouse reexamines the least understood campaign of World War II, using original archival sources to provide a harrowing and very human account of the events that set the bloody tone for the conflict to come.

The Cruel Slaughter of Adolf Hitler karsten friedrich,

Destroyer Actions Harry Plevy,2016-08-04 Utilising eye-witness accounts of those who participated in them, Destroyer Actions focuses on the human side of naval operations during the first eight months of the Second World War. Harry Plevy draws upon primary sources of both naval and civilian provenance, many of which are previously unpublished and therefore have never been available to the general reader. Extensively researched through comparison of British and German operational logs, and including first-hand evidence from Polish, French and Norwegian sources which reveal the true impact of the conflict at sea upon the lives of the people of all nations caught up in it, this book gives a comprehensive picture of destroyer actions at the beginning of the Second World War.

The German Invasion of Norway, April 1940 Geirr H Haarr,2011-03-30 "Tremendous . . . zeroes in on the critical first days of Weserübung and offers a minutely detailed account of the unfolding action."—World War II This book documents the German invasion of Norway, focusing on the events at sea. More than most other campaigns of WWII, Operation Weserübung has been shrouded in mystery, legend and flawed knowledge. Strategic, political and legal issues were at best unclear, while military issues were dominated by risk; the German success was the result of improvisation and the application of available forces far beyond the comprehension of British and Norwegian military and civilian authorities. Weserübung was the first combined operation ever where air force, army and navy operated closely together. Troops were transported directly into battle simultaneously by warship and aircraft, and success required cooperation between normally fiercely competing services. It was also the first time that paratroopers were used. The following days were to witness the first dive bomber attack to sink a major warship and the first carrier task-force operations. The narrative is based on primary sources from British, German and Norwegian archives, and it gives a balanced account of the reasons behind the invasion. With its unrivalled collection of photographs, many of which have never before appeared in print, this is a major new WWII history and a definitive account of Germany's first and last major seaborne invasion. "This is the author's first book but he has a fine natural talent for maritime history. This is a magnificent work."—Work Boat World "A very impressive piece of work that comes highly recommended."—HistoryOfWar.org

The Cunningham Papers Michael Simpson,2020-11-25 Following America's entry into World War Two, there was a necessity for the Royal Navy to strengthen co-operation with the United States Navy. Admiral Sir Andrew Cunningham's brief term as head of the British Admiralty Delegation in Washington was to endear him to the Americans so much so that they proposed him as Allied Naval Commander of the Expeditionary Force which was to invade North Africa in November 1942. In October 1943, Cunningham was summoned to replace the dying Pound as First Sea Lord, a position he held until his retirement from active service in June 1946. In that time he presided over the invasion of Normandy, operations in the Mediterranean, the sinking of the Scharnhorst and Tirpitz, the defeat of the late surge of U-boat activity, the British Pacific Fleet, and the problems of manpower, the futures of the Royal Marines and the Fleet Air Arm, and the conversion of the Royal Navy from its swollen wartime strength to a much-reduced peacetime cadre. Cunningham remained concerned over the future of the country's defence and that of the Royal Navy and he was able to speak in major defence debates in the House of Lords. He died suddenly in 1963 and was buried at sea. Cunningham was one of Britain's great sailors, a worthy successor to Nelson, whom he admired and many of whose qualities he displayed. This second volume of Cunningham's papers covers the period of his life described above. It includes official documents but also many letters to his family and brother-officers that exhibit his feelings, as well as his illuminating diary entries from April 1944 onwards.
