A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant, 2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

The Warsaw Pact William J. Lewis, 1982 Et opslagsværk om Warsawapagten, der indeholder oplysninger om historie, organisation, våbentyper, materiel derunder amfibiekøretøjer, fartøjer, køretøjer, fly, helikoptere, radar, uniformer og våbenmærker.

NATO and Warsaw Pact Armoured Fighting Vehicles of the Cold War Michael Green, 2024-01-30 While tanks were the most recognized armored vehicles during the Cold War, NATO and Warsaw Pact (WP) armies fielded a wide array of armored fighting vehicles (AFVs). These included armored cars, armored personnel

carriers (APCs), anti-aircraft vehicles and self propelled artillery. Over the Cold War years nations both progressively developed series of AFVs and introduced entirely new ranges. APCs, vital to all frontline units, evolved from machine gun-armed battlefield taxis such as the US M113 and Soviet BTR-60 series into sophisticated infantry fighting vehicles. The Soviet BMP-1, US Bradley M2/M3, West German Marder and British Warrior and CVR series were classic examples of the latter, with numerous variants. The Soviet BRDM-2 series was the most numerous armored car. The British Army fielded the Saladin, Ferret and Fox and the German Army introduced the eight-wheeled Luchs and tracked SPZ11-2 Kurz. Early anti-aircraft vehicles, such as the American M42 with two 40mm Bofors, were superseded by the formidable Soviet ZSU-23-4 Shilka and the West German Gepard with radar-guided guns. This authoritative and superbly illustrated book covers the full range of AFVs in service with NATO and WP armies over the four decades of the Cold War. It will be an invaluable addition to the libraries of the expert and layman alike.

Czechoslovak Arms Exports to the Middle East Martin Smisek, 2023-07-21
Revolución Libertadora □ or the Liberating Revolution □ is the name by which the military dictatorship that ruled Argentina is known after overthrowing the constitutional president, Juan Domingo Perón, closing the National Congress, deposing the members of the Supreme Court, the provincial and municipal authorities and university and commissioning the entire Judicial Power through a coup that began on September 16 1955 and that, after more than two years, transferred the government to President-elect Arturo Frondizi, on May 1 1958, who would be overthrown in 1962. The preparations for the coup of September 1955 were intense and very careful, since the plotters did not want to repeat the mistakes made in the events of June. For this coup, the collaboration of several important army units was finally obtained, in addition to the Navy and the Air Force. *Revolución Libertadora* Volume 2 details the warlike actions of both sides day

by day, along with the eventual resignation, exile and return of President Perón. The text is supported by an extensive number of rare images, tables and specially-commissioned colour artwork.

Cornerstones of Security Thomas Graham, Jr., Damien J. LaVera, 2011-07-01 This anthology presents the complete text of thirty-four treaties that have effectively contained the spread of nuclear, biological, and conventional weapons during the Cold War and beyond. The treaties are placed in historical context by individual commentaries from noted authorities Thomas Graham Jr. and Damien J. LaVera, which provide unique insights on each treaty's negotiation and implementation. During the 1990s, numerous arms control agreements were concluded under U.N. or U.S. leadership. In 1995, one hundred sixty-five nations agreed to indefinitely extend the Nuclear Nonproliferation Treaty. Many nations ratified important chemical and biological weapons conventions, a pact to reduce conventional forces in Europe, and agreements to limit testing of weapons of mass destruction. More recent treaties seeking to restrain small arms trafficking and ban land mines are also highlighted and analyzed. Graham concludes with lessons learned from the collective negotiation and verification history of these treaties, ongoing efforts to limit weaponry, and general observations on the status and effectiveness of these agreements. There is no comparable resource available for diplomats, international lawyers, and arms control specialists.

Weapons and Equipment of the Warsaw Pact Russell Phillips, 2018-10-10 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly turned hot? This

ebook box set contains the first three books of the Weapons and Equipment of the Warsaw Pact series: Tanks and Combat Vehicles of the Warsaw Pact, Combat Engineering Equipment of the Warsaw Pact, and Artillery of the Warsaw Pact.

Tanks and Combat Vehicles of the Warsaw Pact Russell Phillips, 2017-08-22 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly turned hot? Tanks and Combat Vehicles of the Warsaw Pact is a fascinating reference book looking at the wide variety of combat vehicles which were poised and ready for action throughout the long years of military stand-off. Led by the Soviet Union, the nations which formed the Warsaw Pact were as innovative as they were prepared and these deadly war machines had the potential to change the course of world history forever. Find out more about these combat vehicles from how they worked to what they would have been capable of if they had been used in military action against NATO. Tanks and Combat Vehicles of the Warsaw Pact details more than 100 military vehicles from the 2P26 Baby Carriage - a compact Soviet off-road vehicle mounted with anti-tank missiles - to the T-80U main battle tank, in service from 1985 onwards.

XTREME MODELLING 33 ,

The Yom Kippur War 1973 (2) Simon Dunstan,2012-11-20
Israel's victory in the 1967 'Six Day War' sowed the seeds of the 1973 Yom Kippur War. At 1400hrs on 6 October 1973 the Egyptian army launched an assault crossing of the Suez Canal. The carefully co-ordinated attack achieved complete tactical surprise. The sand embankments of the Israeli Bar-Lev Line were breached and an Israeli counterattack thrown back with heavy losses. In the second of his two-volume analysis of the Yom Kippur War, Simon Dunstan details the fighting in the Sinai, culminating in Operation Gazelle, the Israeli counterattack across the Suez Canal. Although defeated militarily Egypt did ultimately succeed in forcing the Israelis back to the negotiating table.
