Bibliography on Atomic Energy Levels and Spectra, July 1968 Through June 1971 Lucy Hagan,William Clyde Martin,1972

The Armed Forces of the European Union, 2012–2013 Charles Heyman,2011-07-12 This first edition of an entirely new publication will, for the first time, provide comprehensive information on what is one of the worlds largest military force groupings. The European Unions 25 member states have defense forces that include over 1.6 million personnel and inventories that include over 35,000 armored vehicles, 2,000 combat aircraft, 60 submarines and over 140 major surface vessels.Chapters will include important facts and figures related to European defense, detail concerning the European Union Military Committee and the European Defense Agency. Also included will be information about European Union military roles, the Eurocorps and European Union Battlegroups. In addition, there will be detail regarding the force structure of the 25 member states and characteristics of the major land, sea and air equipment.

NATO and Warsaw Pact Armoured Fighting Vehicles of the Cold War Michael Green,2024-01-30 While tanks were the most recognized armored vehicles during the Cold War, NATO and Warsaw Pact (WP) armies fielded a wide array of armored fighting vehicles (AFVs). These included armored cars, armored personnel carriers (APCs), anti-aircraft vehicles and self propelled artillery. Over the Cold War years nations both progressively developed series of AFVs and introduced entirely new ranges. APCs, vital to all frontline units, evolved from machine gun-armed battlefield taxis such as the US M113 and Soviet BTR-60 series into sophisticated infantry fighting vehicles. The Soviet BMP-1, US Bradley M2/M3, West German Marder and British Warrior and CVR series were classic examples of the latter, with numerous variants. The Soviet BRDM-2 series was the most numerous armored car. The British Army fielded the Saladin, Ferret and Fox and the German Army introduced the eight-wheeled Luchs and tracked SPZ11-2 Kurz. Early anti-aircraft vehicles, such as the American M42 with two 40mm Bofors, were superseded by the formidable Soviet ZSU-23-4 Shilka and the West German Gepard with radar-guided guns. This authoritative and superbly illustrated book covers the full range of AFVs in service with NATO and WP armies over the four decades of the Cold War. It will be an invaluable addition to the libraries of the expert and layman alike.

Czechoslovak Arms Exports to the Middle East Martin Smisek,2023-07-21 Revolución Libertadora □ or the Liberating Revolution □is the name by which the military dictatorship that ruled Argentina is known after overthrowing the constitutional president, Juan Domingo Perón, closing the National Congress, deposing the members of the Supreme Court, the provincial and municipal authorities and university and commissioning the entire Judicial Power through a coup that began on September 16 1955 and that, after more than two years, transferred the government to President-elect Arturo Frondizi, on May 1 1958, who would be overthrown in 1962. The preparations for the coup of September 1955 were intense and very careful, since the plotters did not want to repeat the mistakes made in the events of June. For this coup, the collaboration of several important army units was finally obtained, in addition to the Navy and the Air Force. Revolución Libertadora Volume 2 details the warlike actions of both sides day by day, along with the eventual resignation, exile and return of President Perón. The text is supported by an extensive number of rare images, tables and specially-commissioned colour artwork.

AFV Alphabet Russell Phillips,2022-11-28 Inspired by Tim Gow's A to Z of Wargaming series of posts, I wrote an A to Z series of blog posts around the theme of AFVs (Armoured Fighting Vehicles). To mark History Writers Day 2022, I've edited the posts and collated them into this free book. History Writers Day is a virtual Twitter Christmas Market for history-related books, both fiction and non-fiction. It's organised by @Books2Cover, which is well worth a follow if you don't do so already.

Ensembles on Configuration Space Michael J. W. Hall,Marcel Reginatto,2016-06-11 This book describes a promising approach to problems in the foundations of quantum mechanics, including the measurement problem. The dynamics of ensembles on configuration space is shown here to be a valuable tool for unifying the formalisms of classical and quantum mechanics, for deriving and extending the latter in various ways, and for addressing the quantum measurement problem. A description of physical systems by means of ensembles on configuration space can be introduced at a very fundamental level: the basic building blocks are a configuration space, probabilities, and Hamiltonian equations of motion for the probabilities. The formalism can describe both classical and quantum systems, and their thermodynamics, with the main difference being the choice of ensemble Hamiltonian. Furthermore, there is a natural way of introducing ensemble Hamiltonians that describe the evolution of hybrid systems; i.e., interacting systems that have distinct classical and quantum sectors, allowing for consistent descriptions of quantum systems interacting with classical measurement devices and quantum matter fields interacting gravitationally with a classical spacetime.

Weapons and Equipment of the Warsaw Pact Russell Phillips,2018-10-10 When East and West survived on a knife-edge between peace and war, both sides were busy

preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly turned hot? This ebook box set contains the first three books of the Weapons and Equipment of the Warsaw Pact series: Tanks and Combat Vehicles of the Warsaw Pact, Combat Engineering Equipment of the Warsaw Pact, and Artillery of the Warsaw Pact.

Tanks and Combat Vehicles of the Warsaw Pact Russell Phillips, 2017-08-22 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly turned hot? Tanks and Combat Vehicles of the Warsaw Pact is a fascinating reference book looking at the wide variety of combat vehicles which were poised and ready for action throughout the long years of military stand-off. Led by the Soviet Union, the nations which formed the Warsaw Pact were as innovative as they were prepared and these deadly war machines had the potential to change the course of world history forever. Find out more about these combat vehicles from how they worked to what they would have been capable of if they had been used in military action against NATO. Tanks and Combat Vehicles of the Warsaw Pact details more than 100 military vehicles from the 2P26 Baby Carriage - a compact Soviet off-road vehicle mounted with anti-tank missiles – to the T-80U main battle tank, in service from 1985 onwards.
