**In Search of the African Lion** Roger de la Harpe, Pat de la Harpe, 2012-08-01 The African lion (*Panthera leo*), long celebrated as the king of beasts, faces unprecedented challenges in the wild today. Loss of habitat through the expansion of human activity increasingly restricts the lion to game reserves and national parks, while diseases such as bovine tuberculosis pose a threat to the health of lion prides. Over a period of two years, Roger and Pat de la Harpe have documented wild lions of South Africa, and the result is a superbly photographed and engagingly written tribute to this often misunderstood predator. *In Search of the African Lion* enters the complex world of the lion, describing pride dynamics, hunting patterns, the reproductive cycle and interactions with human communities. The book focuses on four main areas: the Kalahari, the Madikwe/Mapungubwe area, the Greater Kruger National Park and Northern Zululand -each with its own problems, challenges and opportunities. In addition, the authors highlight the important work done by game rangers, wildlife managers and scientific researchers in understanding the lion and in protecting existing populations. The *In Search of...* series focuses on the plight of threatened and endangered species. Also available by the same authors: *In Search of the African Wild Dog*.

**The Social Life of the Lion** J.A. Rudnai, 2012-12-06 THE HABITAT Nairobi National Park lies to the south-southeast of the capital of Kenya, Nairobi, where the Athi Plains meet the Eastern escarpment of the Rift Valley. These plains form part of the semi-arid highland plateau lying between the coast and the Rift Valley. Both the city itself, and the Park bordering it, are a meeting place of two generally distinct types of landscape and climate. While to the east-southeast are semi-arid plains with grasslands and scattered trees, the western-north western parts are higher, hilly, cooler, more humid and support lush forests. The combination of latitude-a little over one degree south of the Equator -and altitude-average of 1600 m. (5000-5500 ft.) -combine to give Nairobi a most equable climate where the temperature varies during the year between about 11 degrees and 27 degrees centigrade (mean minimum and mean maximum for eight years). However, considerable changes are usually experienced within each day and a rise from 14 degrees C at 0600 hours to 22 degrees at 1100 hours is not unusual. Nairobi Park has a unique concentration of wild animals living in their natural habitat less than 10 km. from the centre of a modern city of half a million people. The only interference with the natural course of events in the Park is that normally required for the proper management of a game park, such as maintenance of roads and dams, and, in this particular case, partial fencing towards the city.

**Lion** Deirdre Jackson, 2010-05-15 Although the lion is not the largest, fastest or most lethal animal, its position as king of beasts has rarely been challenged. Since Palaeolithic times, lions have fascinated people, and due to its gallant mane, knowing eyes, and distinctive roar, the animal continues to beguile us today. In *Lion*, Deirdre Jackson paints a fresh portrait of this regal beast, drawing on folktales, the latest scientific research, and even lion-tamers' memoirs, as well as other little-known sources to tell the story of lions famous and anonymous, familiar and surprising. Majestic, noble, brave—the lion is an animal that has occupied a great place in the human imagination, inspiring countless myths, lore and legends. As well, this creative relationship has abounded in visual culture—painted on wood and canvas, chiseled in stone, hammered in metal, and tucked between the pages of medieval manuscripts, lions have often represented divinity, dignity, and danger. In *Lion* Jackson summarizes the latest findings of field biologists and offers in-depth analyses of works of art, literature, oral traditions, plays, and films. She is a peerless guide on a memorable visual and cultural safari.

*The Lions of Tsavo* Bruce D. Patterson, 2004-02-12 Through field research and forensic evidence, a scientist reveals his theory on why two Kenyan lions killed humans and then ate their prey.

When the Last Lion Roars Sara Evans, 2018-06-14 The illegal killing of Cecil – a famous and magnificent black-maned Zimbabwean lion – by an American big-game hunter in 2015 sparked international outrage. More significantly, it drew the world's attention to the devastating plight of Africa's lions. A century ago, there were more than 200,000 wild lions living in Africa. Today, with that population reduced by more than 90 per cent, many experts believe that without effective conservation plans, Africa's remaining wild lions could be completely wiped out by the mid-half of this century. *When the Last Lion Roars* explores the historic rise and fall of the lion as a global species, and examines the reasons behind its catastrophic decline. Interwoven with vivid personal encounters of Africa's last lions, Sara Evans questions what is being done to reverse (or at least stem) this population collapse, and she considers the importance of human responsibility in this decline and, more crucially, in their conservation. From the Lion Guardians in Kenya to the Living Walls of Tanzania, and the Hwange Lion Research Project in Zimbabwe, Sara meets both lions and their champions, people who are fighting to bring this iconic species back from the brink of extinction.

The Last Lions of Africa Anthony Ham, 2020-08-04 'Bravely pursued, acutely observed and elegantly told.' John Vaillant, author of *The Tiger* 'Urgent and important. This moving tale with a heroic cast of characters, leonine and human, is a must-read for anyone passionate about wildlife and wild places.' Tony Park, author of *Last Survivor* This is the riveting and illuminating story of Australian writer Anthony Ham's extraordinary journey into the world of lions. Haunted by the idea that they might disappear from the planet in our lifetime, he ventured deep into the African wilderness, speaking to local tribespeople and activists as well as to rangers, scientists and conservationists about why lions are close to extinction and what can be done to save them. In *The Last Lions of Africa*, we walk alongside Anthony as he reveals the latest extraordinary science surrounding the earth's dwindling lion populations and their often surprising relationship to mankind. As he uncovers heartbreaking and astonishing accounts of individual lions, prides and habitats, each chapter unfolds as both gripping campfire story and deeply researched exploration of larger mysteries in the natural world. Anthony's vivid storytelling weaves together natural history, ancient lore and multidisciplinary science to show us a world in which human populations are growing and wild lands are shrinking;

where lions and indigenous peoples fight not for sovereignty over the land but for their very existence. In this gripping and crucial book, Anthony Ham brings Africa, its people and its endangered lions to magnificent life and shows the surprising ways those last lions might be saved.

**Panthera Leo and the Call of Destiny** Sarah Tyler, 2010-04 Possessed by the spirit of an ancient Prophecy, Aeonna Ja'Aquiria-Queen of the Catanians-embarks on a quest to fulfill a destiny she doesn't believe in. In order to complete the first task, however, Aeon finds that she must immerse herself into the world of the humans and seek out the village and ally of the wizard who has brought pain to her people for centuries. While pursuing her quest, Aeon finds herself imprisoned. But the unlikely friendships formed between her, Princess Alexandria of Lavacon and Prince Stephon Tyro of Adora, provide hope for Aeon's release. However, all human relations, both good and bad, are foreseen as trouble. These rivalries and friendships threaten the very task Aeon seeks to accomplish. The gods, Panthera spirits and three powerful wizards are determined to ensure that nothing stands between her and the next task. Having a passion for writing since she was ten years old, Sarah Tyler has written her debut novel, *Panthera Leo & the Call of Destiny*. Her dream to be an author has resulted in this selfpublished first edition. She resides in Highlands Ranch, Colorado, where she attends ThunderRidge High School. Sarah looks forward to sharing the next installment in the Panthera Prophecy series, *Panthera Onca & the Divine Power*.

**Humans and Lions** Keith Somerville, 2019-07-10 This book places lion conservation and the relationship between people and lions both in historical context and in the context of the contemporary politics of conservation in Africa. The killing of Cecil the Lion in July 2015 brought such issues to the public's attention. Were lions threatened in the wild and what was the best form of conservation? How best can lions be saved from extinction in the wild in Africa amid rural poverty, precarious livelihoods for local communities and an expanding human population? This book traces man's relationship with lions through history, from hominids, to the Romans, through colonial occupation and independence, to the present day. It concludes with an examination of the current crisis of conservation and the conflict between Western animal welfare concepts and sustainable development, thrown into sharp focus by the killing of Cecil the lion. Through this historical account, Keith Somerville provides a coherent, evidence-based assessment of current human-lion relations, providing context to the present situation. This book will be of interest to students and scholars of environmental and African history, wildlife conservation, environmental management and political ecology, as well as the general reader.

Mystery of the White Lions Linda Tucker, 2010-06-01 The inspiring firsthand account of one woman's journey into African shamanism and the mysteries of the most sacred animal on the continent: the legendary White Lion. In 1991, Linda Tucker was rescued from a pride of lions in the Timbavati game region by a medicine woman known as the "Lion Queen." So began Linda's lifelong journey into the wisdom and ceremonies of Old Africa, in which humans and lions are able to cross the species barrier. Such knowledge is in accordance with the most guarded secrets of Ancient Egypt and humankind's greatest riddle, the Sphinx. Scientists in our day have established that humankind's most significant evolutionary leap occurred as a result of our ancestors' interaction with great cats. The White Lion is a genetic rarity within *Panthera leo*, and occurred in just one region on Earth: Timbavati. Today, White Lions form the center of the notorious "canned" trophy-hunting industry—hand-reared captive lions, shot in enclosures for gross sums of money. By contrast, shamans believe that killing a "lion sun god" is the ultimate sacrilege. How the human species treats such precious symbols of God in nature may determine how nature treats the human species. Whether we view them as prophetic "Lions of God" or simply as rare genetic mutations, the story of the White Lions is a true legend unfolding in our own extraordinary times. Inspiring, captivating, and thoroughly researched, *Mystery of the White Lions* is an unforgettable portrait of these magnificent

beasts and of the overwhelming love that has driven Linda's every action to save them. "Through understanding the White Lion we will understand ourselves and our great role in the chain of being."  
—Deepak Chopra
