German Tank Hunters Bob Carruthers, 2013-01-19 This unique collection of contemporary combat accounts provides a primary source insight into the reality of anti-tank warfare on the Eastern Front. Both armoured and infantry based operations are considered. This book is part of the 'Hitler's War Machine' series, a new military history range compiled and edited by Emmy Award winning author and historian Bob Carruthers. The series draws on primary sources and contemporary documents to provide a new insight into the true nature of Hitler's Wehrmacht. The series consultant is David McWhinnie creator of the award winning PBS series 'Battlefield'.

The History of the Panzerjäger Thomas Anderson, 2018-08-23 The German Panzerjäger, or Panzerjägertruppe, was one of the most innovative fighting arms of World War II and its story has never properly been told. Many books have focused on an element of the story - the Hetzer, Jagdpanzer, Jagdpanther - but this is the first time that the whole story of the development and organization of Nazi Germany's anti-tank force will have been covered, from its earliest origins in World War I, through its development in the interwar period, and its baptism of fire in the early days of World War II. This is the first of two volumes that will trace the story through the glory years of Blitzkrieg and the improvements that were made when Soviet tanks were first encountered, leading to new weapons, tactics and organization. It is packed with previously unpublished wartime photographs, combat reports, and detailed charts and statistics to give an unparalleled account of this unique arm of the Wehrmacht.

The History of the Panzerjäger Thomas Anderson, 2020-11-26 The German Panzerjäger, or Panzerjägertruppe, was one of the most innovative fighting arms of World War II and its story has never properly been told, until now. Many books have focused on an element of the story - the

Hetzer, Jagdpanzer, and Jagdpanther – but this two-volume series represents the first time that the whole history of the development and organization of Nazi Germany's anti-tank force has been revealed. This second volume takes up the story in the mid-war years and follows the development of the Panzerjäger, describing the innovative new vehicles such as the Ferdinand, Elefant and Nashorn. German Armoured Fighting Vehicle specialist Thomas Anderson also analyses the key role it performed in the War in the Desert and across the Eastern Front, and ultimately in the defence of the Reich itself. Packed with previously unpublished wartime photographs, combat reports, and detailed charts and statistics, this book offers an unparalleled account of this unique arm of the Wehrmacht.

Panzerjäger vs KV-1 Robert Forczyk, 2012-10-20 On the Soviet side, based upon lessons from the Spanish Civil War, the Red Army decided to develop a heavy “breakthrough” tank to smash enemy infantry defenses. This resulted in the KV-1 and KV-2 tanks, introduced in 1939. At the start of Operation Barbarossa, both these tanks were virtually invulnerable to the weapons of the Panzerjäger and demonstrated their ability to overrun German infantry on several occasions. This advantage gave the Red Army a window of opportunity between the fall of 1941 and the spring of 1942 to use their heavy tanks to repel the German invasion in a series of desperate counteroffensives. Yet the window of Soviet advantage was a narrow one and the duel between the Soviet KV heavy tanks and German Panzerjäger had a major impact upon the struggle for the strategic initiative in 1941-42.

German Tank Hunters - the Panzerjäger Bob Carruthers, 2012-06-01 This comprehensive overview of the anti-tank weapons utilised by the Wehrmacht and the conduct of operations in the field was compiled and introduced by Emmy Award winning historian Bob Carruthers. It draws heavily on contemporary Allied intelligence reports to build a unique primary source representation of how events unfolded on the battlefield. The reports and images form an absorbing study drawn from a unique series of primary sources and images. Together they produce a fascinating insight into the fast changing world of the tank hunters from 1939 -1945, and conveys to the modern reader a vivid sense of how their weapons and tactics were viewed and communicated to the Allied troops at the time. Everything is included from the sophisticated weapon systems of the late war years to the improvised tactics adopted by front line troops. Essential reading for anyone with an interest in the weapons and tactics of the Wehrmacht in World War II. Hetzer - Jagdpanzer 38 Tank Destroyer Dennis Oliver, 2021-08-04 By 1944 the German army was on the defensive on all fronts and Allied bombing was putting increasing pressure on the nation's industrial output. Since the earliest days of the war the Germans had experimented with mounting

anti-tank weapons on obsolete chassis and one of the most successful of these would prove to be the Jagdpanzer 38, more often referred to today as the Hetzer. Small and unimposing the Hetzer's appearance belied its effectiveness. Armed with the powerful 7.5cm L/48 gun, the same weapon fitted to the Jagdpanzer IV, the Hetzer featured armour sloped armour plates of up to 60mm thickness and was capable of a top speed of 42 kilometres per hour. Almost 3,000 examples were assembled and its low cost and ease of production meant that it was Germany's most important tank killer of the late war period. In his latest book in the TankCraft series Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Hetzer tank destroyers and the units of the German Army and Waffen-SS that operated them during the last months of the Second World war. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic tanks.

Panzerjager-Tank Hunter William B. Folkestad, Bernhard Averbeck, 2000-02 This book follows young Bernard Averbeck as he leaves home to fight on the Eastern and Western Fronts in World War II.

German Anti-tank (Panzerjäger) Troops in World War II Wolfgang Fleischer, Richard Eiermann, 2004 German Anti-Tank (Panzerjager) Troops in World War II.

Eastern Inferno Christine Alexander, Mason Kunze, 2010-11-30 "Remarkable personal journals . . . revealing the combat experience of the German-Russian War as seldom seen before . . . a harrowing yet poignant story" (Military Times). Hans Roth was a member of the anti-tank panzerjager battalion, 299th Infantry Division, attached to the Sixth Army, as the invasion of Russia began. As events

transpired, he recorded the tension as the Germans deployed on the Soviet frontier in June 1941. Then, a firestorm broke loose as the Wehrmacht tore across the front, forging into the primitive vastness of the East. During the Kiev encirclement, Roth's unit was under constant attack as the Soviets desperately tried to break through the German ring. At one point, after the enemy had finally been beaten, a friend serving with the SS led him to a site—possibly Babi Yar—where he witnessed civilians being massacred. After suffering through a brutal winter against apparently endless Russian reserves, his division went on the offensive again when the Germans drove toward Stalingrad. In these journals, attacks and counterattacks are described in you-are-there detail. Roth wrote privately, as if to keep himself sane, knowing his honest accounts of the horrors in the East could never pass Wehrmacht censors. When the Soviet counteroffensive of winter 1942 begins, his unit is stationed alongside the Italian 8th Army, and his observations of its collapse, as opposed to the reaction of the German troops sent to stiffen its front, are of special fascination. Roth's three journals were discovered many years after his disappearance, tucked away in the home of his brother. After his brother's death, his family discovered them and sent them to Rosel, Roth's wife. In time, Rosel handed down the journals to Erika, Roth's only daughter, who had emigrated to America. Roth was likely working on a fourth journal before he was reported missing in action in July 1944. Although his ultimate fate remains unknown, what he did leave behind, now finally revealed, is an incredible firsthand account of the horrific war the Germans waged in Russia.

Panzerjäger Improvisations, Combinations on Captured Chassis, Marder I and II, Prototypes, Etc

Jagdpanzer IV - German Army and Waffen-SS Tank Destroyers Dennis Oliver, 2020-08-31

Combining the destructive firepower of the 75mm gun with the mobility of the Pzkw IV medium tank , the Jagdpanzer IV was quite possibly the most effective tank destroyer of the Second World War. From early 1944 these vehicles were allocated to the anti-tank battalions of Panzer and Panzergrenadier divisions and saw action in Normandy, the Ardennes and the final battles in Germany. In his latest book in the TankCraft series, Dennis Oliver uses contemporary photographs and meticulously researched, superbly presented color and monochrome illustrations to tell the story of these self-propelled anti-tank guns and the units which operated them in the German defense of the Western Front. As with all the books in the TankCraft series, a large part of this work showcases available model kits and after-market products, complemented by a gallery of expertly constructed and painted models. Technical details as well as modifications introduced during production and in the field are also explained giving the modeler all the information and knowledge required.

Sturmartillerie & Panzerjäger 1939-45 Bryan Perrett,1999-11-18 Originally the German assault gun was designed as an infantry support weapon, but the changing conditions of the battlefields of the Second World War forced it to adapt to perform a number of different roles, most importantly as a tank destroyer, although the infantry support role was never wholly discarded. If the much-glamorised Panzer divisions were the sword of the German army then the assault gun and tank destroyer units were its shield. As the Panzers' grip on the battlefield began to fail, though, it was left to the assault gun and tank destroyer crews to take up the burden.

Panzerjager in Action Uwe Feist,Mike Dario,1973

The Combat History of German Heavy Anti-Tank Unit 653 in World War II Karlheinz Munch,2005 Hundreds of photos, many never published before, of Germany's rarely seen tank destroyers, including the Ferdinand, Elephant, and JagdtigerColor illustrations focus on unit markings,

numbering, and camouflage. Accompanying text chronicles the unit's combat operations plus there are personal accounts from the men who rode in these mechanical monsters. German Heavy Anti-Tank Unit 653 was equipped with the heaviest tank destroying vehicles of the German armed forces. Initially activated as an assault gun battalion and redesignated in April 1943, the 653 received its first Ferdinand heavy tank destroyers (later modified and renamed Elephants) in May 1943 and went into action on the Eastern Front a month later. In 1944, the unit converted to the even more massive Jagdtiger. The seventy-five-ton, heavily armored Jagdtiger was the behemoth of the battlefield and boasted a 128mm gun—as opposed to the Ferdinand's 88—with a range of more than thirteen miles, making it deadly despite its limited mobility. Outfitted with these lethal giants, the 653 saw service in Russia, Italy, Austria, and Germany.

German Tanks in Normandy 1944 Steven J. Zaloga, 2021-08-19 A new study of the German Panzer forces that stood between the Allies' D-Day beachhead and victory in World War II – how they compared, how they were organized, and how they fought. The German tank forces in Normandy in June–August 1944 had the advantage of fighting on the defensive side, as well as comprising some of the most powerful and advanced tanks used by any side in the war. Yet success in tank warfare depends on many things beyond technological superiority. This book describes the types of tanks, tank destroyers and assault guns used by the Panzer units in Normandy, how they fought on the Normandy battlefield, and why they were overwhelmed by the advancing Allies. It discusses the organization and equipment of the units, providing thumbnail sketches of basic organization and doctrine as well as statistical data on the types and categories of AFVs in German service.

Waffen-SS Armour in Normandy Norbert Számvéber, 2012-03-14 Waffen-SS Armour in Normandy presents the combat history of SS-Panzer Regiment 12 and SS-Panzerjäger Abteilung 12 in

the Battle for France from June to the end of August 1944 based on transcriptions of their original unit war diaries from the Military History Archives in Prague. Both armored units belonged to the 12.SS-Panzer Division Hitlerjugend. SS-Panzer Regiment 12 was fully equipped with Panzer IV and Panther tanks. The main AFV of SS-Panzerjäger Abteilung 12 was the Jagdpanzer IV L/48 tank destroyer. The structure of the volume is partly source publication (documents of SS-Panzer Regiment 12) and partly study (the deployment of SS-Panzerjäger Abteilung 12). The text was written and footnoted by the author based upon original wartime files in Prague that have remained almost unknown. The book starts with the story of the units' establishment and training in 1943/1944, including, for example, the shipments of equipment, orders of battle and tactical numbers of the tanks. After this introduction, a highly detailed daily chronology of the combat actions is provided, from 12.SS-Panzer Division traveling to the Caen sector to Operation Totalize and the withdrawal to the Seine River. Documents from SS-Panzer Regiment 12 presented in the book include the following: combat reports, list of knocked-out enemy tanks, German personnel and tank losses, combat orders, summary of acquired combat experiences and others. This is an impressive look at tactical-level events and command decisions, highlighting the armored combat tactics that were able to stop Montgomery's Army Group from breaking through the German lines near Caen for two months. The study includes a number of detailed maps and excellent photos. In addition, the book has benefited from the contribution of rare information, photographs and documents from the archive of noted Waffen-SS historian Mark C. Yerger.

Hitler's Tank Destroyers Paul Thomas, 2017-10-30 This WWII pictorial history of Nazi anti-tank vehicles illustrates the Germans' ever-increasing need for defense against Allied armor. During World War II, combatants on both sides developed increasingly effective armored vehicles and tactics. The

German military's answer to American Shermans and British Cruisers was to create dedicated anti-tank vehicles such as the Panzerjäger I, Sturmgeschütz, Marders, Nashorn, Hetzer, Jagdpanzer, Elefant, Jagdtiger IV and Jagdpanther. Fully illustrated with rare wartime photographs, Hitler's Tank Destroyers covers each of these models, detailing their development and technology throughout the war. As the war progressed, larger and more powerful tank destroyers entered the battlefield. Due to the overwhelming enemy opposition, they were compelled to not only attack armor, but also support ground troops. This comprehensive account covers all the Nazis mobile anti-tank vehicles in words and images.
