

Panzerjager Tiger

Anthony Tucker-Jones

The Panzerjäger Tiger(p) (Sd.Kfz. 184) Ferdinand Slawomir Zajackowski,2022-01-31 The German heavy tank destroyer Panzerjäger Tiger (P) (Sd.Kfz. 184) Ferdinand was based on the chassis of the Tiger (P) tank designed by Ferdinand Porsche. The vehicle was not accepted by army, but because 90 chassis have already been produced at the Nibelungenwerke plant, it was decided that they could be usefully developed. This is how the tank destroyer based on the Tiger (P) chassis was born.

Ferdinand/Elefant David Doyle,2023-04-28 A concise, visual guide to Porsche's giant tank hunter.

Ferdinand and Elephant Tank Destroyer Thomas Anderson,2015-04-20 This is the story of the largest and statistically most successful tank destroyer of World War II. The Ferdinand was a true behemoth, and although only 91 examples were built, they took a savage toll of Soviet armour in the Battle of Kursk and subsequent operations on the Eastern Front. This study explores the technical development and combat deployment of this remarkable vehicle, from its' origins in the Porsche Tiger Tank through its deployment under the designation 'Ferdinand' in the Citadel offensive, to its modification and redesignation as the 'Elefant' and final use in the desperate Battle of Berlin. Drawing on original archival material from within Germany, private collections and heretofore unpublished photographs this title is an essential illustrated history to one of the most famous armoured vehicles ever built.

Hitler's Tank Destroyers Paul Thomas,2017-10-30 This WWII pictorial history of Nazi anti-tank vehicles illustrates the Germans' ever-increasing need for defense against Allied armor. During World War II, combatants on both sides developed increasingly effective armored vehicles and tactics. The German

military's answer to American Shermans and British Cruisers was to create dedicated anti-tank vehicles such as the Panzerjäger I, Sturmgeschütz, Marders, Nashorn, Hetzer, Jagdpanzer, Elefant, Jagdtiger IV and Jagdpanther. Fully illustrated with rare wartime photographs, Hitler's Tank Destroyers covers each of these models, detailing their development and technology throughout the war. As the war progressed, larger and more powerful tank destroyers entered the battlefield. Due to the overwhelming enemy opposition, they were compelled to not only attack armor, but also support ground troops. This comprehensive account covers all the Nazis mobile anti-tank vehicles in words and images.

Modelling the Tiger Tank in 1/72 scale Alex Clark, 2012-07-20 The Tiger tank is probably the most famous tank of World War II. Both the Tiger I and its successor, the Tiger II, were used as bases for other German vehicles. This book covers a wide range of vehicles based on the chassis of the Tiger I and II tanks in 1/72 scale. It provides a detailed guide to modelling the basic tank versions as well as the Sturmmörser Sturmpanzer (Tiger I variant), Jagdtiger (Tiger II variant) and the Panzerjäger Tiger (P) Elefant tank destroyer. A variety of camouflage schemes are described in depth, and the text covers photo-etched parts, resin aftermarket sets, scratch-building, and the use of figures and groundwork.

PANZERJÄGER ,

Jagdpanther vs SU-100 David R. Higgins, 2014-04-20 As World War II in Europe reached its end, armour development and doctrine had experienced several years of massively accelerated change, especially within the crucible of the Eastern Front. The German Jagdpanther and Soviet SU-100, both turretless tank-destroyer designs based on a 'traditional' turret-tank chassis, were the culminating examples

of how the progression of experience, resources and time constraints produced vehicles that were well suited for roles of defence and offence, respectively. The Jagdpanther represented a well-balanced solution and an excellent use of limited resources, while the SU-100 was a natural progression of the SU-85, where numbers produced compensated for rudimentary construction, poor crew comfort and limited optics.

Tiger I and Tiger II Anthony Tucker-Jones, 2013-07-17 The German Tiger I and Tiger II (known to the Allies as the 'King Tiger' or 'Royal Tiger') were the most famous and formidable heavy tanks of the Second World War. In their day their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the legends and misunderstandings that have grown up around them.??The Tigers were over-engineered, required raw materials that were in short supply, were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting. Yet the myth of the Tigers, with their 88mm guns, thick armour and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War.??Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of colour plates showing the main variants of the designs and the common ancillary equipment and unit markings.??Anthony Tucker-Jones is a prolific writer on the history of fighting vehicles and armoured warfare. He has also written extensively on military affairs and terrorism.

After a career in the intelligence community, he became a freelance defence writer and military historian. His most recent books are *Armoured Warfare on the Eastern Front*, *Armoured Warfare in the North African Campaign*, *Armoured Warfare in the Battle for Normandy*, *The Kalashnikov in Combat* and *The Soviet-Afghan War*.

Tiger I & Tiger II Anthony Tucker-Jones, 2013-07-17 A pictorial history and analysis of the infamous World War II German tanks. The German Tiger I and Tiger II (known to the Allies as the King Tiger or Royal Tiger) were the most famous and formidable heavy tanks of the Second World War. In their day, their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the myths that have grown up around them. The Tigers were over-engineered, required raw materials that were in short supply, and were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts. Yet the myth of the Tigers, with their 88mm guns, thick armor, and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War. Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings. His book is an essential work of reference for enthusiasts.

Hetzer - Jagdpanzer 38 Tank Destroyer Dennis Oliver,2021-08-04 By 1944 the German army was on the defensive on all fronts and Allied bombing was putting increasing pressure on the nation's industrial output. Since the earliest days of the war the Germans had experimented with mounting anti-tank weapons on obsolete chassis and one of the most successful of these would prove to be the Jagdpanzer 38, more often referred to today as the Hetzer. Small and unimposing the Hetzer's appearance belied its effectiveness. Armed with the powerful 7.5cm L/48 gun, the same weapon fitted to the Jagdpanzer IV, the Hetzer featured armour sloped armour plates of up to 60mm thickness and was capable of a top speed of 42 kilometres per hour. Almost 3,000 examples were assembled and its low cost and ease of production meant that it was Germany's most important tank killer of the late war period. In his latest book in the TankCraft series Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Hetzer tank destroyers and the units of the German Army and Waffen-SS that operated them during the last months of the Second World war. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic tanks.

The Combat History of German Heavy Anti-Tank Unit 653 in World War II Karlheinz

Münch,2022-03-15 German Heavy Anti-Tank Unit 653 was equipped with the heaviest tank destroying vehicles of the German armed forces. Initially activated as an assault gun battalion and redesignated in April 1943, the 653 received its first Ferdinand heavy tank destroyers (later modified and renamed Elephants) in May 1943 and went into action on the Eastern Front a month later. In 1944, the unit converted to the even more massive Jagdtiger. The seventy-five-ton, heavily armored Jagdtiger was the behemoth of the battlefield and boasted a 128mm gun-as opposed to the Ferdinand's 88-with a range of more than thirteen miles, making it deadly despite its limited mobility. Outfitted with these lethal giants, the 653 saw service in Russia, Italy, Austria, and Germany. The Combat History of German Heavy Anti-Tank Unit 653 in World War II includes hundreds of photos, many never published before, of Germany's rarely seen tank destroyers, including the Ferdinand, Elephant, and Jagdtiger. Color illustrations focus on unit markings, numbering, and camouflage, and the accompanying text chronicles the unit's combat operations as well as personal accounts from the men who rode in these mechanical monsters.

Tiger I and Tiger II Tanks Dennis Oliver,2021-04-30 By the first weeks of 1945, the Eastern Front had been pushed back to the Carpathian mountain passes in the south and Warsaw on the Vistula River in the center, while in the north, the German army was fighting in East Prussia. The Wehrmacht's armored and

mobile formations were now employed exclusively as fire brigades, rushed from one crisis to the next as the Red Army pushed inexorably westward. Critical to the German defense were the army's heavy Panzer battalions whose Tiger tanks, with their 8.8 cm guns, were almost invincible on the open plains of central Europe. In his latest book in the TankCraft series, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and units of the German Army and Waffen-SS heavy Panzer battalions that struggled to resist the onslaught of Soviet armor during the last days of the conflict which culminated in the battle for Berlin. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic tanks.

Hitler's Heavy Tiger Tank Battalions, 1942–1945 Ian Baxter, 2020-02-28 The heavy tanks and other armored vehicles of WWII Germany come vividly to life in this informative volume of detailed wartime photos. With rare, often unpublished photographs and enlightening captions, Hitler's Heavy Tiger Tank Battalions provides a superb record of the Wehrmacht's Schwere Panzerableitung. In addition to the Tiger I and II heavy tanks, these battalions were equipped with Panzer III medium tanks; Flakpanzer IV self-propelled anti-aircraft guns, halftrack special purpose vehicles, Kettenkrad gun tractors, and Berge Panther armored recovery vehicles. Between 1942 and 1945, heavy tank battalions saw action on the Eastern Front, Italy and North West Europe before being pushed back to Berlin for the final defensive battles. This

volume features graphic photographs and descriptions of vehicles on operations in all these theatres. Modelers and equipment buffs in particular will find this Images of War book extremely useful and fascinating.

Stíhač tanků Ferdinand/Elefant Anderson Thomas,2016-02-16 Těžký stíhač tanků Ferdinand a jeho pozdější verze Elefant byly největší a statisticky nejúspěšnější německé stíhače tanků 2. světové války. I když jich bylo vyrobeno relativně málo, dokázaly mezi spojeneckými tanky rozsevat zkázu a úspěšné a vražedné byly zvláště v ohromných tankových bitvách na východní frontě. Tato nová ilustrovaná historická publikace odborníka na obrněnou techniku Thomase Andersona, čerpající z původních archivních materiálů z Německa, soukromých sbírek a vzácných fotografií, se zabývá technickým vývojem a bojovým nasazením tohoto pozoruhodného vozidla, jednoho z nejslavnějších obrněných vozidel, které kdy byly vyrobeny. Sleduje jeho původ, na jehož počátku byl Porscheho tank Tiger, první nasazení pod jménem Ferdinand, jeho modernizaci a přejmenování na Elefant, až po účast na závěrečné urputné obraně Berlína. Jde o fascinující příběh jednoho z technicky nejskvělejších strojů, který se objevil na bojištích 2. světové války.
