If I Get Hit By a Bus Tomorrow, Here's How to Replace the Toilet Paper Roll

Mary McHugh, 2014-07-12 With this delightful, tongue-in-cheek guide for men who can win a case before the Supreme Court or run a conglomerate but can't find the butter, Ms. McHugh provides a step-by-step guide for making breakfast, emptying the dishwasher, finding the clothes hamper and doing the laundry, along with an assortment of other domestic necessities. She continues with wise advice for men whose wives are pregnant—"How to Live with a Pregnant Wife Without Complaining about Anything While Making Her Feel Sexy and Desirable At All Times", tells them how to go without sleep for three months after the baby is born, and finishes up with "How to Watch Football and the Baby at the Same Time." A chapter on taking care of three small boys while staying sane should be on every young father's emergency list for times when his wife is out of town on business or visiting her mother in Iowa. And finally, instructions on answering a ringing telephone, folding shirts for a business trip and finding his wallet, keys, glasses, socks and underwear are absolute must-reads for every man who thinks some invisible being does all those things. Aimed at busy women of all ages, this book will also make grown men laugh and might even be useful when they run out of underwear.

The Paper Animal Bus, 2008-07 A child's trip is beguiled by the talent and kindness of a fellow passenger. The art of origami turns a long trip into a wonderful journey filled with delightful animals that become more real as her imagination sweeps them into a wild bus ride. The book includes step-by-step directions for making an origami animal. Order at: www.spencerfamilybooks.com

Accessibility and the Bus System Nick Tyler, 2002 In today's society everyone should be able to access the bus system and obtain the benefits it offers. *Accessibility and the Bus System*, presents the theory and practice of accessibility and how this integrates into the real world of transportation. This indispensable new book details the process of designing an accessible bus system from the underlying principles through to the practical implementation, monitoring and evaluation. Bus stop design, interaction with traffic, and urban and rural systems are all examined in-depth.

Origami City Taro Yaguchi, 2020-06-23 Introducing fold-by-number, a revolutionary origami new concept in paper folding. Created by the founder of Taro's Origami Studio, *Origami City* marries the joy of paper folding with the foolproof appeal of paint-by-number with the imaginative play of LEGO or Playmobils. This ingenious book is an all-in-one kit for a complete origami metropolis: 75 realistic pieces to fold with step-by-step instructions; an illustrated paper play mat; and over 100 sheets of preprinted origami paper with numbers and lines for folding. The models—houses, office buildings, cars, emergency and construction vehicles, an airport, even dogs and squirrels to run in the parks—are meticulously detailed, illustrated by Brooklyn-based artist Simon Arizpe. For ages 7 and up.

Discrete Event Simulation of Bus Terminals Therese Lindberg, 2019-05-06 Public transport is important to society as it provides spatial accessibility and reduces congestion and pollution in comparison to other motorized modes. To assure a high-quality service, all parts of the system need to be well-functioning and properly planned. One important aspect for the system's bus terminals is their capacity. This needs to be high enough to avoid congestion and queues and the delays these may lead to. During planning processes, various suggested designs and solutions for a terminal need to be evaluated. Estimating capacity and how well the suggestions will function is a challenging problem, however. It requires analysis of complex interactions and behaviour of the vehicles. This sort of analyses can preferably be carried out using microsimulation. Furthermore, a discrete event simulation approach can make use of the fact that the path of a vehicle through a terminal

can readily be described by a sequence of events (such as arriving, starting to drive to a stop etc.). The overall aim of this thesis is to investigate how discrete event simulation can be used to evaluate bus terminal design and traffic control policies. The main contribution is the development of a method for bus terminal simulation. As a first step, a discrete event simulation model of a combined bus and tram stop is formulated. The model is tested on a real system where the current design is compared to an alternative one. The test shows that a model developed with a discrete event approach can be used to evaluate the situation at a stop and compare design alternatives. In the next step, a general discrete event simulation model of bus terminals is formulated. A modular approach is introduced, where a terminal can be constructed from a set of module building blocks. Another important contribution of the model is its spatial resolution that allows for queues and blockages to occur throughout the terminal. By applying the simulation model in a case study, it is shown that the model can be used to evaluate and compare various scenarios related to the layout, number of passengers and the outside traffic situation. Lastly, the bus terminal simulation model is used in a second case study in order to compare model output with empirical data. This study identified a number of factors that may have had an influence on differences between observations and simulation results and that is of interest to look further into. This includes the actual adherence to terminal rules and the effects of model parameters.

Moving People Policy Paper 7 Bus Industry Confederation of Australia. National Contracts Working Committee,2016-04-15 National Guidelines: Bus Services Procurement and Bus Service ContractsThe bus and coach industry has, for a long time, fostered relationships with academics, industry experts and government, to grow public transport services and patronage and to help develop contractual frameworks that support this growth. These connections and experience have been utilised in preparing the enclosed guidelines. It is intended that these national guidelines will help to explain Industry's position on key contractual matters relating to route and school services. Importantly, these guidelines have been framed with public value uppermost in mind, while recognising the importance of a financially viable bus industry if quality bus services are to be provided on a sustainable basis for our communities.

Understanding and Applying Advanced On-board Bus Electronics John J. Schiavone,National Research Council (U.S.). Transportation Research Board,Transit Cooperative Research Program,1999 The report provides an overview of electronics and its application to buses and other transportation sectors. The report then addresses electronic integration, potential benefits offered by integration, and transit agency experiences with the technology. The report concludes with guidelines for implementing transit bus electronics. It is intended to be a primer on the subject, providing essential background information to serve as a starting point for acquiring additional knowledge.

Bunnies on the Bus Philip Ardagh, 2020-07-14 A romping, riotous read-aloud from best-selling author Philip Ardagh and award-winning illustrator Ben Mantle Bunnies on the bus! Bunnies on the bus! No wonder there's a fuss about the bunnies on the bus! There are bunnies on the bus, and they're causing mayhem in Sunny Town! Watch as they whiz past the bus stop, fly by the swings, and zoom over the crosswalk — these bunnies aren't stopping for anyone. They finally reach the station, but where are they hopping off to now? Uh-oh . . . Acclaimed author Philip Ardagh's rhyming, high-energy text and "Bunnies on the bus!" refrain is ideal for library or classroom read-alouds, and Ben Mantle's colorful illustrations are chock-full of zany details perfect for repeat reads.

The London DMS Bus Matthew (Matt) Wharmby, 2016-11-30 Vilified as the great failure of all London Transport bus classes, the DMS family of Daimler Fleetline was more like an unlucky victim of straitened times. Desperate to match staff shortages with falling demand for its services during the late 1960s, London Transport was just one organization to see nationwide possibilities and savings in legislation that was about to permit double-deck one-man-operation and partially fund purpose-built vehicles. However, prohibited by circumstances from developing its own rear-engined Routemaster (FRM) concept, LT instituted comparative trials between contemporary Leyland Atlanteans and Daimler Fleetlines. The latter came out on top, and massive orders followed. The first DMSs entering service on 2 January 1971. In service, however, problems quickly manifested. Sophisticated safety features served only to burn out gearboxes and gulp fuel. The passengers, meanwhile, did not appreciate being funnelled through the DMS's recalcitrant automatic fare-collection machinery only to have to stand for lack of seating. Boarding speeds thus slowed to a crawl, to the extent that the savings made by laying off conductors had to be negated by adding more DMSs to converted routes! Second thoughts caused the ongoing order to be amended to include crew-operated Fleetlines (DMs), noise concerns prompted the development of the B20 "quiet bus" variety, and brave attempts were made to fit the buses into the time-honored system of overhauling at Aldenham Works, but finally the problems proved too much. After enormous expenditure, the first DMSs began to be withdrawn before the final RTs came out of service, and between 1979 and 1983 all but the B20s were sold — as is widely known, the DMSs proved perfectly adequate with provincial operators once their London features had been removed. OPO was to become fashionable again in the 1980s as the politicians turned on London Transport itself, breaking it into pieces in order to sell it off. Not only did the B20 DMSs survive to something approaching a normal lifespan, but the new cheap operators awakening with the onset of tendering made use of the type to undercut LT, and it was not until 1993 that the last DMS operated.
