Rhinoceros Giants Donald R. Prothero, 2013 A book for everyone fascinated by the huge beasts that once roamed the earth, *Rhinoceros Giants: The Paleobiology of the Indricotheres*, introduces a prime candidate for the largest land mammal that ever lived - the giant hornless rhinoceros, *Indricotherium*. These massive animals lived in Asia and Eurasia for more than 14 million years, about 37 to 23 million years ago. They had skulls 2 metres long, stood over 7 meters at the shoulder, and were nearly twice as heavy as the largest elephant ever recorded, tipping the scales at 20,000 kg. Fortunately, the big brutes were vegetarians, although they must have made predators think twice before trying to bring them down. In this book for lovers of ancient creatures great and small, Donald R. Prothero tells their story, from their discovery by palaeontologists just a century ago to the latest research on how they lived and died, with some interesting side trips along the way.

Urana's Seven Daughters Michael Brown, 2017-12-28 Up for an atomic saga? But first, if little atoms could only talk, just think of the stories they could tell us about our planet and universe. This is a voyage of discovery on a celestial and planetary scale. Seven lovely little atoms are born in the Oort Cloud. They are thrown into a beautiful blue-water planet and are split up. They soon find that this water planet is the best atomic amusement park ever. They will meet and be hosted by many simple and complex life forms. They will suffer through earthquakes, asteroid strikes, thunderstorms, hurricanes, and volcanic eruptions. They will see the best and worst of an emerging mankind. None of them will suffer, and all will have the fun of many lifetimes.

**Dinosaur Memories** Allen Debus, 2002-06 Dinosaur memories are hard to forget! Most who revel in the current renaissance in dinosaur science, art, fiction and movies, or who enjoy the other appealing prehistoric animals so well popularized by the media have fond recollections of what it was like "growing up dinosaur." Together with wife Diane and his father Allen G. Debus, Allen A. Debus unveils treasured dinosaur memories and stories about prehistoric animals and paleo-people, spanning from the cold-blooded dinosaur 'era,' to the modern wave dinosaur renaissance. Beginning with fondly recalled roadtrips to prehistoric places where *T. rex* still reigns, *Dinosaur Memories* ventures into the realm of thunder beasts and explores the rich 'pop-cultural' appeal of prehistoric animals. If you've ever collected dinosaurs, enjoyed fossil hunting or visits to see the old bones in museums, *Dinosaur*

Memories is a book you'll still recall years from now! Thirty-five chapters are grouped into seven sections titled, "Roads Into Prehistory," "Thunder Beasts," "Dinosaur Worlds," "Fantasy Dinosaurs," "Fossil Trickery," "Paleo-people," and "Rustlin' up Dinos."

The Story of Life in 25 Fossils Donald R. Prothero, 2015-08-25 Every fossil tells a story. Best-selling paleontology author Donald R. Prothero describes twenty-five famous, beautifully preserved fossils in a gripping scientific history of life on Earth. Recounting the adventures behind the discovery of these objects and fully interpreting their significance within the larger fossil record, Prothero creates a riveting history of life on our planet. The twenty-five fossils portrayed in this book catch animals in their evolutionary splendor as they transition from one kind of organism to another. We witness extinct plants and animals of microscopic and immense size and thrilling diversity. We learn about fantastic land and sea creatures that have no match in nature today. Along the way, we encounter such fascinating fossils as the earliest trilobite, *Olenellus*; the giant shark *Carcharocles*; the fishibian *Tiktaalik*; the Frogamander and the Turtle on the Half-Shell; enormous marine reptiles and the biggest dinosaurs known; the first bird, *Archaeopteryx*; the walking whale *Ambulocetus*; the gigantic hornless rhinoceros *Paraceratherium*, the largest land mammal that ever lived; and the *Australopithecus* nicknamed Lucy, the oldest human skeleton. We meet the scientists and adventurers who pioneered paleontology and learn about the larger intellectual and social contexts in which their discoveries were made. Finally, we find out where to see these splendid fossils in the world's great museums. Ideal for all who love prehistoric landscapes and delight in the history of science, this book makes a treasured addition to any bookshelf, stoking curiosity in the evolution of life on Earth.

Indica Pranay Lal, 2016-12-07 Few places have been as influential as the Indian subcontinent in shaping the course of life on Earth. Yet its evolution has remained largely unchronicled. *Indica: A Deep Natural History of the Indian Subcontinent* fills this gap. From the oldest rocks, formed three billion years ago in Karnataka, to the arrival of our ancestors 50,000 years ago on the banks of the Indus, the author meticulously sifts through wide-ranging scientific disciplines and through the layers of earth to tell us the story of India, filled with a variety of fierce reptiles, fantastic dinosaurs, gargantuan mammals and amazing plants. Beautifully produced in full colour, with a rare collection of images, illustrations and maps, *Indica* is full of fascinating, lesser-known facts. It shows us how every piece of rock and inch of soil is a virtual museum, and how, over billions of years, millions of spectacular creatures have reproduced, walked and lived over and under it.
