Powered by Porsche - the alternative race cars Roy P Smith,2021-10-13 Powered by Porsche – the Alternative Race Cars is a thorough and fascinating account of the racing cars that were powered by Porsche engines, but where the chassis and development of the car was carried out by others. The Porsche company in Zuffenhausen, Germany, can probably be said to be the most successful marque ever for victories in the motor racing scene. Likewise many firsts in innovation

have come with the name Porsche attached. Many major racing car producers such as Elva, Lotus, Lola, or March, as well as many smaller independents, at some time featured a Porsche engine in their chassis. Demand for the services and supply of cars, chassis, and parts from Porsche, often outstripped their ability to deliver during the late '70s to early '80s. With many new projects in the rapidly expanding Porsche organisation, race car projects had to be prioritised. This would lead to the creation of the replicas, as opposed to the factory-built works race cars, and even Porsche was building 'replica' 935s to supply to clients, continuing into the 962 era. In turn, a whole new, highly specialised, high quality industry grew up to meet the demand for Porsche-powered racers. In this fascinating book we meet the racing cars, the teams and the people who turned to Porsche to utilise the power from, perhaps, the greatest of all engine makers. This is thought to be first book on the subject, covering the entire history of Porsche engines, detailed engine specifications, non-Porsche chassis, and race details, as well as team histories with anecdotes from drivers. It is illustrated with many previously unpublished photos, and provides fascinating reading for all racing fans, as well as Porsche enthusiasts.

Long-Term Health Consequences of Exposure to Burn Pits in Iraq and Afghanistan

Institute of Medicine, Board on the Health of Select Populations, Committee on the Long-Term Health Consequences of Exposure to Burn Pits in Iraq and Afghanistan, 2011-10-31 Many veterans returning from the conflicts in Iraq and Afghanistan have health problems they believe are related to their exposure to the smoke from the burning of waste in open-air burn pits on military bases. Particular controversy surrounds the burn pit used to dispose of solid waste at Joint Base Balad in Iraq, which burned up to 200 tons of waste per day in 2007. The Department of Veterans Affairs asked the IOM to form a committee to determine the long-term health effects from exposure to these burn pits. Insufficient evidence prevented the IOM committee from developing firm conclusions. This report, therefore, recommends that, along with more efficient data-gathering methods, a study be conducted that would evaluate the health status of service members from their time of deployment over many years to determine their incidence of chronic diseases.

Junk Raft Marcus Eriksen, 2017-07-04 An exciting account of a scientist's expedition across the Pacific on a home-made "junk raft" in order to learn more about plastic marine pollution A scientist, activist, and inveterate adventurer, Eriksen and his co-navigator, Joel Paschal, construct a "junk raft" made of plastic trash and set themselves adrift from Los Angeles to Hawaii, with no motor or support vessel, confronting perilous cyclones, food shortages, and a fast decaying raft. As Eriksen recounts his struggles to keep afloat, he immerses readers in the deep history of the plastic pollution crisis and the

movement that has arisen to combat it. The proliferation of cheap plastic products during the twentieth century has left the world awash in trash. Meanwhile, the plastics industry, with its lobbying muscle, fights tooth and nail against any changes that would affect its lucrative status quo, instead defending poorly designed products and deflecting responsibility for the harm they cause. But, as Eriksen shows, the tide is turning in the battle to save the world's oceans. He recounts the successful efforts that he and many other activists are waging to fight corporate influence and demand that plastics producers be held accountable. *Junk Raft* provides concrete, actionable solutions and an empowering message: it's within our power to change the throw-away culture for the sake of our planet.
