Patrol and Rescue Boats on Puget Sound Chuck Fowler,2011 The history of impressive battleships, aircraft carriers, and submarines on Puget Sound has been well chronicled. However, the story of the smaller, fast patrol and rescue boats that have protected its vast inland waters is largely unknown. This book, through more than 200 rare images and engaging text, reveals the fascinating story. It covers Navy, Coast Guard, and Army Air Force craft in the sound, including the famed patrol torpedo boats of World War II. Featuring evocative photographs from the National Archives, as well as veterans' personal collections, this book highlights these military craft, their proud crews, and essential wartime and peacetime operations.

U.S. Navy Patrol Vessels Ken W. Sayers,2021-08-11 During the past century, U.S. Navy patrol vessels have operated everywhere larger warships have--as well as in places where the big boats could not operate. These bantam warriors have performed in a variety of roles, from antisubmarine warfare to convoy escort and offensive operations against enemy forces afloat and ashore. Patrol vessels battled German units in the Mediterranean, fought insurgents along rivers and canals in China and Vietnam and protected U.S. ships and facilities in the Persian Gulf. Covering more than 1000 of the Navy's small combatants, this comprehensive survey provides all-time rosters, histories, specifications and illustrations of patrol vessels from before World War I to the present. World War II PT boats and submarine chasers and Vietnam War swift boats are covered, along with less well known ships such as Eagle boats, patrol yachts, hydrofoil gunboats and control escorts. A detailed accounting of patrol vessel exports, transfers and shipbuilders is included.

US Patrol Torpedo Boats Gordon L. Rottman,2011-12-20 ALSO AVAILABLE AS AN E-BOOK. Motor torpedo boat development began in the early 1900s, and the vessels first saw service during World War I. However, it was not until the late 1930s that the US Navy commenced the development of the Patrol Torpedo or PT boat. The PT boat was designed for attacking larger warships with torpedoes using its 'stealth' ability, high-speed and small size to launch and survive these attacks – although they were employed in a wide variety of other missions, including rescuing General MacArthur and his entourage from the Philippines. This book examines the design and development of these unique craft, very few of which survive today, and goes on to examine their role and combat deployment in World War II.

River Patrol Boats Michael Green,1998-08 Briefly describes the development, weapons, and use of river patrol boats from the Revolutionary War days through the Vietnam War.

Vietnam War River Patrol Richard H. Kirshen,2017-02-10 As a 20-year-old gunboat captain and certified U.S. Navy diver in the Mekong Delta, the author was responsible for both the vessel and the lives of its crew. Ambushes and firefights became the norm, along with numerous dives—almost 300 in 18 months. Forty years after the war, he returned as a tourist. This journal records his contrasting impressions of the Delta—alternately disturbing and enlightening—as seen first from a river patrol boat, then from a luxury cruise ship.

Connectivity for Underway Coast Guard Patrol Boats Gregory C. Busch,1997-06-01 This thesis examines the US Coast Guard patrol boat's ability to effectively exchange operational data while underway. The patrol boat is currently unable to obtain tactical law enforcement information from the central Law Enforcement Information System 2 (LEIS 2) database while on patrol. LEIS 2 provides access to law enforcement information from Coast Guard, FBI, and state and local law enforcement agencies. Availability of this information will alert the boarding team of potentially dangerous situations and heighten their awareness during the boarding, allowing for a safer boarding. This thesis evaluates the current state of the patrol boat's communication system and recommends a solution to its current needs. Current and proposed satellite communication systems are evaluated using the Analytic Hierarchy Process (AHP). Pairwise comparisons are made of multiple decision criteria and the alternatives to obtain a recommended solution. The conclusion of this study is that the patrol boat's future requirements will far exceed the bandwidth available from current satellite systems. Broadband mobile communication systems such as Teledesic and Spaceway are currently under development and show promise. Until broadband service is available, Iridium should be adopted as the solution to the patrol boat's current needs.

U.s. Navy Special Forces Michael Burgan,2003-09 Introduces the Navy special forces known as SEALs, describing their mission, history, and the equipment they use.

Iron Butterfly Ralph Christopher,Chief Jim Davy,2010-06-08 The true story of an elite group of men who wrote a page in Naval history. They patrolled the waterways in thirty-one foot river patrol boats powered by Detroit diesel engines with water jet-propulsion. Armed with machineguns and grenade launchers, as well as sheer guts and determination, these sailors faced danger around every bend in the river. Working together, they became one of the finest weapons in Admiral Zumwalt’s arsenal for turning back the tide of communist infiltration into Saigon, taking control of the inland waterways. These are true accounts of their bravery, which they proved time and again by spearheading operations into enemy controlled territory. United together in brotherhood, they accomplished all their missions and won their part of the Vietnam War.
