The European Court and National Courts Anne Marie Slaughter,Alec Stone Sweet,Joseph Weiler,1998-03-01 The essays comprising this volume are the outcome of a major and unique project which looks in detail at the application of EC law by national courts and the interaction of the demands of EC law with the constraints imposed by national legal orders and,especially, national constitutional orders. The volume comprises seven country studies which are shaped around a common research protocol. These are supplemented by three cross-cutting studies which draw on the country studies as well as on broader contextual research work aimed at trying to understand the role of the European Court of Justice in the round. The results of this multi-national research are certain to provoke widespread interest among scholars of European law, international law and European politics, for they offer the first systematic and rigorous attempt to assess the impact of the ECJ among the leading member states of the European Union.

Canada in the Great Power Game: 1914-2014 Gwynne Dyer, 2015-08-04 *Canada in the Great Power Game 1914-2014* is a serious contemplation of what it means to engage in major world conflicts, and the price we pay when we do. The First World War was Canada's baptism of fire, or at least the only one that people now remember. (Montrealers in 1776 or Torontonians in 1814 would have taken a different view.) From 1914 to 1918, after a century of peace, Canadians were plunged back into the old world of great power rivalries and great wars. So was everybody else, but Canadians were volunteers. We didn't have to fight, but we chose to, out of loyalty to ideas and institutions that today many of us no longer believe in. And we have been doing the same thing ever since, although we haven't quite given up on the latest set of ideas and institutions yet. In *Canada in the Great Power Game*, Gwynne Dyer moves back and forth between the seminal event, the First World War, and all the later conflicts that Canada chose to fight in. He draws parallels between these conflicts, with the same idealism among the young soldiers, and the same deeply conflicted emotions among the survivors, surfacing time and again in every war right down to Afghanistan. And in each case, the same arguments pro and con arise—mostly from people who are a long, safe way from the killing grounds—for every one of those wars of choice. Echoing throughout the book are the voices of the people who lived through the wars: the veterans, the politicians, the historians, the eyewitnesses. And Dyer takes a number of so-called excursions from his historical account, in which he revisits the events and puts them in context, pausing to ask such questions as *What if we hadn't fought Hitler?* and *Is war written in our genes?* This entertaining and provocative book casts an unsparing eye over what happens when Canada and the great powers get in the war business, illuminating much about how we see ourselves on the world stage.

Traces of Violence Robert R. Desjarlais, Khalil Habrih, 2021-11-30 In this highly original work, Robert Desjarlais and Khalil Habrih present a dialogic account of the lingering effects of the terroristic attacks that occurred in Paris in November 2015. Situating the events within broader histories of state violence in metropolitan France and its colonial geographies, the authors interweave narrative accounts and photographs to explore a range of related phenomena: governmental and journalistic discourses on terrorism, the political work of archives, police and military apparatuses of control and anti-terror deterrence, the histories of wounds, and the haunting reverberations of violence in a plurality of lives and deaths. *Traces of Violence* is a moving

work that aids our understanding of the afterlife of violence and offers an innovative example of collaborative writing across anthropology and sociology.
