Evidentiality Alexandra Y. Aikhenvald,2004-11-05 In some languages every statement must contain a specification of the type of evidence on which it is based: for example, whether the speaker saw it, or heard it, or inferred it from indirect evidence, or learnt it from someone else. This grammatical reference to information source is called 'evidentiality', and is one of the least described grammatical categories. Evidentiality systems differ in how complex they are: some distinguish just two terms (eyewitness and noneyewitness, or reported and everything else), while others have six or even more terms. Evidentiality is a category in its own right, and not a subcategory of epistemic or some other modality, nor of tense-aspect. Every language has some way of referring to the source of information, but not every language has grammatical evidentiality. In English expressions such as I guess, they say, I hear that, the alleged are not obligatory and do not constitute a grammatical system. Similar expressions in other languages may provide historical sources for evidentials. True evidentials, by contrast, form a grammatical system. In the North Arawak language Tariana an expression such as the dog bit the man must be augmented by a grammatical suffix indicating whether the event was seen, or heard, or assumed, or reported. This book provides the first exhaustive cross-linguistic typological study of how languages deal with the marking of information source. Examples are drawn from over 500 languages from all over the world, several of them based on the author's original fieldwork. Professor Aikhenvald also considers the role evidentiality plays in human cognition, and the ways in which evidentiality influences human perception of the world.. This is an important book on an intriguing subject. It will interest anthropologists, cognitive psychologists and philosophers, as well as linguists.

Evidentiality A. lu Aikhenvald,Aleksandra IĭUĭrĭevna Aĭkhenvalĭd,Alexandra Y. Aikhenvald,Professor of Linguistics and Associate Director of the Research Centre for Linguistic Typology Alexandra Y Aikhenvald,2004-11-04 In some languages every statement must contain a specification of the type of evidence on which it is based: for example, whether the speaker saw it, or heard it, or inferred it from indirect evidence, or learnt it from someone else. This grammatical reference to information source is called 'evidentiality', and is one of the least described grammatical categories. Evidentiality systems differ in how complex they are: some distinguish just two terms (eyewitness and noneyewitness, or reported and everything else), while others have six or even more terms. Evidentiality is a category in its own right, and not a subcategory of epistemic or some other modality, nor of tense-aspect. Innovation in Healthy and Functional Foods Dilip Ghosh,Shantanu Das,Debasis Bagchi,R.B. Smarta,2016-04-19 The focus of food science and technology has shifted from previous goals of improving food safety and enhancing food taste toward providing healthy and functional foods. Today's consumers desire foods that go beyond basic nutrition-foods capable of promoting better health, or even playing a disease-prevention role. To meet this need for innovation,

Good Neighbor Diplomacy Irwin Gellman,2019-12-01 Originally published in 1979. American diplomacy during Franklin D. Roosevelt's presidency has received much attention, with one notable exception—the United States' relations with Latin America. Irwin Gellman's book corrects this past neglect through a perceptive analysis of FDR's Good Neighbor efforts in Latin America. Based on a fresh examination of State Department records and extensive manuscript sources (including an unprecedented use of Nelson Rockefeller's oral history archives), the book points out the complexities of Good Neighbor diplomacy and its intimate relationship to Roosevelt's global strategies. As background to his discussions of FDR's policies, Gellman looks first at how Latin American affairs were handled during the administrations of Harding, Coolidge, and Hoover, the three Republicans who preceded Roosevelt in office. Good Neighbor diplomacy, Gellman shows, was not a carryover from these administrations; it bore the distinctive mark of FDR's own making. He then describes how Roosevelt's policy of nonintervention worked, particularly how military force was superseded by more subtle diplomatic maneuverings. Turning to a discussion of economic relations with Latin America, Gellman focuses on how the United States' own situation—cut off from international trade by the Depression—encouraged regional expansion. And, finally, he looks at how Roosevelt parlayed the threat of war in Europe and the specter of Nazi penetration in the Americas to further solidify a hemispheric stand. Gellman's account vividly demonstrates that Good Neighbor diplomacy was as much the product of personality as it was of policy. In particular, it emerged out of the rivalries and alliances among three men: Roosevelt; his Secretary of State, Cordell Hull; and Assistant Secretary of State, Sumner Welles. Gellman (the first to have access to FBI files on Welles) characterizes FDR as an astute politician who saw an opportunity to use pan-Americanism to restore America to world prominence—yet could not handle the personality conflicts among those in his own ranks. Gellman shows how tenuous a government policy can be when so much of it depends on personal control and influence.
