Practical Approach to Mammalian Cell and Organ Culture Tapan Kumar Mukherjee,Parth Malik,Srirupa Mukherjee,2022-11-07 This Major Reference Work offers a detailed overview of culturing primary, secondary cell lines, tissues, and organs. It first introduces various types of mammalian cell cultures, infrastructure requirements for a mammalian cell-culture laboratory. The subsequent chapters present the detailed protocols for the isolation of mammalian hematologic organs and cells. It also discusses various cell-based assays for monitoring cell viability, cell proliferation, cytotoxicity, cell senescence, and cell death assays. In addition, the book addresses the various problems encountered while culturing animal cells, their possible causes, and suggested solutions, presenting detailed protocols for isolation and primary culturing of various mammalian cells and hematoimmunologic organs in two dimensions. Lastly, it reviews the various applications of animal-cell culture, stem-cell culture, and tissue and organ culture. As such, this reference book is highly relevant for students and professionals new to cell-culture work as well as to those wishing to expand their skills from cell-line cultures to primary cultures and from conventional 2D cultures to 3D cultures.

Mermaid Construction Tasaku Tsunoda,2020-08-10 This volume provides detailed studies of the crosslinguistically unusual mermaid construction in seventeen languages of Asia, including Modern Standard Japanese, and one language of Africa. This construction appears to be absent in languages of Europe, Oceania and the Americas. The name - mermaid construction - alludes to its paradoxical make-up, where the structure closely resembling a verb-predicate clause ends with what may look like a noun-predicate clause. Superficially it looks biclausal; however, syntactically it is monoclausal. It has a compound predicate which contains an independent noun, a clitic or an affix derived from a noun, or a nominalizer. Its compound predicate has a modal, evidential, aspectual, temporal, stylistic or discourse-related meaning. The paradox is resolved from a diachronic perspective insofar as a biclausal structure is reanalyzed as a monoclausal one. This volume shows how a noun may be reanalyzed to become a constituent of a predicate. It constitutes an important contribution to research on grammaticalization and in particular, the grammaticalization of nouns and more generally, to the typology of syntactic reanalysis.

The Squabbling Universe Terrel Miedaner,2021-09-13 This book offers a unique interpretation of the beginnings of the universe and human consciousness. It bypasses currently popular beliefs such as cosmology's notion of a mysterious singularity that suddenly appeared out of nowhere, then exploded into a magnificently structured universe instead of a rubble pile like the customary result of explosions. The book proposes that conscious intelligence was involved in part of the creation process, after explaining the origin of consciousness and the development of intelligence. An almighty and omniscient god is not part of the process.
