The SAGE Handbook of Personality Theory and Assessment Gregory J Boyle, Gerald Matthews, Donald H Saklofske, 2008-06-24 This Handbook of Personality Theory and Assessment 2-Volume Set constitutes an essential resource for shaping the future of the scientific foundation of personality research, measurement, and practice. It reviews the major contemporary personality models (Volume 1) and associated psychometric measurement instruments (Volume 2) that underpin the scientific study of this important area of psychology. With contributions from internationally renowned academics, this work will be an important reference work for a host of researchers and practitioners in the fields of individual differences and personality assessment, clinical psychology, educational psychology, work and organizational psychology, health psychology and other applied fields as well. Volume 1: Personality Theories and Models. Deals with the major theoretical models underlying personality instruments and covers the following broad topics, listed by section heading: Explanatory Models For Personality Comprehensive Trait Models Key Traits: Psychobiology Key Traits: Self-Regulation And Stress New Trait And Dynamic Trait Constructs Applications

The HUMANISTIC APPROACH in Psychology & Psychotherapy, Sociology & Social Work, Pedagogy & Education, Management and Art: Personal Development and

Community Development SECOND EDITION ,2023-11-23 The purpose of this book – THE HUMANISTIC APPROACH IN PSYCHOLOGY & PSYCHOTHERAPY, SOCIOLOGY & SOCIAL WORK, PEDAGOGY & EDUCATION, MANAGEMENT AND ART: PERSONAL DEVELOPMENT AND COMMUNITY DEVELOPMENT (Second Edition) – is to achieve an investigation as exhaustive and comprehensive as possible on the presence of the humanistic approach, with an emphasis on the dual-humanistic valences, in a wide range of social and human fields, thus bringing before the reader – as an alternative to the modular, strictly monodisciplinary approaches – a multidisciplinary and complex approach, thus putting almost all the most important social & human disciplines and practices under a single humanistic/ dual-humanistic "umbrella", and presented in a single book. The Chapter 1 highlights the diversity of approaches in the social and human domains, focusing on three great approaches: mystical-spiritual and religious, strictly scientific, and humanistic. In Chapter 2, the sources and models of the humanistic orientation are explored, identifying in this sense, with priority, Humanism and philosophical influences such as criticism, ontology, humanistic philosophy, and some oriental-spiritual practices. This chapter highlights also the contribution of phenomenology, existentialism, personalism, gestaltism, neo-Marxism, the Frankfurt School, secular humanism, the human rights movement, postmodernism, feminism, and complex and emergent systems theories. Chapter 3 focuses on the humanistic/ dual-humanistic approach in psychology and psychotherapy.. The basic principles of the

humanistic approach to the human psyche were highlighted, as well as the dual-humanistic approach to personality and behavior. Chapter 4 discusses the humanistic/ dual-humanistic orientation in sociology and social work, highlighting the characteristics of social humanism and their different postures in the field of sociology and social work. Chapter 5 brings to the reader's attention the humanistic approach to pedagogy and education, emphasizing the specificity of child/student center education and the characteristics of the dual-humanistic approach in pedagogy/ education. Chapter 6 addresses the issue of humanistic management, emphasizing how this approach generated a significant change in work organizations, focusing on people, employee development and their well-being. Chapter 7 discusses the humanist approach in art, theater and film, highlighting the characteristics of humanistic aesthetics and humanistic teatrology/ filmology. Chapter 8 brings other disciplines into the discourse, such as medicine, politics, religion, technology & science, ecology and economy, highlighting how the humanistic approach influences these fields and brings a dual perspective between person-centeredness and human/ social solidarity. Chapter 9 presents some of the characteristics of the humanistic/dual-humanistic approach to personal development, focusing on the formation of a strong, humane and complete personality. Chapter 10 discusses the humanistic approach, especially through its dual-humanist valence, in community development, emphasizing how it, as philosophy, culture and politics, can contribute to

the formation of a strong and humane/ solidary community, with the inclusion of the goals and values of personal development/fulfillment and the happiness of their members. Regarding the usefulness and addressability of this edition, of this book, the design, content and bibliography are made in such a way as to be useful both to the academic community, to students and to teachers, and to the professional community, to psychotherapists, educators, managers, social workers, artists, medical practitioners, politicians, etc. The work being unique in its way because it brings together under the "umbrella" of a humanistic approach the most important social & human sciences and practices, it is, of course, also addressed to readers interested in such a perspective.

Shining toward Spirit, The book of Divine Love and beginnings Volume II
Zara Borthwick, Nicholas Arnold,

Treatment of Personality Disorders Jan J.L. Derksen, Cesare Maffei, Herman Groen, 1999-12-31 This monograph arose from presentations given at both the First and Second European Congresses on Disorders of Personality. It was realised that there was a need to clarify if, and how, diagnostic underpinnings and assumptions are coherent with therapeutic strategies in personality disorders. This book aims to bring the more theoretical domain of diagnosis closer to the more clinical and pragmatic domain of therapy. Additionally, this book represents a stricter collaboration between researchers and clinicians from different European countries and also from

America.

HUMANISTIC SOCIAL WORK – The THIRD WAY / FORCE in Theory, Practice and Politics. Core Qualities, Skills and Conducts of the Practitioner ,2023-11-10

This book is a new appearance of the author – Petru Stefaroi – within "The HUMANISTIC SOCIAL WORK Project". In particular, in this work the author affirms and supports the thesis according to which – as in psychology and psychotherapy the idea, thesis and formula Humanistic Psychology/Psychotherapy as the Third Way or Force is regularly promoted and used – it is the case and the time as in the field of social work to operate with the formula Humanistic Social Work – The Third Way or Force in Social Work. The third way in practice, as a method, and the third force in theory, as a doctrine. If in psychology and psychotherapy the third way/force was established by reference to psychoanalysis and behaviorism, in social work the third way is established by reference to Traditional social work and Critical social work. This third way in social work is imposed, in the author's opinion, by prioritizing the concept of personality, bringing this doctrine, method and practice of social work closer to psychology and psychotherapy, to humanistic psychology and psychotherapy. But, the author specifies in the paper that humanistic psychology and humanistic psychotherapy, on the one hand, and humanistic social work as theory and practice, on the other hand, are distinct scientific and practical fields, not only by the object of intervention but also by methodology and specifics

of practice. The aspect is well highlighted in the way it is structured and formulated his "The HUMANISTIC SOCIAL WORK Project", established as an initiative with the assumed aim to enhance the effective presence of the humanistic and personalistic values, theories and practices in social work, which usually are stated as fundamental and essential in different programs, strategies and policies but less present, in fact, in the specialized literature, in the faculties' curricula, or in the practice of the professionals and services. To this end, the project is designed as a philosophical-theoretical, axiological and methodological framework, a heuristic laboratory, a philosophical, scientific and professional forum where it can be set what might be called the theory, axiology and methodology of humanistic social work. The project's concept starts from the idea that humanistic social work is not, however, a distinctive form of social work/ welfare but rather an ontology/ epistemology, that generates a reaffirmation/ restatement of the fundamental/ constitutional humanistic values of social work, incorporating, in the same time, in a (relative) new coherent and unitary theory, all what penetrated in social work in the last decades from humanistic psychology and psychotherapy, microsociology and humanistic sociology, human rights philosophy/ movement, and, especially, what was established as humanistic method in the contemporary social work practice and literature. The core aspect of the humanistic social work paradigm, theory and practice is determined by the way/ mode (humanistic) are represented the

client and professional, considering the humanequalities/ resources of the client and professional the critical epistemological and methodological value of the this type of social work. One can say that the specific theory of humanistic social work is a conglomerate of theories, paradigms, orientations, but which have some crucial ideas as vectors: the person/client as personality, as human being, with sentiments, soul, desires, sufferings, needs of love, needs of happiness and accomplishments; emphasis on personality and compathetical micro-community as basic resources of practice; positive, optimistic and appreciative expectation in practice; person-centered and microcommunity-centered approach in evaluation and intervention; concentration on the future and not on the past; the human rights, social justice; a humanistic perspective on the practitioner and his conducts in practice.

Advanced Bioactive Compounds Countering the Effects of Radiological, Chemical and Biological Agents Grant N. Pierce, Volodymyr I. Mizin, Alexander Omelchenko, 2014-07-08 The probability for exposure to damaging radiation, toxic chemicals in the environment and adverse biological agents has increased exponentially today. The more frequent and faster travel that we experience today also escalates the risk of contraction and transmission of potentially deadly infections. This has created a very real and escalating risk for injuries and deaths. This is accentuated in the military and medical staff that is more frequently exposed to radiological, chemical, and biological agents in their normal working environment. Understanding the mechanisms whereby these toxic agents inflict damage to our bodies is essential to prepare us for these challenges. Much of the damage is inflicted through the generation of free radicals and non-radical oxidants which then act through oxidative mechanisms to injury the body. This volume will discuss the damage caused by these radiological, chemical, and biological environmental stressors, the mechanisms through which the damage can occur and the novel strategies that can be used to reduce the injury inflicted by these toxic compounds. Using basic and clinical research approaches, the contents of this book discuss new ideas for the development of bioactive products and environmental approaches to lessen or negate the biological damage inflicted by these noxious compounds.

Leadership in Times of Change William G. Christ, 1998-10-01 This book

addresses many of the issues facing new and seasoned communication and media administrators. Though there are business-oriented management and leadership books, there is no handbook--to the editor's knowledge--that emphasizes academic administration. This book fills an important gap in the literature by providing--in one place--interesting, important, and useful information that will help administrators by anticipating problems and suggesting strategies for the variety of challenges they face. This scholarly, anecdotal, useful, and very readable volume is conceived as an action handbook that contains philosophical, theoretical, and practical information. It is divided into three sections: background material, programmatic challenges facing administrators, and specific challenges facing administrators. It contains information that both the seasoned administrator and those faculty who are thinking about moving into administration will find useful. Although aimed at the communication and media disciplines, administrators in other fields will also find it valuable. In addition, deans and vice presidents outside the discipline who are responsible for communication and media programs will view the book a must read.

Kierkegaard and the Rise of Modern Psychology Sven Hroar Klempe, 2017-07-05

This book investigates the Danish philosopher Soren Kierkegaard's (1813-1855)

contributions to our understanding of psychology. In Kierkegaard's historical context, psychology was challenged from both scientific and philosophical perspectives. Kierkegaard considered psychology a core discipline central to his understanding of metaphysics as well as theology. The first part examines Kierkegaard and experimental psychology, focusing on Kierkegaard's work explicitly referring to psychology. The second part considers psychology in terms of the German Enlightenment, including Kant's rejection of psychology as a science. The third part discusses how to understand Kierkegaard's psychology today, calling attention to his continuing impact on modern psychology and modern science. Kierkegaard's conception of psychology remains relevant for any discussion of the role of today's psychology. In tracing psychology's evolution after Kant and Kierkegaard, the author finds the discipline has followed two main paths. The dominant path follows Kant's ideals about science, while the other, much narrower trail, has its origin in Kierkegaard.

German Constitutional Law Christian Bumke, Andreas Voßkuhle, 2019-02-06 This revised and fully up-to-date English translation of the 7th edition of the Casebook Verfassungsrecht includes a new outline of the German constitution, the BVerfG Court, and its jurisprudence. It condenses more than six decades of constitutional jurisprudence in order to familiarize readers with the style, technique, and language of the Court. As well as an analysis of the general principles of German constitutional law, the book covers the salient articles of the German Constitution and offers relevant extracts of the Court's most important decisions on the provisions of the Basic Law. It provides notes and discussions of landmark cases to illustrate their legal and historical context and give the reader a clear understanding of the principles governing German constitutional law. The book covers the fundamental rights catalogue of the Basic Law and offers a comprehensive account of its intellectual moorings. It includes landmark jurisprudence on the equal treatment of same-sex couples, life imprisonment, the legal structure of property, the right to assembly, and the right to informational self-presentation. The book also covers the provisions and respective case law governing the state structure of Germany, for instance the recent

decisions on the prohibition of the far-right German nationalist party, and the Court's jurisprudence on European integration, including the most recent decisions on the OMT-program of the European Central Bank.

Cross-cultural Counseling Aart Van Beek, Using a wide variety of concrete cases, van Beek outlines sensitivities, awarenesses, and skills fundamental to cross-cultural counseling issues such as identity, sense of belonging, worldview, identification, family counseling, and use of biblical resources.

The Capitalist Personality Christopher Swader, 2013 This book reveals the ambivalent repercussions of capitalist culture on interpersonal relationships in the post-communist world. Most observers tend to blame modern corruption, narcissism, and egoism in these new market societies on their communist pasts. This comparative analysis shows how the capitalist present is also squarely responsible.
