Applied Mineralogy in the Mining Industry W. Petruk, 2000-11-29 Techniques of performing applied mineralogy investigations, and applications and capabilities of recently developed instruments for measuring mineral properties are explored in this book intended for practicing applied mineralogists, students in mineralogy and metallurgy, and mineral processing engineers. The benefits of applied mineralogy are presented by using in-depth applied mineralogy studies on base metal ores, gold ores, porphyry copper ores, iron ores and industrial minerals as examples. The chapter on base metal ores includes a discussion on the effects of liberation, particle sizes and surfaces coatings of Pb, Cu, Fe, Ca and SO_4^{2-} on the recoveries of sphalerite, galena and chalcopyrite. The chapter on gold discusses various methods of determining the quantities of gold in different minerals, including 'invisible' gold in pyrite and arsenopyrite, so that a balance of the distribution of gold among the minerals can be calculated. This book also discusses the roles of pyrite, oxygen, moisture and bacterial (thiobacillus ferrooxidans) on reactions that produce acidic drainage from tailings piles, and summarizes currently used and proposed methods of remediation of acidic drainage.

Petruk Dadi Ratu Dr. Suwardi Endraswara, M. Hum., 2014-01-01 Membaca Petruk, sama halnya sedang menghayati dunia. Dia adalah pribadi komplet. Sesekali, Petruk berlaku sebagai akademisi. Orang-orang di sekitarnya menyebut pakar. Pakar ilmu-ilmu mistik kejawan. Ilmu yang sampai detik ini banyak dibenci orang, biar pun secara substansial banyak dilakukan setiap orang. Di balik bayang-bayang Petruk, ternyata memang sosok pribadi yang njawani. Maka ketika ada teman dekatnya, yang semi Jawa-Indonesia, sering menggunakan kata yang tidak begitu tepat, Petruk harus mengkritisnya. Kritik yang membangun tentunya. Buku ini menyelami konsep demi konsep, ada apa di balik kepemimpinan Petruk. Mungkinkah diri kita sedang metruk? Jangan-jangan, roh kita juga sedang kerasukan Petruk. Artinya, suatu saat ingin kekuasaan, ingin kenikmatan, dan inginingin yang lain. Mungkin pula diri kita sedang dilanda Petrukisasi.

Tall Tree, Nest of the Wind: The Javanese Shadow-play Dewa Ruci Performed by Ki Anom Soeroto Bernard Arps, 2016-04-18 Javanese shadow puppetry is a sophisticated dramatic form, often felt to be at the heart of Javanese culture, drawing on classic texts but with important contemporary resonance in fields like religion and politics. How to make sense of the shadow-play as a form of world-making? In Tall Tree, Nest of the Wind, Bernard Arps explores this question by considering an all-night performance of Dewa Ruci, a key play in the repertoire. Thrilling and profound, Dewa Ruci describes the mighty Bratasena's quest for the ultimate mystical insight. The book presents Dewa Ruci as rendered by the distinguished master puppeteer Ki Anom Soeroto in Amsterdam in 1987. The book's unusual design presents the performance texts together with descriptions of the sounds and images that would remain obscure in conventional formats of presentation. Copious annotations probe beneath the surface and provide an understanding of the performance's cultural complexity. These annotations explain the meanings of puppet action, music, and shifts in language; how the puppeteer wove together into the drama the circumstances of the performance in Amsterdam, Islamic and other religious ideas, and references to contemporary Indonesian political ideology. Also revealed is the performance's historical multilayering and the picture it paints of the Javanese past. Tall Tree, Nest of the Wind not only presents an unrivalled insight into the artistic depth of wayang kulit, it exemplifies a new field of study, the philology of performance.

Innovations in Flotation Technology P. Mavros, Kostas A. Matis, 2013-03-14 The present book is the outcome of an Advanced Study Institute meeting, which was held in Kallithea, Chalkidiki, in Northern Greece, from 12-25 May 1991 and attended by 69 delegates from 18 countries. The Institute brought together scientists, engineers and technologists currently involved in basic and applied research on the different aspects of flotation. The Institute covered subjects in four major areas of flotation: a) fundamentals; b) chemical technology aspects; c) mineral processing; and d) water and wastewater treatment. Apart from the papers reproduced in this volume, several short oral communications were also presented. Participants also

had the opportunity to visit the Hellenic Chemical Products & Fertilizers Co. Ltd. mixed sulphides plant, in Chalkidiki. Conference participants, whose interest and research projects are in this broad field of science and engineering, provided a well-informed discussion of the problems encountered, as well as possible directions of future technological developments. It is hoped that this book is not only a good record of the presentations made (formal and informal), analyzing the state-of-the-art in flotation, but will also be helpful for students, scientists and technologists working in the fields of separation processes and in particular mineral processing and wastewater engineering. All the invited speakers and the participants made this summer school possible, worthwhile and enjoyable. The sponsorship by the NATO Scientific Affairs Division is gratefully acknowledged. The Editors would like to thank the members of the Organizing Committee, Dr. B.A.

The Modern Plague of Obesity Kenneth C Petruk, Overweight and obesity have steadily engulfed the entire globe, neither discriminating by age, race, sex, socio-economic status, or country. The rapidly expanding waist lines of the world's populations have sparked a lethal fuse of spiraling illness, mass chronic disease, and shortened lifespan, an epidemic wildfire that is consuming every generation with increasing speed—even the unborn. And while being overweight is still popularly viewed as an issue of personal attractiveness and failed willpower, a more sinister truth is now, finally, being brought to light: that the misunderstanding and mismanagement of this growing health problem by the healthcare, scientific, regulatory, agricultural, education, marketing, and food and beverage industries have allowed “globesity” to become one of the most serious pandemics of the twenty-first century. *Modern Plague of Obesity* is one of the most all-encompassing, rigorously researched, evidence-based, and forward-thinking reference resources available to the public on this major health issue. Dr. Kenneth C. Petruk casts a glaring floodlight on the causes and casualties of obesity and related diseases, demystifying the complex interplay of chemical, biological, neurological, behavioural, societal, governmental, and environmental processes that has escalated this problem into a deadly health threat of plague-like proportions. More importantly, Dr. Petruk proposes ground-breaking suggestions and futuristic multidisciplinary solutions that finally break away from the reductionist weight-loss treatments that have failed us so far, offering us an urgent way out of this deadly maelstrom that is silently sapping the future of humankind.

Sixteen Indonesian Folklores Bambang Udayono,2022-07-01 Majapahit was a prosperous kingdom in ancient Java. One day a small kingdom of Blambangan rebelled. The troops of Blambangan was so strong that the capital of Majapahit was in danger. The king of Blambangan gave an ultimatum to surrender to the queen of Majapahit. The hope of Majapahit was small. But the queen of Majapahit received a message from God to rely on Damar wulan, a village boy. She ordered Damar Wulan to attack the king of Blambangan in his palace. Production and Processing of Fine Particles A. J. Plumpton,2013-10-22 This volume contains the proceedings of an international symposium organised by the Metallurgical Society of the Canadian Institute of Mining and Metallurgy. The aims of the symposium were to discuss fundamental and practical aspects of the technology for the production of fine inorganic particles for the metals, industrial minerals and advanced ceramics sectors, to highlight particle characterization methods and developments, and to review major advances in the processing and extractive metallurgy of finely-sized minerals. 96 conference papers by authors from 19 countries addressed such topics as particle morphology and size analysis, physical and chemical methods for producing fine particles, processing of minerals using gravity, magnetic and electrostatic separation, flotation and flocculation, phase separation involving fine particles, and the hydrometallurgy and pyroprocessing of fine particles. This book will be of interest to mineral processing scientists and engineers, ceramicists, extractive metallurgists and chemical engineers, who are faced with the increasing significance of inorganic fine particles either as valuable products or as materials to be treated in mineral processing systems.

Illustrating Asia John A. Lent,2001-11-30 Illustrations used for story-telling and mirth-making have enlivened Asian walls, scrolls, books, public and private places, and artifacts for millennia. Often playful and humorous, Asian pictorial stories lent conspicuous elements to contemporary comic

art, particularly with their use of narrative nuance, humor, satire, and dialogue. *Illustrating Asia* is a fascinating book on a subject that is of wide and topical interest. All of the articles consider cartoon and/or comic art in the historical and social setting of seven South, Southeast, and East Asian countries: India, Taiwan, Malaysia, Indonesia, Sri Lanka, China, and Japan. The contributors treat comic and narrative art—including comic books, comic strips, picture books, and humor and fan magazines—in both historical and socio-cultural perspectives, as well as portrayals of ancient Chinese philosophy, gender, and the enemy in cartoons and comics. Contributors: Laine Berman, John A. Lent, Fusami Ogi, Rei Okamoto, Ronald Provencher, Aruna Rao, Kuiyi Shen, Shimizu Isao, Shu-chu Wei, Yingjin Zhang.

Sustainable Production: Novel Trends in Energy, Environment and Material Systems Grzegorz M. Królczyk, Małgorzata Wzorek, Anna Król, Orest Kochan, Jun Su, Janusz Kacprzyk, 2019-01-24 This book highlights recent research on sustainable production. In today's manufacturing industry, cleaner production has become a central goal. "Sustainable production" describes activities that pose no threat to future generations and are not pursued at their expense. In addition, sustainable production is a concept that can improve environmental performance and focuses on technical aspects that can be used to improve efficiency and productivity. Sustainable production is not limited to the manufacturing sector, but affects all production sectors including energy, environment, and material systems – all of which face significant challenges in connection with sustainability, e.g. efforts to reduce production's impact on the environment and to manage health and safety impacts. Key means of reducing environmental pollution from manufacturing involve reducing the main resources used in production (metals used in the machining processes, fluids/oils in production, water, and energy).

The selection of essays provides a broad range of thought-provoking case studies from Latin America, Africa, Europe, and Asia. This provocative collection of readings from around the world will spur debate and discussion of this timely and important topic in the classroom and beyond.
