Primary Education Thinking Skills (P.E.T.S.TM) Book 1 - Updated Edition ,2012 PETSTM (Primary Education Thinking Skills) is a systematized enrichment and diagnostic thinking skills program. Lessons are presented in convergent analysis, divergent synthesis, visual/spatial thinking, and evaluation, suitable for grades K-3. The program aligns to the higher levels of Bloom's Taxonomy. PETSTM 1, the red book, introduces the six thinking specialists of Crystal Pond Woods: Dudley the Detective, the convergent/deductive thinker, Isabel the Inventor, the divergent/inventive thinker, Sybil the Scientist, the convergent/analytical thinker, Yolanda the Yarnspinner, the divergent/creative thinker, Max the Magician, the visual/spatial thinker, Jordan the Judge, the evaluative thinker. Included in the 24 lessons are encounters with the animal characters who are engaged in problem-solving scenarios calling for their types of thinking -- four lessons involving each character (two whole class lessons to help identify talented learners with accompanying reproducible activities, and two small group lessons for identified students and accompanying reproducible activities). PETSTM helps build behavioral portfolios for talented learners that support a differentiated approach to their education, integrates flexibly into any existing primary curriculum, and offers opportunities for learners with different strengths to shine--Amazon.com.

Caring for Family Pets Radford G. Davis D.V.M., M.P.H.,2011-10-20 This book helps pet owners fully understand what it means to care for a companion animal, from choosing a pet to veterinary visits and beyond. Pets are extremely popular in the United States. According to a recent survey, one third of American homes contain one or more cats; almost 40 percent of U.S. households include at least one dog. Pets serve as cherished companions for everyone from young children to senior citizens. However, there are responsibilities and risks involved with pet ownership, and the proper care of these animals that many consider family involves much more than keeping a water dish and food bowl full. This book is written by top animal health experts to explain our roles, rights, and health care challenges when bringing animals into our homes. Topics such as health, first aid, companion animal diseases, common surgeries, and alternative care for pets are all addressed. Information is also provided about pet birds, large pets such as horses, exotics such as snakes and reptiles, and pocket pets such as hamsters, gerbils, guinea pigs, and rats.

Pets Erica Fudge,2014-12-05 'When I play with my cat, who knows if I am not a pastime to her more than she is to me?' - Michel de Montaigne. Why do we live with pets? Is there something more to our relationship with them than simply companionship? What is it we look for in our pets and what does this say about us as human beings? In this fascinating book, Erica Fudge explores the nature of this most complex of relationships and the difficulties of knowing what it is that one is living with when one chooses to share a home with an animal. Fudge argues that our capacity for compassion and ability to live alongside others is evident in our relationships with our pets, those paradoxical creatures who give us a sense of comfort and security while simultaneously troubling the categories human and animal. For what is a pet if it isn't a fully-fledged member of the human family? This book proposes that by crossing over these boundaries pets help construct who it is we think we are. Drawing on the works of modern writers, such as J. M. Coetzee, Elizabeth Marshall Thomas and Jacques Derrida, Fudge shows how pets have been used to think with and to undermine our easy conceptions of human, animal and home. Indeed, *Pets* shows our obsession with domestic animals that reveals many of the paradoxes, contra - dictions and ambiguities of life. Living with pets provides thought-provoking perspectives on our notions of possession and mastery, mutuality and cohabitation, love and dominance. We might think of pets as simply happy, loved additions to human homes but as this captivating book reveals perhaps it is the pets that make the home and without pets perhaps we might not be the humans we think we are. For anyone who has ever wondered, like Montaigne, what their cat is thinking, it will be illuminating reading.

PETS Scott Tilley,2021-12-10 It doesn't matter if you are a cat person or a dog person - if you like pets, then you know how important they are in our lives. Not every cat is Garfield, scarfing down lasagna whenever possible. Not every dog is Lassie, able to rescue children who have fallen down a well. But every pet is special: purebreds, mutts and mixes, and everything in-between. Who can say no to a friendly smile?PETS is a collection of tales (tails?) about our furry friends. Service dogs. Rescues. Family companions. Childhood friends. Strays. Saviors. These are some of the roles pets play in our lives. PETS captures these stories for everyone to enjoy.

Wild Pets Amber Medland,2021-06-29 'Smart and funny... Wild Pets is an instant set text of the emerging canon of millennial fiction.' Guardian 'A wickedly funny and emotionally complex novel.' Jenny Offill, author of Weather and Dept. of Speculation 'An impressive, cumulatively powerful first outing.' Daily Mail 'A ripe and excellent debut... funny and smart and human and true.' Andrew O'Hagan, author of Mayflies Wild Pets follows Iris, Ezra and Nance in the years after university. They fall in and out of bed with each other, reread The Art of War, grieve the closing of Fabric and write book proposals on the history of salt, while submerging their nights in drink and drugs. Confronting adulthood with high wit and low behaviour against contemporary political and social turmoil, these young men and women seem to have everything going for them. So why are they still swimming desperately against the tide? A bold, honest novel, Wild Pets is about the fragility of mental health, power imbalances in friendship and sex, and creative ambition fused with destruction - and the lingering power of first loves.

Pets in America Katherine C. Grier, 2010-11-15 Entertaining and informative, *Pets in America* is a portrait of Americans' relationships with the cats, dogs, birds, fishes, rodents, and other animals we call our own. More than 60 percent of U.S. households have pets, and America grows more pet-friendly every day. But as Katherine C. Grier demonstrates, the ways we talk about and treat our pets--as companions, as children, and as objects of beauty, status, or pleasure--have their origins long ago. Grier begins with a natural history of animals as pets, then discusses the changing role of pets in family life, new standards of animal welfare, the problems presented by borderline cases such as livestock pets, and the marketing of both animals and pet products. She focuses particularly on the period between 1840 and 1940, when the emotional, behavioral, and commercial characteristics of contemporary pet keeping were established. The story is filled with the warmth and humor of anecdotes from period diaries, letters, catalogs, and newspapers. Filled with illustrations reflecting the whimsy, the devotion, and the commerce that have shaped centuries of American pet keeping, *Pets in America* ultimately shows how the history of pets has evolved alongside changing ideas about human nature, child development, and community life. This book accompanies a museum exhibit, *Pets in America*, which opens at the McKissick Museum in Columbia, South Carolina, in December 2005 and will travel to five other cities from May 2006 through May 2008.

Companion Animals and Us Anthony L. Podberscek, Elizabeth S. Paul, James A. Serpell, Professor of Humane Ethics & Animal Welfare James A Serpell, 2000-04-13 Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human-companion animal interactions and relationships. This is not surprising considering that pets are kept in at least half of the households in Western societies. What then, is so special about the relationships people have with their pets? Are we very different from our ancestors in the ways we feel about animals? What does pet-keeping tell us about ourselves and our relationships with people? Can pets be good for our health? Do they help promote empathy for other humans? These questions and more are explored in this book. *Companion Animals and Us* brings together some of the newest research from a wide variety of disciplines including anthropology, history, psychology, sociology, human and veterinary medicine. This book will make fascinating reading for anyone interested in understanding more about the human-pet relationship.
