Short Range Stephen Leather,2019-07-25 An explosive thriller in the Spider Shepherd series Dan 'Spider' Shepherd's career path - soldier, cop, MI5 officer - has always put a strain on his family. So he is far from happy to learn that MI5 is using teenagers as informants. Parents are being kept in the dark and Shepherd fears that the children are being exploited. As an undercover specialist, Shepherd is tasked with protecting a 15-year-old schoolboy who is being used to gather evidence against violent drug dealers and a right-wing terrorist group. But when the boy's life is threatened, Shepherd has no choice but to step in and take the heat. And while Shepherd's problems mount up on the job front, he has even greater problems closer to home. His son Liam has fallen foul of the Serbian Mafia and if Shepherd doesn't intervene, Liam will die.

V.I.T.R.I.O.L Jean-Pierre Ribat,2018-02-28 Marcel Fortesse découvre un bien étrange manuscrit, vieux de plusieurs siècles... Guidé par le testament d’un obscur moine alchimiste, le désormais célèbre – mais toujours aussi caustique – docteur Marcel Fortesse se lance dans une chasse au trésor improbable. L’objet de toutes les convoitises ? Rien de moins que la fortune de l’armée huguenote qu’Henri IV se fit dérober lors de son séjour à Mantes-la-Jolie. Découvrez sans plus attendre cette nouvelle aventure palpitante du docteur Fortesse ! EXTRAIT « Aux éléments minéraux et végétaux susnommés, Il faudra adjoindre les éléments de vie suivants : Sept gouttes du sang vif d’un supplicié, Cinq larmes d’un enfant mâle, Trois gouttes d’urine d’une femme impure, Une goutte de semence tirée du corps même du préparateur. Le mélange final devra être réalisé à l’abri de toute lumière Pendant un Pater Noster dit de la fin jusqu’au début. » Philopétres soupira en se grattant la tonsure. D’un geste las, il referma le lourd volume qu’il venait de consulter. Sous l’effet dusouffle d’air déplacé, les trois bougies du chandelier s’éteignirent. Il resta dans la pénombre, à contempler la poussière scintillante qui retombait lentement sous la lueur d’un rayon de lune. À PROPOS DE L'AUTEUR Jean-Pierre Ribat est né en 1961 à Toulouse. D’abord médecin généraliste, il devient médecin urgentiste à l’hôpital de Mantes-la-Jolie, puis consultant au centre de dépistage anonyme des maladies sexuellement transmissibles. Il est par ailleurs médecin-capitaine des pompiers et fut ainsi missionné en Haïti après le tremblement de terre de janvier 2010. Jean-Pierre Ribat est aussi passionné de rugby, de course à pied et il est le chef de chœur des Copains d’abord, une chorale de quatre-vingts personnes... Fragrance Lila est le quatrième opus de Marcel Fortesse. Après les trois enquêtes Pas d’obstacle ?, Poussière d’anges et V.I.T.R.I.O.L, cette fois il part en quête de l’amour.

Perfecționări în tehnica omuciderii Golea Daniela Georgiana,Radu Andreea Florina,Lucian Ștefan Cozma,2020-07-22 Recent (august 2020) Editura Militară a publicat o lucrare cel puțin inedită: „Perfecționări în tehnica omuciderii. Îmbunătățirea armamentelor de foc portative și muniției eferente” (vol.1). Această carte este rodul muncii unui mic colectiv de autori format din persoane cu pregătire pluridisciplinară: Andreea Florina Radu, actualmente în cadrul Ministerului Afacerilor Interne, dar cu o vastă experiență profesională în domeniul politicii și relațiilor externe; Daniela Georgiana Golea, cu pregătirea de bază în domeniul economiei și a managementului, actualmente doctorand în cadrul Academiei Naționale de Informații, desfășurând activitate de cercetare în domeniul managementului securității naționale; Cosmin Vasile Țenu, inginer mecanic ca pregătire de bază, dar și master în securitate și apărare (Universitatea Națională de Apărare, București) și absolvent al Colegiului Național de Apărare din București, cu pregătire în domeniul conducerii politice a forțelor armate; în fine, echipa aceasta a fost completată cu Lucian Ștefan Cozma, persoană policalificată și posedând o variată experiență, jurist (licențiat în București), fizician (Măgurele) cu două specializări, fost pilot/parașutist sportiv. Abordând problema omuciderii, mai mult din perspectivă tehnică decât juridică, autorii sus-menționați au prezentat în lucrarea lor o serie de posibile (și prognozate) evoluții tehnologice ale armamentelor de foc și muniției acestora, pentru viitorul apropiat și mediu. Astfel, cercetătorii menționați mai devreme au intuit dezvoltarea în viitorul apropiat a muniției autopropulsate de calibru relativ mic, prezentând numeroase argumente științifice în acest sens, precum și exemple concrete de realizare a unor astfel de muniții. Totodată, ei au făcut și un scurt parcurs istoric al evoluției tehnologice specifice armelor de foc sau/și muniției acestora, prezentând cititorului maniera în care s-a produs această evoluție și cerințele care au impus-o. În final, căutând să preconizeze maniera în care ar putea evolua tehnologia armamentelor de foc într-un viitor previzibil. Lucrarea este bogat ilustrată și prezintă o densitate mare de date și informații, ceea ce induce nevoia de a lectura atent, fără grabă. În ciuda acestei dificultăți de lecturare, cartea respectivă este accesibilă publicului larg prin felul în care este organizată, ca și prin conținutul său divers și prezentat de o manieră cât mai inteligibilă. Acest prim volum nu face decât să ne stârnească surpriza și curiozitatea, mai ales că armamentele prezentate sunt în cea mai mare parte din cazuri, atipice, originale. Următoarele două volume (preconizate) ar urma să ne prezinte tehnologii cu totul noi destinate armamentelor: bazate pe utilizarea energiei electrice sau/și electromagnetice, energiei sonice, energiei undelor de șoc dirijate etc. De asemenea, este așteptată prezentarea armamentelor hibride și a celor neconvenționale dar făcând parte din categoria non-NBC (nuclear/biologic/chimic). Așteptăm cu mare interes următoarele două volume și-i invităm pe toți cei interesați de tehnică militară să caute volumul recent publicat de Editura Militară. GOLEA DANIELA GEORGIANA

Eicosanoids and Reproduction K. Hillier,2012-12-06 The original series, Advances in Prostaglandin Research, edited by Sultan M. M. Karim, was published by MTP Press in three volumes in 1975 and 1976. A glance at those books illustrates the progress that has been made since then. The thromboxanes were mentioned twice (first publication 1975) and prostacyclin not once (first publication 1976); leukotrienes were only on the horizon. The amazing generation of research data in the last 10-15 years has given new, broad insights into many areas, including asthma, inflammation, renal, cardiovascular and gastrointestinal diseases and in reproduction, and has led in some instances to real clinical benefit. This series, Advances in Eicosanoid Research, reflects the current understanding of prostaglandins , thromboxanes and leukotrienes. The aim is to provide an introductory background to each topic and the most up-to-date information available. Although each book stands alone, the eicosanoids cut across many boundaries in their basic actions; selected chapters from each book in the series will provide illuminating and productive information for all readers which will advance their education and research. In the production of this series, I must acknowledge with pleasure my collaboration with editors and authors and the patient endeavours of Dr Michael Brewis and the staff at MTP Press. KEITH HILUER University of Southampton England ix Preface This book is an appraisal of areas in human reproduction where eicosanoid studies (prostaglandins, leukotrienes and thromboxanes) are contributing to physiological and pathological awareness and clinical advances.

Analytical Profiles of Drug Substances and Excipients ,1993-11-17 Although the official compendia define a drug substance as to identity, purity, strength, and quality, they normally do not provide other physical or chemical data, nor do they list methods of synthesis or pathways of physical or biological degradation and metabolism. Such information is scattered throughout the scientific literature and the files of pharmaceutical laboratories. Analytical Profiles of Drug Substances and Excipients brings this information together into one source. The series has recently been expanded to include profiles of excipient materials.
