Phantom Ii

Mark A. Chambers

Engineering the F-4 Phantom II Glenn E. Bugos,1996 Conceived in 1953 in a chickenwire-covered cubicle known as the advanced design cage at McDonnell Aircraft, the F-4 Phantom II fighter-bomber was produced for 25 years, serving a full workload in Vietnam for the Navy, Marines, and Air Force, and surviving through the 1990s in the air arms of eleven nations. While most case studies of modern aircraft focus on the many ways the military-industrial complex goes wrong, this trenchant, invigorating study looks deeper at how those who built the complex intended it to work. Step by step the reader discovers how the relationships among parts, systems, procedures, economies, and missions were shaped by relationships among people - scientists, engineers, testers, program managers, subcontractors, military strategists, pilots and corporate leaders. Drawing on exhaustive research, including interviews with key players, the author makes a major advance in the burgeoning body of literature on technology management by showing how McDonnell worked through the problems of technical integration that plagued defense engineering in the 1960s and 1970s and led to programs full of complexity. It is as much a study of how aircraft manufacturers and military officers went about their business as it is a life-and-times history of an important aircraft.

F-4 Phantom II Society ,2001

F-4 Phantom II Society ,2017-03-01 (From the introduction) The Phantom was, and still is, used as a term of measurement in fighter talk. As this was written, some forty-two years after first flying, the Phantom is still receiving upgrades as a front fighter noise, smoke and forward motion by the Phantom. But the day will come when the Phantom will no longer take the skies in military service. Then it will only be seen by the public as an exotic flying warbird and perhaps on the ground of a museum where it joins other icons of the past. With this book the Phantom Society honors all those who have manufactured, worked, maintained, and flew the F-4. To those fortunate enough to have the Phantom in their past, even if only to see it fly, reminisce; to those in the future who will never see the Phantom fly, you missed the show.

USAF McDonnell Douglas F-4 Phantom II Peter E. Davies,2013-04-20 In many respects the most successful, versatile and widely-used combat aircraft of the post-war era the F-4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction. Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F-4Cs took over MiG-fighting duties from the F-100 Super Sabre. Although the F-4 was never intended as a dog-fighter to tangle with light, nimble, gun-armed MiGs it was responsible for destroying 109 MiGs in aerial combat. At the end of their careers many of the survivors from the 3,380 'land-based' Phantoms were converted into target drones for training purposes. New aircraft were also built for West Germany, Iran and Israel. The USAF's experience with the Phantom showed clearly that the air-to-air fighter was still a necessity and its decision to fund its successor, the McDonnell-Douglas F-15 Eagle (as well as the F-16 Fighting Falcon and F-22A Raptor) was heavily influenced by the lessons of US and other Phantom pilots in combat.

McDonnell Douglas F-4 Phantom II Mark A. Chambers,2018-04-09 This book tells the fascinating story of this truly unique aircraft's design and development as an icon of American airpower, and relives its glorious record in the Vietnam War, various Arab-Israeli conflicts, the Cold War, and Operation Desert Storm.

US Navy F-4 Phantom II MiG Killers 1965–70 Brad Elward,Peter E. Davies,2012-11-20 For every American fighter pilot involved in the Vietnam War, the ultimate goal was to 'kill a MiG'. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews, and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War, in April 1965, as well as scoring the last in January 1973. This volume charts the successes of the navy fighter crews as they encountered 'MiGs, Missiles and AAA' over the jungles of North Vietnam.

USN McDonnell Douglas F-4 Phantom II Peter E. Davies,2016-03-24 Originally designed as a carrier-borne long-range interceptor armed with radar-guided missiles and tasked with defence against missile-launching bombers, the Phantom II went on to establish itself as one of the most important multi-role fighter, attack and reconnaissance aircraft of the 20th century. Arguably the United States' most important aircraft in the Vietnam War, where it played the role of workhorse as well as being a deadly MiG interceptor, the Phantom was also a mainstay of Atlantic Fleet operations ? intercepting Soviet bomber and reconnaissance aircraft and turning them away from the carrier groups at the height of the Cold War. This book reveals the design and development history of the naval Phantom, its variants and the exported designs adopted by other NATO countries. Packed with illustrations, photographs and first-hand accounts, it provides a technical history of one of the most famous aircraft ever built.

Phantom II Lou Drendel,1977

Modelling the F-4 Phantom II Geoff Coughlin,Neil Ashby,2012-05-20 The 'Phabulous' Phantom first took to the air on 27 May 1958 and has been in service around the world for many decades. The United States, the United Kingdom, Australia, Egypt, Germany, Greece, Iran, Israel, Japan, South Korea, Spain and Turkey have all operated this powerful aircraft. The Phantom starred in both the Vietnam War and Operation Desert Storm, and in its service career has flown every traditional military mission. With many F-4 variants in service (from FG.1s to 'Wild Weasels'), and some 25 scale model kits currently available, the possibilities for modelling this subject are endless. There are few guides currently available to the F-4 modeller: this book seeks to redress the imbalance, providing an in-depth and step-by-step approach to modelling this plane across a variety of scales, types, and national schemes.

US Navy F-4 Phantom II Units of the Vietnam War 1964-68 Peter E. Davies,2016-08-25 The F-4 Phantom II is perhaps the most famous post-war fighter. Primarily used as a land-based fighter-bomber and reconnaissance platform, its naval origins and the immense contribution made to the US war effort in Vietnam by its original carrier-based versions began its legend. This title examines the unique aspects of the Phantom that made it so crucial to US Navy pilots during the Vietnam War – its massive engine power, long range, speed, the most powerful airborne search and fire-control radar installed in a fighter at the time, and of course its versatility as a ground attack and air-to-air platform. Packed with first hand accounts, unique profile artwork and rare photographs this is the history of one of the most important aircraft to be stationed on carriers off Southeast Asia during the war.

USAF F-4 Phantom II MiG Killers 1965–68 Peter E. Davies,2012-11-20 The USAF introduced the F-4C Phantom II into the Vietnam war in April 1965 from Ubon RTAB, Thailand. The F-4C/D soon became the Air Force's principal fighter over the North, destroying 85 MiGs by the close of 1968. This book describes how the USAF turned a gunless naval interceptor into an opponent to the more nimble VPAF MiGs. It explains how the Air Force gradually followed US Navy initiatives in the use of the F-4's missile armament but employed very different tactics and aircrew training. The roles of key personalities such as Col. Robin Oldany are discussed, together with armament and markings, crews and engagements.

McDonnell Douglas F-4 Phantom II Andy Evans,2008-02 The McDonnell Douglas F-4 Phantom II is a tandem two-seat, twin-engined, all-weather, long-range supersonic jet interceptor fighter/fighter-bomber. Part two of this title provides detailed photographic coverage of the US Navy and US Marine Corps variants.

US Navy F-4 Phantom II Units of the Vietnam War 1969-73 Peter E. Davies,2018-05-31 Although the F-4 Phantom II was the most important fighter-bomber to see action with all three American services during the Vietnam War, it was essentially a U.S. Navy design, and the carrier-borne squadron crews were its main operators in combat. The aircraft pioneered the use of long-range, radar-guided missiles in combat, although the majority of its Vietnam missions involved ground-attack with a variety of innovative ordnance. From 1968 to 1973 the Phantom II was the standard U.S. Navy fighter in Southeast Asia, having

replaced several other types. Its performance and versatility enabled it to perform a variety of different missions, and switch roles as necessary, in the assault on some of the world's most heavily defended territory. Including detailed colour profiles and first-person commentary from active participants in the F-4's naval combat history, this is a detailed study of the U.S. armed services' most famous post-war fighter.

Sherman Lead Gaillard R. Peck, Jr,2019-03-21 Written by a pilot who flew near-daily combat missions, this engrossing book is the story of one man, his colleagues and his machine, the mighty F-4 Phantom II, at war. Sherman Lead is the gripping story of a year flying the F-4 in combat during the Vietnam War, told through the eyes of a fighter pilot. Operating out of Ubon Royal Thai Air Base, Thailand in 1968–69, Gail Peck and his squadronmates in the 433rd Tactical Fighter Squadron of the 8th Tactical Fighter Wing were tasked with flying combat missions into North Vietnam and Laos at this time as part of Operations Rolling Thunder and Steel Tiger. The F-4 was heavily involved in the air-to-ground mission at this time, with targets being well defended by enemy anti-aircraft artillery and surface-to-air missiles. Gail Peck's arrival in-theatre coincided with the beginning of electro-optical and laser guided 'smart' bomb combat operations. There were periods of fierce combat interspersed with lulls, and the fighting was intense and unforgettable to those who participated. Some men lived through it, and others died without a clear understanding of why.

US Marine Corps F-4 Phantom II Units of the Vietnam War Peter E. Davies,2012-11-20 Twenty-five US Marine Corps squadrons flew versions of the Phantom II and 11 of them used the aircraft in South-East Asia from May 1965 through to early 1973. Rather than the air-to-air missiles that were the main component in the original F-4 armament, these aircraft carried an ever-expanding range of weaponry. Some toted 24,500-lb bombs and others strafed with up to three 20 mm gun pods, while most flew daily sorties delivering napalm, Snakeye bombs and big Zuni rockets. Many US Marines holding small outpost positions in Laos and South Vietnam against heavy Viet Cong attack owed their lives to the Phantom II pilots who repeatedly drove off the enemy. The book will examine these missions in the context of US Marine Corps close-support doctrine, using the direct experience of a selection of the aircrew who flew and organised those missions.

F-4 Phantom II in Action Larry Davis,1984 After nearly a decade of self-imposed isolation, Spinal Tap is back, celebrating their long-anticipated return with a full-length concert/comedy video.

McDonnel F-4 Phantom Gerard Paloque,2010-05-01 Shortly after the US Navy put the F-4H-1 Phantom II into service in 1960, the US Air Force in turn took an interest in it. After a successful comparison with the best machines of the period, it was decided at the beginning of 1962 to use it as the standard tactical fighter. It was in May 1963 that the first USAF F-4C, overall similar to the Navy version, made its first flight and exceeded Mach 2. Several versions and variants of the twin-engine fighter were produced over almost ten years, taking advantage each time of the progress made in avionics, power plants and armament, with the original "all-missile" concept being eventually put aside in the light of the fighting in South-East Asia in which the aircraft took an active part, in exchange for an on-board weapon which turned out to be very effective both in the aerial combat and ground attack roles. Apart from the USAF and the various units of the Air National Guard, or the United States Reserve which used the 2 600 F-4s up to the middle of the 90s - especially for recce or electronic warfare - the Phantom IIs were also very successful in the export markets since more than 1,200 examples were flown by ten or so countries, especially NATO ones. Some, like Japan, even built them under license in large numbers and many, like Israel and Iran, often used them successfully in combat.

Iranian F-4 Phantom II Units in Combat Farzad Bishop,Tom Cooper,2012-11-20 Different versions of the jet have provided the backbone of the frontline strength of the Iranian air force since the 1970s, and whole generations of Iranian pilots and ground personnel have been trained to fly and maintain them. Indeed, the type bore the brunt of active combat operations during the long war with Iraq. Iranian F-4 Phantom IIs were also some of best equipped examples ever exported by the USA. Some Iranian Phantom II pilots gathered immense experience on the type, flying it in combat for more than ten years. This book removes the veil of secrecy surrounding Iranian Phantom II operations since the war with Iraq.
