

Pilot

Ralph Connor, Fleming H. Revell Company

Ask the Pilot Patrick Smith, 2004 Though we routinely take to the air, for many of us flying remains a mystery. Few of us understand the how and why of jetting from New York to London in six hours. How does a plane stay in the air? Can turbulence bring it down? What is windshear? How good are the security checks? Patrick Smith, an airline pilot and author of Salon.com's popular column, *Ask the Pilot*, unravels the secrets and tells you all there is to know about the strange and fascinating world of commercial flight. He offers: A nuts and bolts explanation of how planes fly Insights into safety and security Straight talk about turbulence, air traffic control, windshear, and crashes The history, color, and controversy of the world's airlines The awe and oddity of being a pilot The poetry and drama of airplanes, airports, and traveling abroad In a series of frank, often funny explanations and essays, Smith speaks eloquently to our fears and curiosities, incorporating anecdotes, memoir, and a life's passion for flight. He tackles our toughest concerns, debunks conspiracy theories and myths, and in a rarely heard voice dares to return a dash of romance and glamour to air travel.

The Heart of a Pilot Thomas Lee Bangart, 2010-04-09 It was during a time when his family was financially down that the author discovered his passion. In a county fair where it was even hard for him and his mother to experience a single ride, he found himself fascinated with only one amusement—the old Curtis Robin airplane. Luckily for him, a family friend gave him the chance to ride it himself. As soon as the engine roared to life and the airplane lurched forward across the rough pasture and into the sky where he could see the beautiful view from above, he knew right then that he wanted to go flying for the rest of his life. Now in his late seventies, Bangart relives his

wonderful journey through the skies and life to bring inspiration to others. In this autobiography, he reminisces his adventures as a pilot during the Great Depression, treating the reader with an inside look at growing to manhood during the first half of the twentieth century. His descriptions of the early days of Alaska bush flying, and the trials and hazards of the early airline flying are given in great detail. A person does not have to be a pilot or airplane enthusiast to enjoy this book. It covers such things as driving the Alaska-Canadian highway both in summer and winter weather, making a home in Alaska with a new bride, how government has brought many changes in our lives, and many insights into life itself. If you have been a passenger on an airliner during these early years, this book will give you a perception to what went on behind the closed cabin door where the pilots were secluded.

The Interceptor Pilot Kenneth Gangemi, 1980 An American fighter pilot flies for North Vietnam.

Bomber Pilot Philip Ardery, 1978 Winner of the Best Aeronautical Book Award

from the Reserve Officers Association of the United States The sky was full of dying airplanes as American Liberator bombers struggled to return to North Africa after their daring low-level raid on the oil refineries of Ploesti. They lost 446 airmen and 53 planes, but Philip Ardery's plane came home. This pilot was to take part in many more raids on Hitler's Europe, including air cover for the D-Day invasion of Normandy. This vivid firsthand account, available now for the first time in paper, records one man's experience of World War II air warfare. Throughout, Ardery testifies to the horror of world war as he describes his fear, his longing for home, and his grief for fallen comrades. Bomber Pilot is a moving contribution to American history.

Viper Pilot (Enhanced Edition) Dan Hampton, 2012-10-02 Get inside the cockpit with Dan Hampton, the military's most decorated F-16 pilot, in this enhanced e-book edition of Viper Pilot. Exclusive to this edition are 11 video interviews, where Hampton talks candidly about his time as a Wild Weasel and about the fighter jet that kept him alive through so many dangerous skirmishes. In addition, an interactive "first-person" cockpit diagram lets you get deeper into the action, providing a visual companion to the book that leaves you feeling like you're sitting in the iconic F-16 itself. 151 combat missions 21 hard kills on surface-to-air-missile sites 4 Distinguished Flying Crosses with Valor 1 Purple Heart Sure to rank as one of the greatest aviation memoirs ever written, Viper Pilot is an Air Force

legend's thrilling eyewitness account of modern air warfare. From 1986 to 2006, Lt. Col. Dan Hampton was a leading member of the Wild Weasels, the elite Air Force fighter squadrons whose mission is recognized as the most dangerous job in modern air combat. Weasels are the first planes sent into a war zone, flying deep behind enemy lines purposely seeking to draw fire from surface-to-air missiles and artillery. They must skillfully evade being shot down—and then return to destroy the threats, thereby making the skies safe for everyone else to follow. Today these vital missions are more hazardous than direct air-to-air engagement with enemy aircraft. Hampton's record number of strikes on high-value targets make him the most lethal F-16 Wild Weasel pilot in American history. This is his remarkable story. Taught to fly at an early age by his father, Hampton logged twenty years and 608 combat hours in the world's most iconic fighter jet: the F-16 Fighting Falcon, or Viper as its pilots call it. Hampton spearheaded the 2003 invasion of Iraq, leading the first flight of fighters over the border en route to strike Baghdad. In the war that followed, he engaged in a series of brilliantly executed missions that earned him three Distinguished Flying Crosses with Valor; he notably saved a U.S. Marine unit from certain death by taking out the surrounding enemy forces near Nasiriyah. Two years earlier, on 9/11, Hampton's father was inside the Pentagon when it was attacked; with his dad's fate unknown, Hampton was scrambled into American skies and given the unprecedented orders to shoot down any unidentified aircraft. Hampton also flew critical missions in the first Gulf War, served on the Air Combat Command staff during the Kosovo War, and was injured in the 1996 Khobar Towers terrorist attack. With manned missions rapidly giving way to remote-controlled UAV drones, Viper Pilot may be the last memoir by a true hero of

the skies. Gripping and irreverently humorous, it is an unforgettable look into the closed world of fighter pilots and modern air combat. Please note that due to the large file size of these special features this enhanced e-book may take longer to download than a standard e-book.

Pathfinder Pioneer Raymond E. Brim, 2016-04-19 One young man's story of combat in the air, constant battles for survival, and the development of radar technology for use against the Luftwaffe. This is the story of how an eighteen-year-old miner shoveling ore from deep in the ground in Utah suddenly found himself, only two years later, 30,000 feet in the air over Nazi Germany, piloting a Flying Fortress in the first wave of America's air counteroffensive in Europe. Like thousands of other young Americans, Ray Brim was plucked out by the US Army to be a combat flyer, and was quickly pitted against the hardened veterans of the Luftwaffe. Brim turned out to have a natural knack for flying, however, and was assigned to the select squadron developing lead pathfinder techniques, while experimenting with radar. He was among the first to test the teeth of the Luftwaffe's defenses, and once those techniques had been honed, thousands of other bomber crews would follow into the maelstrom—from which 80,000 never returned. This book gives us vivid insights into the genesis of the American air campaign, told with the humor, attention to detail, and humility that captures the heart and soul of our "Greatest Generation." Brim was one of the first Pathfinder pilots to fly both day and night missions, leading bomb groups of six-hundred-plus bombers to their targets. At the onset of his missions in the spring of 1943, B-17 crews were given a fifty-fifty chance of returning. All his raids were nerve-racking forays into the unknown, struggles to survive the damage to his

plane caused by flak and German fighter attacks and bring his ten-man crew home, often wounded—but still alive.

Violet the Pilot Steve Breen, 2016-09-13 Violet is a science-loving girl inventor with a flair for the air! Fans of Ada Twist, Scientist and Rosie Revere, Engineer will love this classic underdog story by two-time Pulitzer Prize-winning editorial cartoonist Steve Breen. By the time she's two years old, Violet Van Winkle can engineer nearly any appliance in the house. And by eight she's building elaborate flying machines from scratch—mind-boggling contraptions such as the Tubbubbler, the Bicycopter, and the Wing-a-ma-jig. The kids at school tease her, but they have no idea what she's capable of. Maybe she could earn their respect by winning the blue ribbon in the upcoming Air Show. Or maybe something even better will happen—something involving her best-ever invention, a Boy Scout troop in peril, and even the mayor himself! An engaging story of a spunky girl who follows her dreams . . . Violet is a terrific role model.--School Library Journal

The Pilot Ed Cobleigh, 2019-07-22 He can't shoot down the future, but his

storied past is the key to his present. The Pilot loves fighter planes, a beautiful woman, and Paris. He is to fly the new F-35, but will its electronics erode his lone-wolf ethos? Complicating his life is a beautiful, mysterious French woman who may be a spy, or maybe someone much closer to him. The Pilot has mastered many fighters, from the treacherous Sopwith Camel to the stiletto F-104 Starfighter, from the Spitfire to the F-16 Viper. But, this challenge is different, with no obvious airborne answer. The Pilot re-lives classic combat missions, from the leaden skies of WWI to the sun-blasted Iraqi desert, while re-living past love affairs. Searching for answers, he taps the thoughts of Hemingway, Bobbie Burns, Churchill, Antoine de Saint-Exupéry, Robert the Bruce, von Richthoven, and Yogi Berra. Fast-paced in the City of Light, *The Pilot: Planes Fighter and Paris* delivers a mélange of air combat, aviation history, libido, and memories. The novel puts you in the cockpit and the bedroom, immerses you in Parisian ambiance, and answers the question, Who is the Pilot?

The American Pilot David Greig, 2005 A spy plane crash-lands in a remote valley in a distant country. The local villagers take in the wounded pilot and argue his fate. *The American Pilot* explores the way the world sees America and the way America sees the world. *The American Pilot* premiered with the RSC at The Other Place, Stratford-upon-Avon in April 2005. 'Greig at his best.' Evening Standard. 'One of the most intellectually stimulating dramatists around... A richly provocative new play.' Guardian 'The sheer brilliance of Greig, storyteller and seer.' Herald. *The American Pilot* premiered with the RSC at The Other Place, Stratford Upon Avon, in April 2005.

Pilot Patrick Patrick Biedenkapp, 2020-10-13 Tricky maneuvers, curious

passengers, and other kinds of turbulence The star DJ who spontaneously invites the entire flight crew to his concert in Rome, the businessman who has his forgotten cigars flown in by private jet, and the oil millionaire who has the stewardesses crawl through the cabin on all fours to the sound of Pavarotti arias—there's nothing that Pilot Patrick has not experienced in his job. Germany's most famous airline captain takes us on a joyride to the most beautiful places in the world, telling us how he made his dream of flying come true, what really helps against the fear of flying, and what you should consider if you want to become a pilot yourself. From wild party nights on the Côte d'Azur to sex above the clouds, Pilot Patrick gives us an exclusive look behind the normally closed doors of the international jet set—and reveals a secret that, until now, has always flown below the radar.

"Jump, Damn It, Jump!" Edward F. Logan, Jr., 2006-09-12 Soon after the United States entered World War II, American ground and air forces were on their way to the European theater of operations. Among that offensive buildup was the 15th Air Force, consisting of four-engine heavy bombers--the B-17 and B-24--as well as twin-engine medium bombers and several types of fighter aircraft. The 15th was first stationed in North Africa and then in southern Italy, where pilots could strike at any military target within a 700 mile radius. After ferrying a B-17 to England with the 8th Air Force, Lt. Edward Logan was transferred to the 15th Air Force, Fifth Wing, 483rd Bomb Group, 817th Bomb Squadron in Italy. Logan and members of his unit were assigned to use American air power to destroy the German military's manufacturing and petroleum complexes as well as its intricate transportation system. This gripping memoir gives a detailed account of Logan's experiences throughout his Army Air Corps career. It outlines the progression of a determined would-be pilot through two years of training, his 1944 journey to the war's theater and advent into actual combat. While other missions are summarized, the work's main focus is the author's thirty-fourth combat mission, which took place in March 1945. During this operation, his B-17 bomber sustained damage so severe that he and nine crewmen were forced to bail out over enemy territory. Aided by Slovenian partisans, Logan and his crew evaded the German troops who were searching for them and returned safely to their base. This firsthand account includes insider details, technical specifications of the B-17 bomber and previously classified information. An epilogue provides additional information on the partisans and the composition of the 15th Air Force.
