**14 Days to Alaska** Troy Hamon,2012-04-01 Flying a small plane to Alaska is an adventure many pilots only dream of. In 2008, the author, a student pilot, and his brother, a flight instructor, embarked on this adventure in an airplane old enough to be their mother. On their journey, they examined how to fit twelve feet eight inches worth of grown men into one of the smallest cockpits on earth--for as many as eight hours a day. They visited places they had planned on going, to see friends and relatives, and made unintended stops in places they hadn't ever heard of. They waited out weather, waited on maintenance, and wrapped the whirlwind of learning to fly into one of the grandest cross-country trips imaginable. In the end, they covered in two weeks what takes commercial air carriers only a few hours to accomplish--but they had a lot more fun--and a much better view.

**Contact Flying** Jim Dulin,2008-05 Unlike conventional aviation authors and instructors I do not teach primary flying, crop dusting, pipeline patrol flying, bush flying, helicopter medical evacuation flying, and air to ground gunnery using instruments inside the aircraft as the primary situational awareness tool. Rather I teach Dutch rolls, slow flight and stalls over the runway, the energy management turns, use of ground effect on all takeoffs, the brisk walk apparent rate of closure approach, hover taxi in fixed wing aircraft, and low level low power mountain flying using sights, sounds, smells, and kinetics. Sight is used 99.9% of the time looking at the ground. Airspeed, nor any other instrument is used in takeoff or landing. This text teaches the art of flying in the old style at low level using ground references. Its author has over sixteen thousand hours of flying Army helicopters, crop dusters, and pipeline patrol airplanes at three feet to five hundred feet above ground level.

Flight of Passage Rinker Buck,2013-03-05 Writer Rinker Buck looks back more than 30 years to a summer when he and his brother, at ages 15 and 17 respectively, became the youngest duo to fly across America, from New Jersey to California. Having grown up in an aviation family, the two boys bought an old Piper Cub, restored it themselves, and set out on the grand journey. Buck is a great storyteller, and once you get airborne with the boys you find yourself absorbed in a story of adventure and family drama. And Flight of Passage is also an affecting look back to the summer of 1966, when the times seemed much less cynical and adventures much more enjoyable.

Shadows on the Koyukuk Jim Rearden, Sidney Huntington, 2014-04-04 "I owe Alaska. It gave me everything I have." Says Sidney Huntington, son of an Athapaskan mother and white trader/trapper father. Growing up on the Koyukuk River in Alaska's harsh Interior, that "everything" spans 78 years of tragedies and adventures. When his mother died suddenly, 5-year-old Huntington protected and cared for his younger brother and sister during two weeks of isolation. Later, as a teenager, he plied the wilderness traplines with his father, nearly freezing to death several times. One spring, he watched an ice-filled breakup flood sweep his family's cabin and belongings away. These and many other episodes are the compelling background for the story of a man who learned the lessons of a land and culture, lessons that enabled him to prosper as trapper, boat builder, and fisherman. This is more than one man's incredible tale of hardship and success in Alaska. It is also a tribute to the Athapaskan traditions and spiritual beliefs that enabled him and his ancestors to survive. His story, simply told, is a testament to the durability of Alaska's wild lands and to the strength of the people who inhabit them.
