## **Ancient Irrigation Systems of the Aral Sea Area**

Boris V. Adrianov, Simone Mantellini, 2013-12-31  
Ancient Irrigation Systems in the Aral Sea Area, is the English translation of Boris Vasilevich Andrianov's work, *Drevnie orositelnye sistemy priaralya*, concerning the study of ancient irrigation systems and the settlement pattern in the historical region of Khorezm, south of the Aral Sea (Uzbekistan). This work holds a special place within the Soviet archaeological school because of the results obtained through a multidisciplinary approach combining aerial survey and fieldwork, surveys, and excavations. This translation has been enriched by the addition of introductions written by several eminent scholars from the region regarding the importance of the Khorezm Archaeological-Ethnographic Expedition and the figure of Boris V. Andrianov and his landmark study almost 50 years after the original publication.

*The Climb* Anatoli Boukreev, G. Weston DeWalt, 2015-09-22 Everest, the major motion picture from Universal Pictures, is set for wide release on September 18, 2015. Read *The Climb*, Anatoli Boukreev (portrayed by Ingvar Sigurðsson in the film) and G. Weston DeWalt's compelling account of those fateful events on Everest. In May 1996 three expeditions attempted to climb Mount Everest on the Southeast Ridge route pioneered by Sir Edmund Hillary and Tenzing Norgay in 1953. Crowded conditions slowed their progress. Late in the day twenty-three men and women-including expedition leaders Scott Fischer and Rob Hall-were

caught in a ferocious blizzard. Disoriented and out of oxygen, climbers struggled to find their way down the mountain as darkness approached. Alone and climbing blind, Anatoli Boukreev brought climbers back from the edge of certain death. This new edition includes a transcript of the Mountain Madness expedition debriefing recorded five days after the tragedy, as well as G. Weston DeWalt's response to Into Thin Air author Jon Krakauer.

High Crimes Michael Kudas, 2008-02-05 High Crimes is journalist Michael Kudas's gripping account of life on top of the world--where man is every bit as deadly as Mother Nature. In the years following the publication of Into Thin Air, much has changed on Mount Everest. Among all the books documenting the glorious adventures in mountains around the world, none details how the recent infusion of wealthy climbers is drawing crime to the highest place on the planet. The change is caused both by a tremendous boom in traffic, and a new class of parasitic and predatory adventurer. It's likely that Jon Krakauer would not recognize the camps that he visited on Mount Everest almost a decade ago. This book takes readers on a harrowing tour of the criminal underworld on the slopes of the world's most majestic mountain. High Crimes describes two major expeditions: the tragic story of Nils Antezana, a climber who died on Everest after he was abandoned by his guide; as well as the author's own story of his participation in the Connecticut Everest Expedition, guided by George Dijmarescu and his wife and climbing partner, Lhakpa Sherpa. Dijmarescu, who at first seemed well-intentioned and charming, turned increasingly

hostile to his own wife, as well as to the author and the other women on the team. By the end of the expedition, the three women could not travel unaccompanied in base camp due to the threat of violence. Those that tried to stand against the violence and theft found that the worst of the intimidation had followed them home to Connecticut. Beatings, thefts, drugs, prostitution, coercion, threats, and abandonment on the highest slopes of Everest and other mountains have become the rule rather than the exception. Kudas describes many such experiences, and explores the larger issues these stories raise with thriller-like intensity.

**Transdex Index** ,1992 An index to translations issued by the United States Joint Publications Research Service (JPRS).

The Memory of the Second World War in Soviet and Post-Soviet Russia David L. Hoffmann, 2021-08-26

This volume showcases important new research on World War II memory, both in the Soviet Union and in Russia today. Through an examination of war remembrance in its various forms—official histories, school textbooks, museums, monuments, literature, films, and Victory Day parades—chapters illustrate how the heroic narrative of the war was established in Soviet times and how it continues to shape war memorialization under Putin. This war narrative resonates with the Russian population due to decades of Soviet commemoration, which continued virtually uninterrupted into the post-Soviet period. Major themes of the volume include the use of World War II memory for political legitimation and patriotic mobilization; the striking continuities between Soviet and post-Soviet commemorative practices; the place of Holocaust memorialization in contemporary Russia; Putin's invocation of the war to bolster national pride and international prestige; and the relationship between individual memory and collective remembrance. Authored by an international group of distinguished specialists, this collection is ideal for scholars of Russia across a range of disciplines, including history, political science, sociology, and cultural studies.

**Holdout** Jeffrey Kluger, 2021-08-03 One of Literary Hub's August "Best Sci-Fi and Fantasy Books" | Geek Tyrant's "The Most Highly

Anticipated Sci-Fi and Fantasy Books of August 2021" | Gizmodo's "49 New Sci-Fi and Fantasy Books to Keep You Turning Pages in August" When evil forces are going unchecked on Earth, a principled astronaut makes a split-second decision to try to seek justice in the only place she knows how—the International Space Station. Walli Beckwith is a model astronaut. She graduated at the top of her class from the Naval Academy, had a successful career flying fighter jets, and has spent more than three hundred days in space. So when she refuses to leave her post aboard the International Space Station following an accident that forces her fellow astronauts to evacuate, her American and Russian colleagues are mystified. For Walli, the matter at hand feels all too clear and terrifying for her to be worried about ruining her career. She is stuck in a race against time to save a part of the world that seems to have been forgotten—and also the life of the person she loves the most. She will go to any length necessary, using the only tool she has, to accomplish what she knows is right.

*History of Russian Underwater Acoustics* Oleg A. Godin, David R. Palmer, 2008 This book describes, using first-person accounts, the history of the development in the Soviet Union and, later, in Russia of an extremely important technical field and how that history was influenced by WWI, WWII, and the Cold War, by government bureaucracy, in both positive and negative ways, by the economic collapse of the Soviet Union, and most importantly, by the dedicated efforts of vast numbers of individuals, including some of the greatest scientific minds of the 20th century. It will make fascinating reading for engineers and scientists who were engaged in similar work in the West, for historians of the Cold War and of the Soviet Union, and for present day researchers who need to learn about Russian scientific contributions. Because of its importance to national security, much of the research and development effort in underwater acoustics was classified during the Cold War, both in the Soviet Union and the United States. This book presents the first declassified accounts of the development of numerous hydroacoustic systems by individuals having first-hand knowledge of the development efforts.

Machine Learning Methods for Commonsense Reasoning Processes: Interactive Models Naidenova, Xenia, 2009-10-31 This book suggests that classification is a key to human commonsense reasoning and transforms traditional considerations of data and knowledge communications, presenting an effective

classification of logical rules used in the modeling of commonsense reasoning.

**The Socialist Sixties** Anne E. Gorsuch, Diane P. Koenker, 2013-06-12 "A very engaging collection of essays that adds much to an evolving literature on the social history of the Soviet Union and broader socialist societies." –Choice The 1960s have reemerged in scholarly and popular culture as a protean moment of cultural revolution and social transformation. In this volume socialist societies in the Second World (the Soviet Union, East European countries, and Cuba) are the springboard for exploring global interconnections and cultural cross-pollination between communist and capitalist countries and within the communist world. Themes explored include flows of people and media; the emergence of a flourishing youth culture; sharing of songs, films, and personal experiences through tourism and international festivals; and the rise of a socialist consumer culture and an esthetics of modernity. Challenging traditional categories of analysis and periodization, this book brings the sixties problematic to Soviet studies while introducing the socialist experience into scholarly conversations traditionally dominated by First World perspectives.

**Education and Society in the New Russia** David M Jones, 2016-09-16 This survey of the changes in education and socialization in the former USSR examines the institutions that are shaping the first post-Soviet generation. Chapters provide reports on such questions as diversification and the development of independent schools, curriculum reform and democratization.

**Outposts on the Frontier** Jay Chladek, 2017-08 The International Space Station (ISS) is the largest man-made structure to orbit Earth and has been conducting research for close to a decade and a half. Yet it is only the latest in a long line of space stations and laboratories that have flown in orbit since the early 1970s. The histories of these earlier programs have been all but forgotten as the public focused on other, higher-profile adventures such as the Apollo moon landings. A vast trove of stories filled with excitement, danger, humor, sadness, failure, and success, *Outposts on the Frontier* reveals how the Soviets and the Americans combined strengths to build space stations over the past fifty years. At the heart of these scientific advances are people of both greatness and modesty. Jay Chladek documents the historical tapestry of the people, the early attempts at space station programs, and how astronauts and engineers have contributed to and shaped the ISS in surprising ways. *Outposts on the Frontier* delves into the intriguing stories behind the USAF Manned Orbiting Laboratory, the Almaz and Salyut programs, Skylab, the Apollo-Soyuz Test Project, Spacelab, Mir station, Spacehab, and the ISS and gives past-due attention to Vladimir Chelomei, the Russian designer whose influence in space station development is as significant as Sergei Korolev's in rocketry. *Outposts on the Frontier* is an informative and dynamic history of humankind's first outposts on the frontier of space.
