

Polikarpov I 16

Tony Holmes

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 The I-15, I-16 and I-153 fighters were the world's first mass-produced fighters. Some 17,000 Polikarpovs had been manufactured by the time production ceased in 1941. They served with the Republicans in the Spain, the Chinese against Japan in 1937-38, and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War. By 1941, more than 20 Soviet pilots had made ace in Polikarpovs, and many more attained that status during the first months of the German invasion. Though thoroughly outclassed, the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east, and continued to serve, as training aircraft and as frontline fighters, some right through to 1945.

Polikarpov's I-16 Fighter Yefim Gordon, Keith Dexter, 2001 Aviation historians often dismiss the Polyikarpov I-16 because it did not fare well against its more modern adversaries in WWII. It was often referred to in the West by the disparaging nickname of Rata, the Russian word for rat! Nikolay Polyikarpov's I-16 was nevertheless an outstanding fighter in its day--among other things, because it was the world's first monoplane fighter with a retractable undercarriage. Its capabilities were demonstrated effectively during the Spanish Civil War and it was still in front line service when the German armed forces fell on the Soviet Union in 1941. This book details every variant of this diminutive fighter, including development aircraft and unbuilt projects. An account is also given of Polyikarpov's early monoplane fighters that presaged the I-16 and of the later designs that evolved from it. Details are given of all surviving examples including the six aircraft that were restored to airworthy condition in Russia in the 1990s.

I-16 Rata Oleg Pototskiy, 2021-08-31 This book introduces the reader to a remarkable fighter aircraft, that which had a great influence on both the pre-war development of Soviet aircraft, and the military developments that occurred in the first few months of the war between Germany and the USSR.

Polikarpov's Biplane Fighters Yefim Gordon, Keith Dexter, 2002 The Soviet Polikarpov design bureau is perhaps best known for the I-16 fighter, the world's first monoplane fighter to have a retractable undercarriage. This aircraft is covered in Volume 3 of the Red Star series. This book explores the development of Polikarpov's fighting biplanes from the 2I-N1 to his first aircraft to see production; to the I-3 and the I-5 created while the designer was in prison. This design paved the way for the I-15 which earned fame as the Chato during the Spanish Civil War and also saw action against the Japanese, and the I-15bis which owed its existence mainly to Soviet Air Force's prejudice against gull wings; and the famous I-153 Chaika, a gull-wing biplane with retractable-landing gear. Experimental versions of this aricraftg are also included in the book. A detailed account of the combat role of

these aircraft is given as are structural descriptions. The book also includes details of the ill-starred I-190 which was to have superseded the Chaika and of privately owned I-15bis and I-153s which have been restored to airworthy condition.

King of Fighters -- Nikolay Polikarpov and His Aircraft Designs Mikhail Maslov, 2021-01-19 In the century-long history of the conquest of the sky there have been a number of outstanding personalities. Among them is the name of designer Nikolay Polikarpov (1892-1944), which is inseparably associated with the best achievements of the Russian and Soviet aviation. His practical activity in the aircraft industry began upon graduation from the Petersburg Polytechnic Institute in 1916. Aged 25, Polikarpov was sent to the Russo-Baltic Wagon Factory (RBWF), where the four-engined Ilya Muromets bombers designed by Igor Sikorsky were being built at that time. Later, beginning from August 1918, he worked in Moscow at the Dux aircraft factory. For several years, he was engaged in improving products manufactured by the factory, and upgrading production aircraft to accommodate the available engines, equipment and materials. From 1922, Polikarpov focused his attention on fighter aircraft, creation of which was a priority for him during the following years. The first of them was the IL-400 monoplane, designated I-1 by the Air Force. The monoplane was followed by biplanes including the 2I-N1 (1925), the I-3 (1927), the D-2 (1928), and the I-6 (1929). It was specialization in fighter aircraft which, from then on, became his mission in life. At the peak of his career as a designer, Polikarpov was informally styled 'the King of Fighters', which was quite in line with the level of his merits and achievements. In the 1930's, the TsKB-3 (I-15) and TsKB-12 (I-16) fighters were designed under Polikarpov's supervision. These aircraft were the designer's undoubtable success. They also were the main combat fighters in service with the Red Army Air Force. For the creation of the I-15 and the I-16 fighters, Polikarpov was awarded the Order of Lenin in 1935, and the Order of the Red Star a year later. In the 1930's, Nikolay Polikarpov devised a lot of aircraft of various designs, the majority of which can be described as 'advanced' and 'innovative'. In 1940, Polikarpov was granted the degree of the Doctor of Engineering and the title of the Chief Designer of the highest category. In the same year, he was awarded the title of the Hero of Socialist Labor. A year later, he became a recipient of the Stalin Prize. The gifted Soviet engineer was destined to live only 52 years. On 30 July 1944, Nikolay Polikarpov died of a rapidly evolving oncological disease. To venerate his memory, the U-2 trainer has ever since been designated the Po-2 (Polikarpov-2). The book which is presented to the reader describes all Polikarpov's original projects, both those put into reality and unimplemented ones. It took the author many years to prepare for the creation of the book. The author studied materials on the respective topics in all Russian archives, and made use of remembrances of Polikarpov's contemporaries and publications by other researchers. For purposes of clarity and in order to facilitate publication, the author split the book on Nikolai Polikarpov's aircraft into two parts - the 'Biplane Era' and the 'Monoplane Era'. Indeed, during the designer's activity from 1918 through to 1932, he devoted himself predominantly to creating biplanes. For the 1920's, the biplanes were a preferable option; they were more common, more reliable, better studied, and even more desirable for the Red Army Air Force. The first design of the IL-400

(I-1) monoplane fighter appeared as early as 1923; however, it was through its novelty and unpredictability that the aircraft failed to achieve the deserved success. It should be noted that the U-2 (Po-2) and the R-5 biplanes, which were created during that period, became one of the best Polikarpov aircraft, and brought him recognition as a reputed designer. In the 1930's, Nikolai Polikarpov's activity reached its pinnacle. It was during that period that he created his advanced monoplanes such as the I-16, the I-17, the VIT-2, and others. He continued his fruitful and quite successful activity in the area of creating modern aircraft during the war of 1941--45 as well.

Russian Aircraft of World War II Edward Ward, 2021-06 Organized chronologically by type, Russian Aircraft of World War II offers a highly illustrated guide to the main types of aircraft used by the Soviet Air Force during World War II. The book provides a comprehensive survey of combat aircraft, from the compact, revolutionary Polikarpov I-16 fighter of the Winter War in Finland, to the Ilyushin Il-2 Shturmovik and Petlyakov Pe-2, two of the outstanding ground-attack aircraft of the Eastern Front campaign. All the major and many minor types are featured, including fighters, dive bombers, ground-attack aircraft, night bombers, strategic bombers, and reconnaissance and transport aircraft. This includes both well-known models, such as the classic MiG-1 fighter and Tupolev SB fast bomber, through lend-lease aircraft like the A-20 Havoc and B-24 Liberator, to lesser-known models, including the Yermolayev Yer-2 medium bomber and Kharkiv KhAI-5 light bomber. Each featured profile includes authentic markings and color schemes, while every separate model is accompanied by exhaustive specifications. Packed with 110 full-color artworks with detailed specifications, Russian Aircraft of World War II is a key reference guide for military modelers and World War II enthusiasts.

Soviet Combat Aircraft of the Second World War E. Gordon, Yefim Gordon, Dmitrii Khazanov, 1998 Soviet Combat Aircraft of the Second World War, Volume One Gordon and Khazanov Subtitled: Single-Engined Fighters. Arranged by manufacturer, this authoritative study contains the products of Soviet designers Lavochkin, Mikoyan and Yakovlev, as well as several lesser known names. Fact-filled with design and development histories, political backgrounds, production numbers, flight test results, operational accounts, and details of units and campaigns. Technical descriptions are backed up by comprehensive spec tables. Exceptional archive photography. Introduction by Bill Gunston. Hdbd., 9 1/2x 12, 184 pgs., 358 b/w ill., 17 color.

Spanish Republican Aces Rafael A López Permy, 2013-03-20 At the start of the Spanish Civil War, most young fighter pilot officers joined the rebels, while the high ranking officers, grupo or escuadrilla commanders, and the NCOs, sergeants and corporals remained loyal to the government. Mostly flying the obsolete Nieuport Ni.52s these loyalists were soon outpaced by the more modern Fiat CR.32s and Heinkel He 51s. However, at this early stage of the war, there were several Republican airmen who became aces and famous in the process, despite the small numbers of enemy aircraft shot down. Widely speaking, the Republican military aviation did not keep an exhaustive record of individual shooting claims. However, sufficient documentation exists to make a reasonable assumption as to which pilots fall into the ace category. This volume details the exploits of those pilots, complementing

previous works in the Osprey Aircraft of the Aces series on Nationalist CR.32 Aces and Polikarpov I-15, I-16 and I-152 Aces.

Aircraft Anatomy of World War II Paul Eden, Soph Moeng, 2016-01-25 Full specifications for each aircraft including dimensions, powerplant, weight, performance, and armament.

LaGG & Lavochkin Aces of World War 2 George Mellinger, 2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Despite technical maladies and political interference from Moscow, the LaGG-3 matured into an effective fighter when flown to its strengths at low level. Many early Soviet aces were weaned on the LaGG-3, and if they survived the early massacres of 1941-42, they went on to fly the Lavochkin family of fighters. Indeed, the Lavochkin La-3, -5 and -7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub, who claimed 62 kills.

Soviet Air Force Fighter Colours 1941-1945 Erik Pilawskii, 2003 This book represents probably the most detailed study published in the English language of the camouflage and markings of the fighter aircraft of the Soviet Air Force during World War II. Erik Pilawskii is a scholar of the Soviet Air Force in World War II and has undertaken several years of research to produce this ground-breaking book. With information drawn from previously inaccessible Soviet archives, the author first presents a detailed analysis of the developments, trends, patterns and irregularities of the color systems seen on Russian fighters and offers a fascinating insight into the workings of the Soviet manufacturing system responsible for this task. He then brings readers a technical study of each of the main fighter aircraft and variants, and each description is followed by coverage of camouflage and markings, factory-applied, field variations and seasonal. The text is supported by hundreds of rare and previously unpublished photographs and more than 40 commissioned full color artworks. Furthermore, hundreds of color illustrations portray the immense variety of patterns related to this fascinating subject. This book will be a must-have for all students of Soviet air power and Russian aircraft modelers.

MiG-3 Aces of World War 2 Dmitriy Khazanov, 2013-05-20 The MiG-1/3 family of fighters was built to satisfy a Soviet Air Force requirement for an advanced, fast, high-altitude fighter. Entering service in the spring of 1941, the problematic MiG-1 had its handling issues rectified with the hasty production of the MiG-3. Many of these were destroyed on the ground when the Germans launched Operation Barbarossa. Nevertheless, enough examples survived to allow pilots such as Stepan Suprun and Aleksandr Pokryshkin to claim a number of victories in the type. This book tells the complete story of the men who made ace in the first examples of the famous MiG fighter.

Bf 109E/F vs Yak-1/7 Dmitriy Khazanov, Aleksander Medved, 2015-06-20 Step into the cockpits of the Luftwaffe's Bf 109 and the Red Air Force's Yaks 1-7, two fighters which were involved in some of the largest, fiercest aerial battles in history. The Iconic Messerschmitt fighter and its combat hardened pilots inflicted a fearful beating on the Yaks in the beginning of the war. Some of the highest scoring aces in history benefitted from the Bf 109's technical superiority over the overweight and underpowered Yak 1, racking up incredible successes against their

poorly trained and equipped adversaries. And yet, as the Soviets accumulated combat experience, their tactics improved, as did their mounts in the upgraded Yak 1B and gradually, the Red Force eroded the Jagdwaffe's dominance of the skies in the eastern front, though with the 109G they would never lose qualitative superiority. Featuring first-hand accounts from veteran pilots, rare archival photographs and expert analysis, this volume brings to life the vicious dogfights that took place between the Bf 109 and the Yak as they vied for mastery of the frozen skies of the Eastern Front.

World War II Fighter Planes Spotter's Guide Tony Holmes, 2021-02-04 World War II saw pilots from around the world battling in the skies over Europe, Asia and Africa, with victory resting upon their nerve, skill and the capabilities of some of history's most iconic aircraft. In the chaos of battle, it was vital that they could quickly identify friend from foe. But do you know your Hurricane from your Bf 109, or what the legendary P-51 Mustang looks like? Do you know the wingspan of the A6M Zero-sen, or how fast it could fly? THE WORLD WAR II FIGHTER PLANES SPOTTER'S GUIDE answers all of these questions and more, providing essential information on over 90 legendary aircraft, from the celebrated Spitfire to the jet-powered Me 262. Featuring full-colour artwork to aid recognition, as well as all the details you need to assess their performance, this is the perfect pocket guide to the Allied and Axis fighters of World War II.

Famous Fighters of the Second World War, 1957 Beskriver jagerfly kendt fra 2. verdenkrig og fra flere lande
Enemy at the Gates Justo Miranda, 2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters, as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherland, Poland, Romania, Sweden and Switzerland.
