John C. Fredriksen

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914-2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

Tupolev Paul Duffy, A. I. Kandalov, 1996 This book focuses on the aircraft designs of the man often referred to as the father of Russian aviation, Andrei Nikolaevich Tupolev. Born in Russia in 1888, Tupolev went on to design aircraft that earned Russia worldwide acclaim for their contributions to aviation in the 1920s, '30s, and '40s.

Legion Condor 1936-39 James S. Corum, 2020-04-30 The bombing of Guernica has become a symbol of Nazi involvement in the Spanish Civil War, but the extent of the German commitment is often underestimated. The Luftwaffe sent 20,000 officers and men to Spain from 1936 to 1939, and the Condor Legion carried out many missions in support of the Spanish Nationalist forces and played a lead role in many key campaigns of the war. Aircraft that would play a significant role in the combat operations of World War II (the Heinkel 11 bomber, the Me 109 fighter, and others) saw their first action in Spain, fighting against the modern Soviet fighters and bombers that equipped the Republican Air Force. Condor Legion bombers attacked Republican logistics and transport behind the lines as well as bombing strategic targets, German bombers and fighters provided highly effective close air support for the front-line troops, and German fighters and anti-aircraft units ensured Nationalist control of the air. The experience garnered in Spain was very important to the development of the Luftwaffe. The war allowed them to hone and develop their tactics, train their officers, and to become the most practised air force in the world at conducting close support of ground troops. In effect, the Spanish Civil War proved to be the training ground for the Blitzkrieg which would be unleashed across Europe in the years that followed. In this rigorous new analysis, Legion Condor expert James Corum explores both the history and impact of the Luftwaffe's engagement during the Spanish Civil War and the role that engagement played in the development of the Luftwaffe strategy which would be used to such devastating effect in the years that followed.

Hispano Suiza in Aeronautics Manuel Lage Marco, 2003-11-01 This book examines Hispano Suiza's evolution and the technological advances of its engines. Starting with circumstances that favored the creation of an indigenous aviation engine, the story follows engine development for a breadth of applications, particularly aviation engines, and describes, in parallel, the birth and development of aircraft in Spain by Campaña Española de Construcciones Aeronáuticas (CECA), La Hispano, La Hispano Aircraft, La Hispano Suiza, SAF-5, SAF-15, and La Hispano Aviación. *Hispano Suiza in Aeronautics: Men, Companies, Engines and Aircraft* is an in-depth study covering a vast period in the history of the Spanish and French aircraft industry (1913-1967) and offers insight into Hispano Suiza's significant developments.

The Osprey Encyclopedia of Russian Aircraft Bill Gunston, 2000-05-25 Sweeping away

the red herrings and spurious details invented in the West between 1950 and 1970, this exhaustive volume can be offered to the public with the knowledge that it documents the true histories of some 1000 aircraft types. Much of what was believed to be fact has been proven wrong in various degrees, and it can confidently be claimed that no book in the history of aviation has ever contained so much new information. The volume is prefixed by sections on aircraft designations, engines, air launched weapons and much more - this really is the definitive work on Russian aircraft.

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 The I-15, I-16 and I-153 fighters were the world's first mass-produced fighters. Some 17,000 Polikarpovs had been manufactured by the time production ceased in 1941. They served with the Republicans in the Spain, the Chinese against Japan in 1937-38, and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War. By 1941, more than 20 Soviet pilots had made ace in Polikarpovs, and many more attained that status during the first months of the German invasion. Though thoroughly outclassed, the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east, and continued to serve, as training aircraft and as frontline fighters, some right through to 1945.

Franco and the Condor Legion Michael Alpert, 2019-06-27 The Spanish Civil War was fought on land and at sea but also in an age of great interest in air warfare and the rapid development of warplanes. The war in Spain came a turning point in the development of military aircraft and was the arena in which new techniques of air war were rehearsed including high-speed dogfights, attacks on ships, bombing of civilian areas and tactical air-ground cooperation. At the heart of the air war were the Condor Legion, a unit composed of military personnel from Hitler's Germany who fought for Franco's Nationalists in Spain. In this book, Michael Alpert provides the first study in English of the Spanish Civil War in the air. He describes and analyses the intervention of German, Italian and Soviet aircraft in the Spanish conflict, as well as the supply of aircraft in general and the role of volunteer and mercenary airmen. His book provides new perspectives on the air war in Spain, the precedents set for World War II and the possible lessons learnt.

Enemy at the Gates Justo Miranda, 2019-12-08 When the Nazis started to threaten the world with their efficient machine of propaganda, the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population. During the Munich Agreement in 1938, the democracies were defended by old biplanes and a bunch of modern fighters: 50 Hurricanes, 20 Morane-405 and 5 Fokker D.XXI. France and Great Britain took up the production of USA airplanes and cancelled exports to small countries, which were forced to design and build their own PANIC FIGHTERS with the intelligence and skill that desperation provides. When nothing seemed able to contain the German advance, France, Great Britain and the USSR developed several programs of emergency fighters, as did Australia, to face the Japanese expansion. At the time the course of events switched, it was the Axis powers that had to create their own PANIC FIGHTERS, some of them suicidal. The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia, Belgium, Bulgaria, Canada, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Great Britain, Hungary, Japan, Yugoslavia, Latvia, Netherlands, Poland, Romania, Sweden and Switzerland.

Lentolaivue 24 Kari Stenman, 2012-11-20 Finland's premier fighter squadron during World War 2, Lentolaivue 24 (Flying Squadron 24) first saw action during the bloody Winter War of 1939-40, when the Soviet Red Army launched a surprise attack on the small Scandinavian country the squadron enjoyed great success against numerically superior opposition. LLv 24 was once again in the thick of the action following the outbreak of the

Continuation War in June 1941. Easily the air force's most successful fighter unit, LLv 24 claimed 877 kills, and its pilots won five direct and two indirect Mannerheim Crosses (Finland's highest military award) out of a total of 19 presented to all Finnish soldiers. Most top aces also scored the bulk of their kills flying with this unit.

Morane-Saulnier MS.406 Aces Kari Stenman,Christian-Jacques

Ehrengardt,2014-05-20 The MS.406 was an important aircraft not only because it was built in larger numbers than any other French fighter of the period, but also because it was the first modern fighter in the Armée de l'Air inventory. Although comparable to the British Hurricane and early models of the German Bf 109, it was outclassed when flown against the more powerful, and faster, Bf 109E. With little or no protection (no armour or self-sealing tanks), the MS.406 sustained heavy losses during the Battle of France. Too lightly armed, and fitted with unreliable weaponry, the French fighter struggled to down German bombers. It therefore comes as no surprise that only a dozen French pilots became fully fledged aces on the type during this period, despite the aircraft being present in significant numbers. However a score of pilots, who bagged their very first kills at the controls of the MS.406, fought on after the fall of France, flying Dewoitine D.520s, Spitfires and even Soviet Yak-3s to attain ace status against both Allied and Axis opponents.

Strike From the Sky Richard P. Hallion,2010-03-14 Chronicles the history of battlefield air attack from 1911, when the airplane was first used in war, to the end of World War II.

Soviet Aircraft Industry Peter G Dancey,2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

Stalin's Falcons Dmitry Zubov,2024-06-13 In this stunning exposé, Dmitry Zubov reveals the dark truth of the terrible losses suffered by Soviet flyers, the inferiority of the Russian aircraft on World War II's Eastern Front, and the almost slave-like conditions in which those aircraft were made. The Soviet history of the Second World War, written under the conditions of a totalitarian regime, reflected all its features, with the result that it includes solid sets of patriotic fables that have no connection with reality. Many of the events of the war were distorted beyond recognition or even made up from beginning to end. Archives containing original documents were available only to selected, specially verified KGB 'historians' who presented only the version of the war that was acceptable to the Soviet regime. After the collapse of the Soviet Union, the process of declassifying archives and gaining wide access to information gradually began to reveal the terrible truth of the crimes of the Soviet regime. One of which, of course, was the incompetent leadership of the Red Army, which led to massive loss of life across the military and civilians alike. However, the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science. Because of this, not only Russian, but, unfortunately, many European and American historians found themselves repeating the Soviet myths they had been fed. The history of Soviet fighter aircraft did not escape this fate. The tale of Stalin's so-called 'Falcons', who allegedly shot down dozens and even hundreds of Luftwaffe

aircraft, was persistently drummed into the heads of many generations of Russian people. These heroes, supposedly, flew Soviet fighters whose technical characteristics were many times superior to their German counterparts, with the result that Luftwaffe aces were reportedly afraid of meeting them in the air. These primitive propaganda clichés became a model for describing the actions of Stalin's fighter aircraft. In this stunning exposé, Stalin's Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers, the inferiority of the Russian aircraft and the almost slave-like conditions in which those aircraft were made.

Spain in Arms E. R. Hooton, 2019-02-19 This detailed military history of the Spanish Civil War dispels long-held misconceptions and sheds significant new light on the conflict. Spain in Arms chronicles the development of the Spanish Civil War on the battlefield, examining eight campaigns waged between 1937 and 1939. Through detailed analysis, it demonstrates how many accounts of military operations during this conflict are based upon half-truths and propaganda. From the Madrid Front to the Catalonia Offensive, each campaign is chronicled with special focus on the weapons and tactics used, as well as the moment-to-moment decisions of both Republican and Nationalist generals. Hooton also sheds light on the true extent of foreign intervention in the conflict. Using British and French archives, he produces a more accurate—and radically different—account of the battles and the factors that shaped them. Ultimately, Hooton reveals the superiority of the Nationalist alliance in both training and overall command. Spain in Arms draws on specialized German, Italian and Russian works, and is the first book to quote secret data about Italian air operations intercepted by the British. A magisterial work of military history, it combines detailed analysis with historical context, showing how the events of the Spanish civil War provide a link between the First and Second World Wars.

Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIB Nigel Askey, 2018-04-25 Volume IIB is the second volume relating to (and completing) the Wehrmacht, and the German mobilisation and war-economy, from June to December 1941. It includes the most detailed Orders of Battle ever published on the German Heer, Luftwaffe, Waffen SS and Kriegsmarine, in all areas of the Reich, between 22nd June and 4th July 1941. Even small and obscure units are included, such as: flak companies, artillery HQs, observation battalions, bridging columns, Landeschützen battalions, MP battalions, railroad companies, and Luftwaffe Kurierstaffeln, Verbindungsstaffeln and Sanitätsflugbereitschaften. The Luftwaffe OOBs also include details on aircraft types and strengths in each air unit.

Soviet Bombers of the Second World War Jason Nicholas Moore, 2019-09-08 Soviet bombers were a varied lot during the Second World War, ranging from single-engined biplanes such as the 1920's era Polikarpov U-2 to the excellent and modern twin-engined Tu-2 medium bomber. Although the use of four-engined strategic bombers was mostly limited to use of the huge Pe-8 bomber, the Soviets used many other aircraft for both strategic and tactical bombing. As the bombers of the Red Air Force were mainly tasked with supporting the Red Army, most of the bombers were used for tactical bombing, attacking tanks, troop convoys, trains, and airfields. This book will deal with both strategic bombers and tactical bombers, but will concentrate on the smaller tactical bombers, as this is where the Red Air Force's emphasis lay. Such types as the Il-4, the Su-2, the aforementioned Tu-2, and the most important bomber of all, the Il-2 Shturmovik attack bomber, will be described in great detail, including not only details on the aircraft themselves, but how they were deployed in combat. The one truly strategic bomber, the Pe-8, will not be forgotten, and neither will the comparatively tiny U-2 biplane, which was so effective in its use as a night-time nuisance raider that the Germans copied the tactic wholesale. Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers.
