*Porsche 956/962* Glen Smale,2012-07-15 The Porsche 956 and the derivative 962 version dominated long-distance sports car racing on both sides of the Atlantic during the 1980s, both in European Group C racing and the American IMSA series. The car's numerous successes included six consecutive victories in the Le Mans 24 Hours and four consecutive victories in the Daytona 24 Hours. This is a big book about a big subject, as these awesome machines raced competitively for 12 years and almost 150 of them were manufactured for use by factory and customer teams.

**Porsche 956/962** Peter Morgan,2003-12-22 This work chronicles the history of Porsche's 956/962 sports car. It includes the development story of the 956; its low-key debut at Silverstone in 1982; and the Joest team's two consecutive Le Mans victories. It also includes appendices of international race victories and technical specifications.

Porsche 956 & 962 Owners' Workshop Manual Ian Wagstaff,2018-04-10 Porsche 956 / 962 Owner's Workshop Manual is the latest addition to the "classic racing car" manual series,

taking the series beyond ten titles, and complementing Ferrari 250 GTO, Ford GT40, Porsche 917, AC Cobra, and Ferrari 512. This highly produced manual extends coverage of iconic sports-racing cars. 2016 was the 30th anniversary of the Porsche 962's first Le Mans win (the 956 having won for the previous four years) in the hands of Derek Bell, Hans Stuck and Al Holbart.

Porsche 956 & 962 Karl Ludvigsen, 2010-11-15 Powered by a turbocharged flat six, the 956/962 had Porsche's first full monocoque structure and was the first car its engineers designed to produce aerodynamic downforce. Raced both by the factory and by private teams, these were turn-key cars: just turn the key...and win. These are among the world's most respected racing cars. In these pages an expert on Porsche, Karl Ludvigsen, shares rare images from his personal archive and describes the highs and more highs of these great Porsches.

**Porsche 917 - 935 - 956 - 962 Sports Racers Gold**

**Portfolio** ,2007-02-01 During the mid-1960s Porsche decided that if it was to enjoy outright success at Le Mans (rather than class wins) it would need a car somewhat larger and more powerful than those it already had. It was time for something completely different. It was time for the Type 917. Mid-engined like so many earlier Porsches, it had a 12-cylinder air-cooled boxer engine that produced 580 bhp from 4.5 liters when first announced in 1969. After a period of development in 1970, the 917 became almost unbeatable, winning at Le Mans and virtually every other circuit. By 1972 the 917 was enjoying success in the hugely popular Can-Am series in America with a turbocharged 5.0 liter engine of 950 bhp and later a 5.4 liter unit that produced over 1,000 bhp! The hero driver was usually the late Mark Donohue. Later came the 935, 956, and the evergreen 962 that enjoyed a race-winning life of many years, way beyond the normal two or three years.

Porsche 917, 956, 962 Colin Pitt,2007-07-01 This 108 page book tells the story of the Porsche 917, 956 and 962 racing cars that were so successful at Le Mans. Great technical information on the Porsche 917's engine and detailed race records for the cars are also included.

**Ultimate Works Porsche 956** Serge Vanbockryck,2019-09

Unleashed in 1982, the Porsche 956 became the most successful purpose-built race car in history. Over the following decade, the 956 and its later long-wheelbase version, the 962, would win five consecutive world championships, as well as every single classic sportscar race in the world a record number of times: the Le Mans 24 Hours seven times, the Daytona 24 Hours six times and the Sebring 12 Hours four times, plus 39 world championship events and 55 IMSA races, to name but a few of its remarkable achievements. Many of the successes were achieved by works-entered cars, almost always in the iconic white-and-blue colours of sponsor Rothmans, and they form the focus of an extraordinary body of work researched and written by author Serge Vanbockryck over the past 30 years. This is the first part of his project, a two-volume production about the Works 956s, with a second such title on the Works 962s to follow in the summer of 2020.

*Porsche Racing Milestones* Hal Thoms, 2001 Subtitled: 356 to 962. From the first aluminum 356 coupe at Le Mans in 1951 to the all-conquering 962 of the 1980s, the story of Porsche's competition cars is told through many never-before-seen vintage images and hundreds of color photographs from the 1998 Monterey Historic Races. Porsche brought many of its museum cars to this event, and Hal Thoms captured them in beautiful color at rest and on the track. Hdbd., 10 1/2 x 9 1/2, 224 pgs., 100 b&w and 250 color ill.

*Porsche 956 - 962* Michael Cotton, Gustav Büsing, 2003

*Inside IMSA's Legendary GTP Race Cars* J. A. Martin, Michael J. Fuller, Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched--in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of

mechanical “parity”? This was what the International Motor Sports Association’s (IMSA) Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993, and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP’s flat-out competition among different--and passionate--ideas about what might be the fastest way around a track: the V-12 with its better ground-effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely-restricted ground-effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering free-for-all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings and first-person accounts from the men who built them, Inside IMSA's Legendary GTP Race Cars offers a detailed look at the technology that drove some of the world’s most exciting race cars, the likes of which may never be seen again.

**Porsche 904, 906, 907, 908, 910, 936, 956, 962** Colin Howard, 2014-05-01 This title is a photographic survey of the racing cars produced by Porsche from 904 to the 962 - that is, all the

racing cars that entered events such as the Targa Florio. There are detailed race results, model specifications and great period photography throughout.

**Porsche Turbo** Randy Leffingwell, 2015-10-23 Celebrate the rebirth of the world's most stunning high-performance automobile. Porsche made history when it brought turbocharging to the racing world in the form of the 917. When strict regulations regarding engine displacement took away the option of bigger engines, manufacturers turned to forced induction. In its wildest trim, the original 12-cylinder turbocharged Porsche racing engine yielded as much as 1,400 horsepower! Porsche's official philosophy was that racing cars must have a connection to street cars, so it was preordained that Porsche would eventually produce a turbocharged version of its air-cooled flat-six cylinder engine. The resulting 930 Turbo appeared in the spring of 1975 in Europe. Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds, and its top speed was 155 miles per hour. The Turbo's distinctive rear wing let the world know that this was something very special. It was nothing less than the rebirth of the high-performance automobile. At a time when the big-block engines in America's so-called muscle cars were putting out 180 horsepower and the engines in exotic

supercars weren't much more ambitious, the lightweight Porsche was a genuine rocket. Porsche Turbo: The Inside Story of Stuttgart's Turbocharged Road and Race Cars celebrates Porsche's five decades of turbocharged supercar performance, both on the track and on the street. It covers all of the major racing cars as well as the turbocharged street cars, including the 930, 935, 924, 944, 968, 911, and Cayenne Panamera. Don't let this one fly past you!
